

2004 - 2005 Catalog

Danville Community College

THE COLLEGE OF CHOICE

Welcome To Danville Community College!

Why do we believe that DCC should be your community college? First, Danville Community College offers a comprehensive number of high quality programs for virtually every student who has the ability to benefit. You may select either programs of study for transfer to a four-year college or university or a full range of occupational-technical degree, diploma, or certificate programs that lead directly to employment upon graduation from DCC. In addition, many students pursue specialized workforce training through the Center for Business, Industry, and Government and the Regional Center for Applied Technology and Training.

Secondly, we are committed to ensuring that the citizens of the DCC service region; i.e., Danville, Pittsylvania County, and Halifax County, have complete access to the many programs and services the College offers — including a comprehensive package of financial aid options. Moreover, we have expanded our distance learning capability to enhance the availability of the aforementioned programs and services.

Thirdly, when you attend DCC, you become part of an institution where the faculty and staff believe in celebrating student achievement and success. Our students run the gamut of age and background — from students just out of high school to working adults who are seeking to update their workforce skills. You are never alone; you are never a number. You are an individual who will receive personalized attention and assistance from our outstanding faculty and staff.

This 2004-2005 edition of the DCC Catalog is designed to provide timely information about Danville Community College; however, the catalog cannot answer all of your questions. Therefore, we encourage you to visit our campus or web site (www.dcc.vccs.edu) and discover why DCC offers a world of opportunity for you.

Very sincerely,

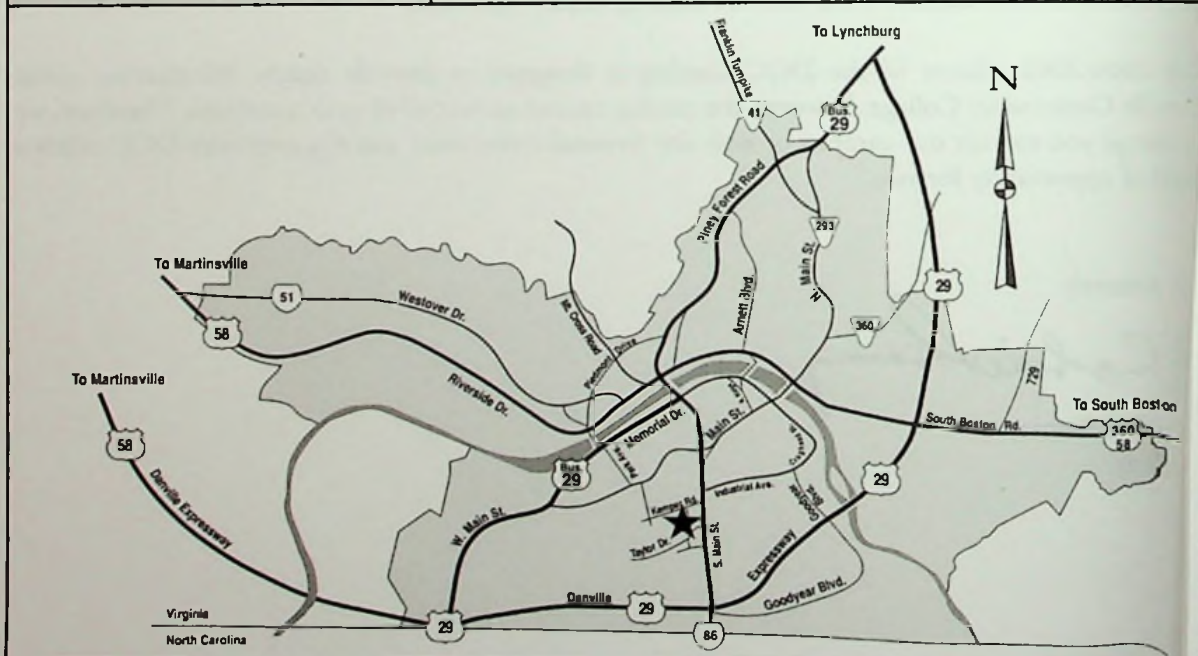

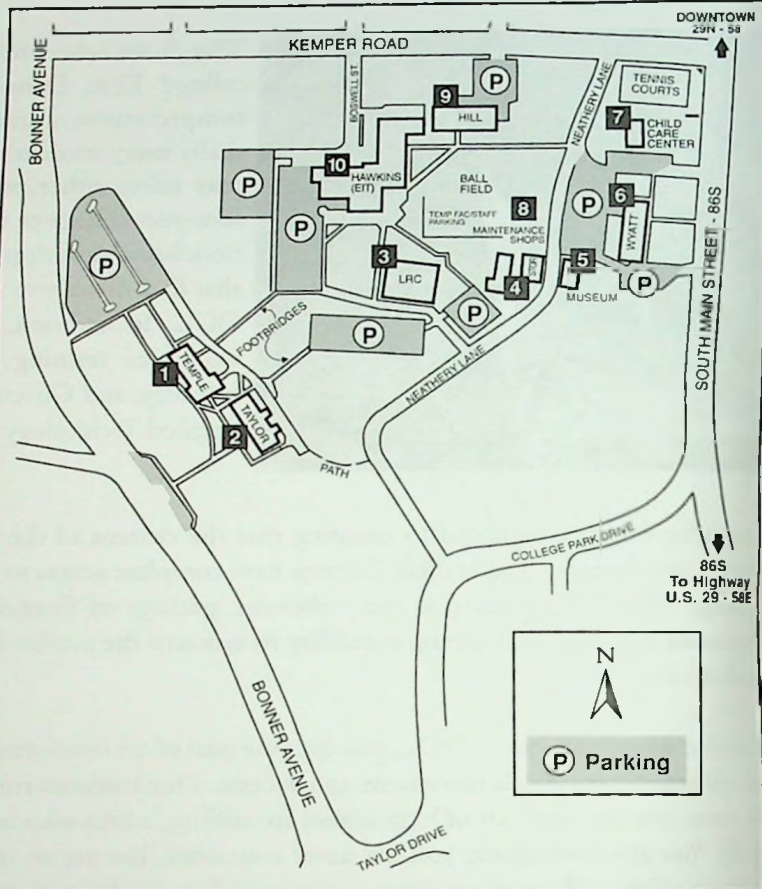

A handwritten signature in dark ink, which reads "B. Carlyle Ramsey". The signature is written in a cursive, flowing style.

B. Carlyle Ramsey
President

Exam Schedule

Fall Semester 2004

Monday, December 13

All MWF - 9:00 classes — 8:00-10:30
All MWF - 12:00 classes — 11:00- 1:30
All MWF - 2:00 classes — 2:00-4:30
All Monday evening classes — 6:30-9:30 P.M.

Tuesday, December 14

All TuTh - 9:30 classes — 8:00-10:30
All TuTh - 11:00 classes — 11:00 - 1:30
All TuTh - 1:30/2:00 classes — 2:00- 4:30
All Tuesday evening classes — 6:30-9:30 P.M.

Wednesday, December 15

All MWF - 10:00 classes — 8:00-10:30
All MWF - 1:00 classes — 11:00- 1:30
All MWF - 3:00 classes — 2:00-4:30
All Wednesday evening classes — 6:30-9:30 P.M.

Thursday, December 16

All TuTh - 8:00 classes — 8:00-10:30
All TuTh - 12:00/12:30 classes — 11:00- 1:30
All TuTh - 3:00 classes — 2:00-4:30
All Thursday evening classes — 6:30-9:30 P.M.

Friday, December 17

All MWF - 8:00 classes — 8:00-10:30
All MWF - 11:00 classes — 11:00- 1:30
All Friday evening classes — 6:30-9:30 P.M.

Spring Semester 2005

Tuesday, May 3

All TuTh - 9:30 classes — 8:00-10:30
All TuTh - 11:00 classes — 11:00 - 1:30
All TuTh - 1:30/2:00 classes — 2:00- 4:30
All Tuesday evening classes — 6:30-9:30 P.M.

Wednesday, May 4

All MWF - 10:00 classes — 8:00-10:30
All MWF - 1:00 classes — 11:00- 1:30
All MWF - 3:00 classes — 2:00-4:30
All Wednesday evening classes — 6:30-9:30 P.M.

Thursday, May 5

All TuTh - 8:00 classes — 8:00-10:30
All TuTh - 12:00/12:30 classes — 11:00- 1:30
All TuTh - 3:00 classes — 2:00-4:30
All Thursday evening classes — 6:30-9:30 P.M.

Friday, May 6

All MWF - 8:00 classes — 8:00-10:30
All MWF - 11:00 classes — 11:00- 1:30
All Friday evening classes — 6:30-9:30 P.M.

Monday, May 9

All MWF - 9:00 classes — 8:00-10:30
All MWF - 12:00 classes — 11:00- 1:30
All MWF - 2:00 classes — 2:00-4:30
All Monday evening classes — 6:30-9:30 P.M.

IMPORTANT: PLEASE NOTE!

All exams will be administered in the regular classroom meeting room. Any changes in the schedule must be approved in advance by the appropriate Division Dean and the Vice President of Academic and Student Services. During the above exam days, classes meeting after 3:00 p.m. or on weekends will have exams at the regularly scheduled class meeting times.

Summer Session 2005: There will be no exam days. Exams should be given at the last two class meetings.

General Information

The College

Danville Community College is a two-year institution of higher education under the statewide Virginia Community College System. DCC's service area includes the City of Danville, Pittsylvania County, and Halifax County. The College, its employees, and students are governed by the policies established by the State Board for Community Colleges with the support and advice of the Danville Community College Board.

It is the policy of Danville Community College to maintain and promote equal opportunities in its programs and activities, admissions, and employment without regard to race, color, sex or age (except where sex or age is a bonafide occupational qualification), religion, handicap, national origin, educational opportunity, or other non-merit factors. Inquiries concerning the affirmative action policy should be addressed to Affirmative Action Officer, Danville Community College, 1008 South Main Street, Danville, VA 24541, and Telephone: (434) 797-8458; TTY: (434) 797-8542.

Danville Community College values the multi-cultural diversity of its students, faculty, and staff. We are committed to creating and nurturing a campus environment that both welcomes and empowers all individuals. We recognize cultural differences of background, experience, and national origin, and we seek to promote a genuine understanding and appreciation for these differences. We also seek to recognize and promote the common bonds of humanity, which cross the boundaries of cultural difference.

The College has an open admissions policy. You can enroll if you have a high school diploma or the equivalent, or have reached the age of 18. In order to help you succeed, you may, however, be required to participate in developmental studies before beginning coursework in the particular field of study you have chosen.

Disability Services

Danville Community College believes in promoting an atmosphere free of inequity and partiality in which all students have access to educational opportunity. DCC believes in creating an inclusive and welcoming community for all students. Danville Community College is committed to ensuring that all qualified students with disabilities have the opportunity to take part in educational programs and services on an equal basis. The college is committed to removing architectural barriers, but also strives to ensure that students with disabilities receive access to education and opportunities in this academic community. DCC facilitates access to reasonable accommodations for students with disabilities in accordance with their documented disabilities.

In order that the College may assess each student's needs and plan most effectively for his or her academic experience, the student should contact the Counseling Office at (434) 797-8460.

Location

The 76-acre campus is located approximately two miles from downtown Danville on South Main Street (Route 86). Please refer to maps on page 2.

History

Danville Community College developed from two institutions, Danville Technical Institute and the Danville Division of Virginia Polytechnic Institute. Danville Technical Institute opened in 1935 as the Danville Textile School, becoming Danville Technical Institute in 1941. The Danville Division of Virginia Polytechnic Institute first began as an engineering division in 1946, and was later expanded to include the first two years of coursework for all engineering, business administration, liberal arts, and science majors.

Beginning in the summer of 1967, all programs taught by Danville Technical Institute were brought under the Virginia Department of Community Colleges. Effective July 1, 1968, the Danville Division of Virginia Polytechnic Institute merged with the existing community college to provide more comprehensive programming.

Vision Statement

Danville Community College will be the college of choice in our region for exemplary educational programs and services.

Mission Statement

Danville Community College provides quality credit and non-credit comprehensive higher education and workforce training programs and services to promote individual, business, and community growth and development.

Programs

Danville Community College is a comprehensive institution of higher education offering programs of instruction extending two years beyond the high school level. These programs include:

1. **Occupational-Technical Education:** The occupational and technical education programs are designed to meet the increasing demand for technicians, semiprofessional workers, and skilled craftspersons for employment in industry, business, professions, and government. The programs are planned primarily to meet the needs for workers in the region being served by the College.
2. **University Parallel-College Transfer Education:** The university parallel-college transfer program includes college freshman and sophomore courses in arts and sciences and pre-professional programs meeting standards acceptable for transfer to baccalaureate degree programs in four-year colleges and universities.
3. **General Education:** General education is that portion of the collegiate experience that addresses the knowledge, skills, attitudes, and values characteristic of educated persons. It is unbounded by disciplines and honors the connections among bodies of knowledge. The following eight elements embody the essence of general education: commu-

nication; learning skills; critical thinking; interpersonal skills and human relations; computational and computer skills; understanding culture and society; understanding science and technology; and wellness. Locally developed general education objectives covering the 16 general education elements shall be included in the catalog of each institution (Virginia Community College System Policy Manual). See General Education Objectives on page 12.

4. **Continuing Adult Education:** These programs are offered to enable the adults in the region to continue their learning experiences. This work includes both degree credit and non-degree credit work offered on- and off-campus.
5. **Special Training Program:** Special training is provided where specific job opportunities are available for new or expanding industries. This special training is coordinated with Virginia's economic expansion efforts and with the needs of employers.
6. **Developmental Studies Program:** Foundation and developmental programs are offered to help prepare a student for admission to an occupational-technical curriculum or to a university parallel-college transfer curriculum in the community college. These programs are designed to help develop the basic skills and understanding necessary to succeed in other community college programs.
7. **Specialized Regional and Community Services:** The facilities and personnel of the College are available to provide specialized services to help meet the cultural and educational needs of the region served by the community college. This service includes the non-classroom and non-credit programs, cultural events, workshops, meetings, lectures, conferences, seminars, and special community projects that are designed to provide needed cultural and educational opportunities for the citizens of the region.

College Goals

Reaffirmed by the College Board annually, the Goals of the College are:

- Goal 1.** The College will provide quality credit and non-credit educational programs and instruction for the citizens of the service region;

- Goal 2.** The College will carry out its commitment to outreach programs for people within the College's service region;
- Goal 3.** The College will carry out its commitment to provide services necessary to assist students in achieving their educational goals;
- Goal 4.** The College will provide facilities that enhance a quality educational environment;
- Goal 5.** The College will have an excellent faculty and staff;
- Goal 6.** The College will obtain and use resources to achieve its purpose; and
- Goal 7.** The College will strengthen its commitment to partnerships and relationships.

General Education Objectives

In order to fulfill its purpose, Danville Community College seeks to enable and encourage students to investigate career choices that are compatible with their abilities and interests; apply critical thinking and decision-making skills; demonstrate competence and achievement in their chosen fields of study; apply knowledge and skills learned in the classroom to actual situations; apply principles of personal and interpersonal skills; prepare for entry into subsequent educational programs and/or into chosen career fields; expand workforce skills; and master essential skills in reading, writing, computation, oral communications, and computer literacy.

The College recognizes that certain values need to be assimilated by students. These values include a framework of ethics, an appreciation of democratic institutions, knowledge of world cultures and international affairs, recognition of the impact of science and technology on society, and a commitment to lifelong learning.

The following 16 General Education Objectives apply to all certificate, diploma, and degree programs offered by the College:

Communication

1. Students will read critically, write in an organized manner, listen objectively, and speak effectively.

Learning Skills

2. Students will recognize the need for lifelong learning.
3. Students will demonstrate skills to locate and utilize information resources.
4. Students will draw from knowledge of appropriate disciplines, identify problems, analyze alternate solutions, and make decisions.

Critical Thinking

5. Students will develop critical thinking skills including analysis, evaluation, synthesis, and reflection.
6. Students will demonstrate the ability to function in an independent, self-directed manner.

Interpersonal Skills and Human Relations

7. Students will recognize effective interpersonal skills.
8. Students will recognize the need for value judgments and will display a concern for ethics and social responsibility.

Computational and Computer Skills

9. Students will utilize mathematical procedures for effective performance on the job and in society.
10. Students will be able to use appropriate computer technology.

Understanding Culture and Society

11. Students will recognize the value of democratic institutions.
12. Students will recognize the existence of different perspectives and cultural values.
13. Students will recognize the function and impact of major social, cultural, economic, and political institutions.
14. Students will develop a historical consciousness and a global perspective.

Understanding Science and Technology

15. Students will know and understand the major developments in science and technology, in relationship to their field of study, and will evaluate their impact on contemporary society and on the environment.

Wellness

16. Students will recognize behaviors that promote physical and emotional well-being.

Computer Competency

In keeping with DCC's general education objective that students will be able to use appropriate computer technology, the college provides a teaching-learning environment geared to achieving this objective. All classrooms are equipped with a data port for Internet access, and all students who complete an associate degree, certificate, or diploma will graduate able to demonstrate a working knowledge of computer concepts, components, and operations to accomplish educational and career tasks. Computer competency may be acquired/demonstrated through required courses in curricular programs that include word processing, spreadsheet, database, and/or presentation/ communication components; through equivalency testing; or by substituting other computer courses. In addition, students will be able to access and utilize information from the World Wide Web and the VCCS Student Information System.

Danville Community College has computer labs for classroom and open use in the Taylor, Temple, Hill, Wyatt, Charles R. Hawkins Engineering & Industrial Technologies, and Whittington W. Clement Learning Resources Buildings on campus, as well as at off-site locations where classes are held.

Educational Foundation

The Danville Community College Educational Foundation is a tax-exempt, non-profit organization governed by a Board of Directors, which is composed of concerned citizens, donors and alumni. The Foundation was established to enhance the academic excellence of Danville Community College and to improve the College's ability to serve the citizens of our area in accordance with the College's mission. Objectives of the Foundation include: awarding student scholarships, providing professional development for the faculty and staff, ensuring that instructional equipment keeps pace with technological changes, strengthening the academic programs, and encouraging cultural activities.

The Estelle H. Womack Museum of Natural History

The Estelle H. Womack Museum of Natural History, administered by the DCC Educational Foundation, Inc. was officially opened April 1, 1987. Housed in a 5,000 square-foot building, the museum is located on Neathery Lane at Danville Community College. Dedicated to increasing public awareness of the natural environment, both past and present, the museum collection includes mounted animals, birds, reptiles, amphibians and insects, as well as Indian artifacts, fossils and minerals. The museum merges two major collections-the Johnny Westbrook bird collection that had been donated to DCC in the early 1970's and the Walter Grant big game animal collection, a gift from the Danville Museum of Fine Arts and History.

The Estelle H. Womack Museum of Natural History features the work of Danville-area artists. Twelve dioramas house part of the bird collection in their natural habitat. In addition, area residents donated many of the small mammals, reptiles and amphibians that are on display.

Admission to the Estelle Womack Museum of Natural History is free. The museum is open daily by appointment and from 2-5p.m. Tuesdays - Sundays. School, youth, and civic groups and organizations are encouraged to arrange guided tours. For more information or to schedule a tour, call (434) 797-8498.

Accreditation

Danville Community College is one of 23 colleges in the Virginia Community College System. The associate degree curricula of the College have been approved by the State Council of Higher Education for Virginia. Danville Community College is accredited by the Southern Association of Colleges and Schools, 1866 Southern Lane, Decatur, GA 30033, telephone (404) 679-4500 to award the associate degree. (*Note: Inquiries to the Commission should relate only to the accreditation of DCC, and not to general admission information.*)

Enrollment Information

Admission Information

All matters pertaining to admission to DCC should be addressed to the Office of Admissions and Records, located on the first floor of the Wyatt Building, Room 108.

Admission Requirements*

In general, you may enroll if you have a high school diploma or the equivalent or are at least 18 years of age and can benefit from a program of study. A student may be admitted by meeting one of the following:

1. Graduate of accredited high school.
2. Admission by GED Examination.
3. Admission by transfer.
4. Individual approval.
5. Dual enrollment.
6. Concurrent enrollment.
7. Contract arrangement.
8. Special student.
9. International student.

*Admission to the College does not mean admission to a curriculum or to a program that has additional requirements.

Graduate of an accredited high school: A graduate of an accredited high school is eligible for admission without regard to the units or courses taken in high school. An official high school transcript showing graduation must be presented for admission.

Admission by GED Examination: A non-high school graduate who is at least 17 years of age and who has successfully completed the General Education Development test (GED) is eligible to apply for admission.

Admission by Transfer: If you are requesting transfer from another college, you should:

1. Submit a general admission application to the College.

2. Submit transcript(s) of all previous college work.
3. Submit high school transcript(s).

Upon acceptance, you will meet with a counselor and/or an appropriate academic division dean who will outline for you which specific courses, previously taken, fit the program of study you are beginning at Danville Community College. Generally, no credit will be given for courses with grades lower than "C." You may be advised to repeat courses in order to make satisfactory progress in your curriculum. (Coursework transferred in or accepted for credit must be completed at an institution accredited by a post-secondary regional accrediting commission at the time the coursework was completed.)

Individual Approval: Under certain circumstances, Danville Community College will admit students 18 years of age or older who have not completed high school.

Dual Enrollment: Danville Community College may enter a contractual agreement with regional high schools and offer college level courses at the high school location. Under certain circumstances, students enrolled in these courses may earn both high school and college credit.

Concurrent Enrollment: High school seniors may be admitted to the College and enroll for courses prior to graduating from high school. Prior to admission, the College must receive written permission from the student's parents and his/her high school principal, and be approved by the Director of Student Development and Enrollment Management.

Contract/Memorandum of Agreement: Under certain circumstances, Danville Community College may enter into an agreement with business, industrial, and governmental groups to provide educational services. Students admitted under

this arrangement will receive full benefit of College services; however, they may need to meet additional requirements in order to enroll in a curricula program.

Special Student: Any person who wishes to enroll at Danville Community College who has not completed his/her junior year of high school may be permitted to register as a special student. This status will restrict the student to enrolling in a maximum of one (1) credit course per session. Final approval for such admission requires the recommendation of the principal of the last school attended, permission of the student's parents, approval of the College Admissions Committee, and the approval of the Vice President of Academic and Student Services.

International Students: Besides the College's general admission requirements, all international students must demonstrate proficiency in both written and oral English. Applications, and all required papers, must be received by April 30 for admission to the Fall term. No applications will be taken after this date.

Admission Procedures

Regular Admission:

(For program-placed students):

1. A completed application for admission form.
2. A completed Virginia Residency Form.

Official transcripts from all high schools, colleges, and universities attended. If the student has been out of high school ten (10) years or more, high school transcripts are not required for admission to the College; however, certain programs may require high school transcripts for admission.

3. Program-placed students normally are required to take an appropriate placement test. The test is administered in the College's Learning Assistance Center.

Non-Curricula Admission:

(For non-program-placed students):

1. A completed application for admission form.
2. A completed Virginia Residency Form.
3. Acceptance by the College does not ensure admission to a specific curriculum or course.

Once accepted by the College, the student will meet with a college counselor. Together they will discuss his/her educational interests and decide if additional tests are needed to help choose a program or course. The counselor will advise the student about the specific admission requirements of the program in which he/she is interested. After these requirements are met, the student can be admitted to the program. Provided all program admission requirements are met, priority will be given to students:

- a. Recommended by the program's admission committee;
- b. Legal residents of Virginia living in cities and counties supporting the College;
- c. Other Virginia residents;
- d. Other U. S. citizens; and
- e. Others.

The College reserves the right to refuse admission to applicants when it can be demonstrated to be in the best interest of the College.

Admissions To Specific Curricula

In addition to the general admission requirements explained above, specific requirements are listed for each program of the College. Among the items generally considered in determining students' eligibility for admission to a curriculum are their educational and occupational experiences and other reasonable standards to ensure that they can successfully complete the program requirements. Specific requirements for each program of the College are listed in the Program of Study section of this Catalog. If a student does not meet the requirements for a specific program or course,

the student may improve his or her chances of eligibility by completing Developmental Studies courses. Program-placed students normally are required to take an appropriate placement test.

Residence Requirements: Each student applying for admission must complete a Virginia In-State Tuition Application in order to be declared legally domiciled in Virginia. Students must verify that one year before the date of entering the term for which they are requesting in-state tuition status they had given up any previous domicile and were living in Virginia with the unqualified intention of remaining in Virginia. Please contact the Admissions Office if you have any questions regarding residency requirements.

Advanced Standing for Experiential Learning Guidelines

Students who have reason to believe that previous educational studies, training programs, or work experience may entitle them to an adjustment in the course requirements for a particular curriculum should contact the Vice President of Academic and Student Services. Recognizing that many adults have gained college-level knowledge in non-collegiate settings through work experience, seminars, workshops, non-credit courses, and other educational experiences, Danville Community College provides a mechanism for evaluating and awarding college credit for knowledge. Credit earned through this evaluation process is considered Advanced Standing Credit.

The following shall apply to the Advanced Standing Credit requirements:

1. To earn credit for prior learning, an individual must be admitted to the curriculum in which advanced standing is requested.
2. As much as 25 percent of the required curriculum credits may be earned through the advanced standing process.
3. Advanced standing credits awarded through the advanced standing evaluation process will

be posted to the student's transcript after the student has successfully completed 15 credits of coursework in the curriculum with a cumulative grade point average of at least 2.25 in the curriculum.

4. Advanced standing will be awarded only for courses in which a student is not currently and has not been previously enrolled.

Procedure for student to apply for Advanced Standing Credit: The procedure will be administered by two faculty members. One of the faculty members must teach the course for which credit is requested.

1. Student must submit a resume that will be reviewed by the faculty members.
2. Student will be interviewed and a determination will be made by the faculty members at this time whether or not to proceed.
3. Student will be requested to take a brief oral examination administered by the faculty members. Again, a determination will be made whether or not to proceed.
4. Student will be requested to take a written test, perform specific tasks, and/or complete a project.
5. The results of the above will be reviewed by the faculty members who will make a final decision whether or not to recommend that credit be awarded.
6. The recommendation will be forwarded to the appropriate administrator.

Course Acceptance Policy

1. The administrator responsible for the program for which the evaluation of a student's previous coursework is requested shall:
 - a. Determine the acceptability of each course the student wishes to transfer or apply toward the program requirements based upon his/her knowledge of changes, which have occurred since the course(s) was completed;
 - b. Give particular attention to courses in areas which have had significant technological

changes in recent years (i.e., electronics, automotive, graphic imaging, information systems, accounting, administrative support technology, etc.);

- c. As deemed appropriate, seek the input of faculty or other administrators regarding the proper course of action.
2. Courses which are determined to have outdated information and whose acceptance would not assure the student of having current skills may be used to meet elective credit requirements.
3. Students who have kept their educational training current through their job activities may have their coursework given special consideration for acceptance.
4. A student who wishes to challenge the decision regarding the non-acceptance of his/her coursework may do so by demonstrating his/her competencies in an appropriate manner to the administrator or appropriate faculty member.
5. Because of the diversity of courses offered and the differences in changes which occur over a given time, no specific timeframe can be established for courses whose content may have become obsolete. However, it is recommended that all technical courses taken under the quarter system or more than five years ago be carefully reviewed for their current relevance.
6. The decision to accept or not accept a course(s) should be made with the idea that a student's graduation indicates current and relevant competencies in the program of studies.

Auditing a Course

To audit a course, the student must obtain permission from the appropriate division dean. Audited courses carry no credit and do not count as part of the student's course load. Students wishing to change status in a course from audit to credit or credit to audit must do so within the add/drop period for the course.

Registration

Danville Community College has implemented a new student information software system. As a result, students have access to enhanced services and certain commonly used terms have changed. Students are now able to register via the Internet and/or telephone using IVR (Interactive Voice Response). For instructions on using these new options, you may visit the DCC web site at www.dcc.vccs.edu or pick up an information booklet from the Admission Office, Room 108 in the Wyatt Building. Information is also included in the class schedule.

New terminology used is as follows:

Current System	New System
Drop one class, add another	Swap
Curriculum	Plan
Credits	Units

In the new system, "Career" refers to credit or non-credit and "Program" refers to curricular or non-curricular.

Registration Information

Registration is held prior to the beginning of each semester or term. Specific registration dates are listed in the Academic Calendar in this Catalog. The dates also are posted in each building on campus, in each semester's class schedule, and on the College's website (www.dcc.vccs.edu).

In addition to on-campus day and evening registration, off-campus registration is conducted at various sites in Danville and Halifax and Pittsylvania counties. For specific times and dates, consult the Academic Calendar or contact the Admissions Office at (434) 797-8467.

Mail Registration

All students are advised to confer with a counselor or faculty advisor before registering for classes. However, if you want to register for evening credit classes by mail, simply complete a DCC registration form and return it by the announced due date, along with the tuition (and a completed application, if a new student) to the Business Office. Mail registration for on-campus courses may require payment of a maintenance fee and a student activity fee. Please check these fees as listed below, and add fees to your payment as appropriate.

Internet/Web Registration

Students also may register via the Internet at www.sis.dcc.vccs.edu. For more information, contact the Admissions Office at (434) 797-8467.

Offerings

The College reserves the rights to cancel, withdraw, or combine classes when necessary. Classes with insufficient enrollment normally are cancelled the first week of class (see refund policy on page 21).

Expenses

Tuition

Tuition rates are established annually by the State Board for Community Colleges. Current rates can be verified by contacting the Admissions and Records Office. The College has an extensive financial assistance program. We urge you to review that section of this Catalog, and to contact our Financial Aid Office for additional information. Fees are subject to change by the State Board for Community Colleges.

Payment of Tuition and Fees

Fall Semester: Students wishing to enroll for Fall Semester classes may do so on the published dates during the months of June, July and August. Students are expected to pay tuition and related fees on the same day that they register; otherwise they risk losing their enrollment in classes.

Spring Semester, Summer Session, and Special Session Classes: Students enrolling for classes must pay all tuition and related fees on the same day that they register. Failure to do so will result in the cancellation of their registration.

Students who have not paid tuition and fees are not authorized to attend class (es).

Student Activity Fee

The Student Activity Fee is \$0.50 per credit hour. Monies are used for social and cultural activities. Please note that fees are subject to change. Contact the Admissions Office at (434) 797-8467 for the current cost.

Maintenance Fee

All students enrolled for three or more semester hours on campus pay a Maintenance Fee. Currently, the Maintenance Fee is \$1.00 per term. Monies are used to maintain College parking lots. Please note that fees are subject to change. Contact the Admissions Office at (434) 797-8467 for the current cost.

VCCS Technology Fee

All students on and off campus will be charged a technology fee for each credit hour for which they enroll. This fee will be shown separately on the registration form. All monies support the acquisition of high technology equipment for academic purposes. Currently, the Technology Fee is \$3.15 per credit. Please note that fees are subject to change by the State Board for Community Colleges.

Capital Fee

Students with out-of-state residences are charged a \$1.50 per credit Capital Fee. Please note that fees are subject to change by the State Board for Community Colleges.

Other Fees

There are NO special laboratory or library fees. Students are responsible for any College property which they damage or lose (such as laboratory or shop equipment, supplies, library books, and materials).

Nonpayment of Tuition and Fees, or Other College Debts

A student's continued attendance at the College is dependent upon proper settlement of all debts owed the institution. Transcripts, certificates, diplomas, or degrees will not be issued, nor will students be permitted to complete registration until accounts are cleared satisfactorily with the Business Office, Bookstore, or Library. Should the student fail to satisfy all due and payable amounts for tuition and fees, College loans, fines, or other debts owed the College, the College may initiate disciplinary action in accordance with the Code of Student Conduct and Discipline Policy.

Transcripts

Transcripts may be obtained by completing a transcript request form in the Admissions and Records Office, or by signed letter requesting transcripts sent to a specific location. Fax requests and requests via the Internet also are acceptable. Please contact the Admissions Office at (434) 797-8467, or access DCC Online at www.dcc.vccs.edu.

Books and Materials

Students are expected to obtain their own books, supplies, and consumable materials. The approximate cost of textbooks for a full-time student is \$300 - \$350 per semester.

Grading System

The quality of performance in any academic course is reported by a letter grade, the assignment of which is the responsibility of the instructor. These grades denote the character of study and are assigned quality points as follows:

A - Excellent

4 grade points per credit

B - Good

3 grade points per credit

C - Average

2 grade points per credit

D - Poor

1 grade point per credit

F - Failure

0 grade point per credit

P - Pass

No grade point credit (applies to special courses. P/U Option: No more than 10 credits can count toward graduation.)

R - Re-enroll

No grade point credit (used only for Developmental courses. See below).

S - Satisfactory

No grade point credit. (used only for satisfactory completion of a Developmental Studies course.)

U - Unsatisfactory

No grade point credit (applies to specialized courses and seminars). (P/U Option: No more than 10 credits can count toward graduation.)

W - Withdrawal

No credit (A grade of withdrawal implies that the student was making satisfactory progress in the course at the time of withdrawal or that the withdrawal was officially made before the "deadline" date published in the college calendar.) See Withdrawal Policy in the next section.

I - Incomplete

No credit. This grade is used for a number of unavoidable reasons. The incomplete extends enrollment in the course and the requirements for satisfactory completion will be established

through the instructor. A student must complete the course by the end of the next term or another grade (A, B, C, D, F, P, R, S, U, or W) may be awarded by the instructor. This new grade would be based upon coursework which has been completed. The W grade should be awarded only under mitigating circumstances which must be documented and a copy placed in the student's academic file.

X - Audit

No credit (Permission of the Division Dean is required to audit a class.)

The grade point average (GPA) is determined by dividing the total number of grade points earned in courses by the total number of credits attempted.

Grading - Developmental Studies Course

A grade of "S" (Satisfactory) shall be assigned for satisfactory completion of the developmental studies course.

A grade of "R" (Re-enroll) shall be assigned to a student who makes satisfactory progress during the term, but has not completed the course objectives. This grade, which is to be used only for developmental studies, is to permit re-enrollment for the completion of the course objectives.

A grade of "U" (Unsatisfactory) shall be assigned to a student not making satisfactory progress. The Developmental Studies academic advisors, with the concurrence of the Dean for Arts and Sciences, will determine the subsequent sequence of courses for the student who receives a grade of "U."

A student may enroll no more than twice in any single developmental course. Appeal for a third and final enrollment must be addressed to the Director of Student Development and Enrollment Management. For additional information, refer to "Repeating A Course" section on page 27 in this Catalog.

Withdrawal Policy

Withdrawing from a course without an official form automatically results in course failure. Withdrawals cannot be completed by telephone. The official date of withdrawal is the date the withdrawal form is received in the Admissions Office and not the date of initiation of the form unless the two coincide.

If a student withdraws from a class prior to the termination of the add/drop period for the session, the student is removed from the class roll and no grade is awarded. After the add/drop period, but prior to the completion of sixty percent of a session (nine weeks for regular session), a student who withdraws or is withdrawn from a course will be assigned a grade of "W."

Students should be aware that withdrawal from a course might negatively affect their financial aid award. Students are encouraged to check with the Financial Aid Office to determine the impact of a course withdrawal on financial aid eligibility.

After that time, if a student withdraws or is withdrawn from a course(s) or the College, a grade of "F" will be assigned. Exceptions to this policy may be made under mitigating circumstances; such circumstances must be documented and a copy of the documentation placed in the student's academic file. If mitigating circumstances cause the withdrawal, and if the student is making satisfactory progress at the time of withdrawal, the grade of "W" will be given.

Curriculum students who withdraw from a course(s) or who withdraw from the College after sixty percent of the class has passed, should initiate the withdrawal request in their Division Dean's office where the Dean will decide whether the reason for withdrawal is mitigating. If the student is withdrawing from the College, an exit interview with a counselor will be required.

Non-curricular students should initiate their withdrawals in the Counseling Office where a counselor will decide if the reason is mitigating. In all cases, mitigating circumstances must be documented and the document, plus the completed withdrawal or drop form, will be placed in the student's permanent record. Students must sign withdrawal forms.

Even though students have the option of withdrawing from a course using the College's website without faculty signatures, it is recommended that students meet with the faculty member to ensure the withdrawal process has been completed successfully.

Tuition Refund

Students are eligible for a tuition refund if they drop classes or withdraw from the College on or before the announced date each semester. The add/drop form or withdrawal form must be processed by the Admissions Office. The College publishes in each semester's Class Schedule the dates during which a student may be eligible for tuition refunds. The College will consider no refunds after the announced date unless the student has encountered severe medical problems that relate directly to the individual student, or in case of an administrative error. Before any consideration can be made, the student must appeal to the Vice President of Academic and Student Services, and then to the Vice President of Financial and Administrative Services. The tuition refund policy and the deadline dates are established by State policy.

Please refer to the College Calendar in this Catalog (pages 7-8) for the deadline for tuition refund for full semester courses. Classes of shorter duration may have a different withdrawal deadline. Please contact the Admissions Office, if you have questions.

Notification of Student Rights

The Family Educational Rights and Privacy Act of 1974, Sec. 438, PUB.L. 90-247, as amended, sets forth requirements governing protection of students' right to privacy in their education records and affords them a right to inspect such records. A copy of this legislation is on file in the Learning Resources Center.

The College may disclose personally identifiable information from a student's education records. Such information, known as directory information, includes the student's name, address, telephone number, date and place of birth, major field of study, dates of attendance, degrees and awards received, and the previous college(s) or institution(s) attended by the student. This information may be disclosed by the College without the prior consent of the student unless a written request is made to the Director of Student Development and Enrollment Management before such time as the College is asked to make such disclosure. In any case, the College may disclose directory information from the education records of an individual who is no longer in attendance at the College.

Students having questions pertaining to this Act may direct inquiries to the Director of Student Development and Enrollment Management.

Degrees, Diplomas, and Certificates

Danville Community College offers the following degrees, diplomas, and certificates for students who successfully complete approved programs:

1. An Associate in Arts and Science Degree (AA&S) is awarded to students majoring in Business Administration, Liberal Arts, and Science, who plan to transfer to four-year colleges or universities after completing their Danville Community College program.
2. An Associate in Applied Science Degree (AAS) is awarded to students majoring in one of the

occupational-technical programs and who plan to obtain full-time employment immediately upon graduation from the College.

3. A Diploma is awarded to students who complete one of the two-year non-degree occupational curriculums.
4. A Certificate is awarded to students who complete one of the approved non-degree curriculums that are usually less than two years in length. The College also offers special Career Studies Certificates for programs that can be completed in less than one year.

See the Programs of Study section of this catalog for more information, or contact the Admissions Office.

Assessment Requirements

The Commonwealth of Virginia requires a comprehensive plan for student outcomes assessment. The Danville Community College Plan was approved by the State Council of Higher Education for Virginia in 1987 and has been reviewed each year. The Plan includes a variety of procedures to ensure that the institution has an effective process for improving the instructional and student development programs. These include:

1. Assessing general education competencies of 100-degree seeking students (Associate in Arts and Science and Associate in Applied Science Degrees).
2. Administering pre- and post-tests to Developmental Studies students.
3. Tracking the progress of selected groups of students during their enrollment at Danville Community College.
4. Surveying graduates, employers, and non-completers about the programs at the College.
5. Using a variety of assessment techniques to measure the level of success of students in meeting the objectives of their programs of study. Students are required to participate in the assessment procedures which are appropriate to their curricula. For additional information, contact the Director of Institutional Planning, Effectiveness and Research.

Institutional Effectiveness Days

Two class days are designated each academic year (one per term) as Institutional Effectiveness Day. The faculty in each program at Danville Community College reviews student outcomes objectives and measurement tools for each curriculum to ensure assessment of student outcomes.

Graduation Requirements Catalog Year Determination

All students who are initially placed in a program (including Developmental Studies) are placed in a catalog year at the same time. The catalog year to which a student is assigned determines the catalog which describes their program requirements. Keeping in mind that the catalog goes Summer, Fall, and Spring, a student who is accepted for Summer 2001, Fall 2001, or Spring 2002 will be placed in the 2002-2003 catalog year.

Students who have been attending in a non-curricular status will be placed in the catalog year corresponding to their program placement, not the catalog year corresponding to the year they became a non-curricular student.

Students who were previously in a program and dropped out of college for at least one year or changed programs and then ask to be readmitted to the original program after one year will be placed in the program in existence at the time of their readmittance. Students who drop out for less than one year or request readmittance to a program within a year after dropping out of it will be readmitted under the original catalog unless there have been significant changes to the program requirements. The counselor, in consultation with the Division Dean, will be responsible for selecting the catalog year when there is question about which to use when readmitting a student.

Associate Degree Requirements

To be awarded an Associate Degree from Danville Community College, a student must:

1. Have fulfilled all of the course requirements of the curriculum as outlined in the College catalog (see Catalog Year Determination);
2. Have been recommended for graduation by the faculty and Division Dean for the student's curriculum;
3. Have completed all of the course and credit-hour requirements of the degree curriculum with at least twenty-five percent (25%) of the credits applicable for the degree acquired at Danville Community College;
4. Have earned a grade point average of at least 2.0 on all courses attempted which are applicable toward graduation in the curriculum;
5. Have completed all required assessment testing, interviews, or other activities;
6. Have filed an application for graduation in the Office of Admissions and Records;
7. Have resolved all financial obligations to the College and returned all library and other College materials;
8. Have attended graduation exercises except when waived by the Vice President of Academic and Student Services.

Diploma Requirements

To be awarded a diploma from Danville Community College, a student must:

1. Have fulfilled all of the course requirements of the curriculum as outlined in the College catalog (see Catalog Year Determination on previous page);
2. Have been recommended for graduation by the faculty and Division Dean for the student's curriculum;
3. Have completed at least twenty-five percent (25%) of the credits applicable for the diploma at Danville Community College;
4. Have earned a grade point average of at least 2.0 on all courses attempted which are applicable toward graduation in the curriculum;

5. Have completed all required assessment testing, interviews, or other activities;
6. Have filed an application for graduation in the Office of Admissions and Records;
7. Have resolved all financial obligations to the College and returned all library and other College materials;
8. Have attended graduation exercises except when waived by the Vice President of Academic and Student Services.

Certificate Requirements

When a student successfully completes a program of instruction which does not lead to an associate degree or diploma, a certificate may be awarded. To be awarded a certificate from Danville Community College, a student must have fulfilled all of the course requirements of the curriculum as outlined in the College catalog (see Catalog Year Determination on previous page). Also, when a student pursues a degree or diploma program, but is unable to complete the degree or diploma requirements, the student, upon the recommendation of the appropriate Division Dean and the Vice President of Academic and Student Services may be issued a certificate, provided the portion of study successfully completed is equivalent to an approved certificate program; and the student has earned at least a 2.0 grade point average in all courses attempted which are applicable toward graduation in the curriculum, and 25 percent of the credits applicable for the certificate are completed at Danville Community College.

Graduation Honors and Awards

Appropriate honors are recorded on diplomas, certificates, or degrees. The honors, based upon scholastic achievement at Danville Community College, are as follows:

- Grade Point Average or Better
- 3.2 Cum Laude (with honors)
- 3.5 Magna Cum Laude (with higher honors)
- 3.8 Summa Cum Laude (with highest honors)

Academic Load

The normal course load during a regular semester at Danville Community College is 15-18 semester hours (not counting student orientation). A student must register for at least 12 credits to be considered a full-time student. A student wishing to enroll in 19 or 20 semester hours (not counting student orientation) must have a 3.0 grade point average or higher and/or the approval of his/her Division Dean. Under exceptional circumstances, a student may be allowed to enroll in more than 20 semester hours provided a request is made in writing to the Vice President of Academic and Student Services and supported by written statements from the student's advisor and Division Dean.

During the summer session, a student is restricted to two regular courses each summer term or 12-14 semester hours for the entire summer session. Students wishing to enroll in 15 semester hours must have a 3.0 grade point average or higher and/or the approval of the appropriate Division Dean. Under exceptional circumstances, a student may be allowed to enroll in more than 15 semester hours provided a request is made in writing to the Vice President of Academic and Student Services and supported by written statements from the student's advisor and Division Dean.

Academic Standing

Students are considered to be "in good academic standing" if they maintain a semester minimum grade point average (GPA) of 2.00; are eligible to re-enroll at the College; and are not on academic suspension or dismissal status. Students on academic warning or academic probation who are eligible to re-enroll may be considered eligible to receive financial aid assistance or other benefits requiring a "good academic standing" status.

Honors Program

In keeping with the college's commitment to provide educational opportunities consistent with the ability and interests of the individual student, DCC invites motivated students to enroll in its honors program. This program consists of individually contracted honors courses and an honors community that includes enhanced sections of regular college courses. Students may earn "Honors Program Graduate" designation on their diplomas and transcripts by completing a minimum of 12 credit hours of honors coursework. This designation also requires that the student achieve a grade point average (GPA) of 3.0 or greater in the honors courses and an overall graduating GPA of 3.0 or greater.

Individually contracted honors courses are based on projects negotiated with faculty and the honors program coordinator. These projects typically focus on topics of special interest to the student and require appropriate additional or alternative assignments which go beyond regular coursework. Students are eligible for individually contracted courses if they meet at least one of the following criteria:

- (1) SAT score of 1,000 or more or placement in the top 10% of the student's high school graduating class for entering freshmen;
- (2) inclusion on either the Vice President's or President's Honors Lists for the preceding term for enrolled students and;
- (3) special life experience or aptitude for the course(s)/program and the endorsement of two Danville Community College faculty members.

Students may also earn honors credit by participating in an honors community. An honors community consists of at least three core courses linked by a common theme. The work is challenging and is designed to enhance the student's

intellectual capacities. Students enrolling in a community can expect stimulating and rigorous assignments which expand the ability to write, think critically and independently, research accurately, and make reasonable inferences.

Community themes, such as "human nature," cut across discipline lines and demonstrate to the student that some issues and problems require the contributions of multiple disciplines. A limited enrollment of 15 students for honors community courses ensures the opportunity for increased student-to-student and student-to-faculty interaction. In order to enroll in an honors community, a student must be non-developmental in English and possess at least a demonstrated competence in mathematics, equivalent to MTH 2 completion. Students must also satisfy prerequisites of each honors community course. Finally, students must have earned at least a 3.25 high school GPA for recent high school graduates or a 3.0 GPA in twelve or more hours of college level coursework for students with college experience.

Interested students wanting more information about the Honors Program should contact the Honors Program Coordinator, Dr. David Balfour at (434) 797-8465.

Academic Honors

President's Honors List: A student who is enrolled for six or more credit hours for the semester during which the honor is extended; has compiled a cumulative grade point average of at least 3.0 and a semester grade point average of 3.75 or higher; and has completed a minimum of 24 semester hours at Danville Community College will be placed on the President's Honors List.

Vice President's Honors List: A student who is enrolled for six or more credit hours for the semester during which the honor is extended; has compiled a cumulative grade point average of

at least 3.0 and a semester grade point average of 3.0 to 3.74; and has completed a minimum of 24 semester hours at Danville Community College will be placed on the Vice President's Honors List.

Academic Warning

Any student who fails to attain a minimum grade point average of 2.00 for any one term will receive an academic warning.

Academic Probation

Any student who fails to maintain a cumulative grade point average of at least 1.5 after attempting 12 semester credit hours will be placed on academic probation. The statement, "Academic Probation," will be entered on the student's permanent record.

Any student on academic probation is required to consult with a counselor and may be required to elect less than the normal academic course load in the next term following this action. Generally, persons on probation are ineligible for appointive or elective office in student organizations unless the Vice President of Academic and Student Services or another appropriate College administrator grants special permission.

Academic Suspension

The student on academic probation who fails to attain a grade point average of at least 1.50 for the term enrolled will be subject to academic suspension. Academic suspension normally will be for one semester unless the student reapplies and is accepted for readmission to lower level curriculum of the College. The statement, "Academic Suspension," will be entered on the student's permanent record. Any student who is academically suspended must apply for readmission to the College by a written letter to the College Admissions Committee. Students are placed on academic suspension only after they have attempted 24 semester credit hours.

Academic Dismissal

A student who does not maintain at least a 2.00 grade point average for the term following reinstatement to the College after having been on academic suspension will be academically dismissed from that curriculum. Students who have been placed on academic suspension and achieve a 2.00 grade point average for the term of their reinstatement must maintain at least a 1.50 grade point average in each subsequent term of attendance.

Students remain on probation until their cumulative grade point average is raised to a minimum of a 1.50. Failure to attain 1.50 grade point average in each subsequent term until the cumulative GPA reaches 1.50 will result in academic dismissal. Academic dismissal normally is permanent unless, with good cause, the student reapplies and is accepted under special consideration for readmission by the Admissions Committee of the College. The statement, "Placed on Academic Dismissal," will be entered on the student's permanent record. Students will be dismissed only after they have attempted 24 semester credit hours.

Academic Renewal

The purpose of this policy shall be to adjust the cumulative grade point average (GPA) of eligible students enrolling Summer 1994 and forward. Cumulative GPA calculations for any term prior to Summer 1994 shall not be affected. The Academic Renewal process shall not affect academic, financial, and administrative events that have occurred in the past. Academic renewal may be granted only once and cannot be revoked once awarded. The following procedures shall be used at Danville Community College:

1. The student must complete the Academic Renewal Selection Form provided by the Admissions Office. Copies of this form will be located in all division offices as well as the Admissions Office.
2. The form must be submitted to the Admissions Office.

3. A student denied "Academic Renewal" may appeal the decision to a committee of at least three people. This committee will be chaired by the Director of Student Development and Enrollment Management, and the other two committee members will be appointed annually by the Director of Student Development and Enrollment Management. A written appeal should be sent to the Director of Student Development and Enrollment Management within seven (7) days of denial.
4. Once "Academic Renewal" has been granted the Admissions Office will enter all necessary data via the Student Information System (SIS) to complete "Academic Renewal."
5. All students should be warned about the pitfalls of "Academic Renewal." (Example: A student may have a "D" in a course that is needed for graduation, but cannot get credit for the course if it is part of Academic Renewal. The course will have to be repeated.)

NOTE: Separation from the College "five years or more" is defined as a minimum sixty-month period of continuous non-enrollment at the College.

An "eligible" student must be enrolled at the College as of Summer 1994, or any term forward from Summer 1994, in order to qualify for Academic Renewal. However, the continuous sixty-month period of non-enrollment may have occurred prior to Summer 1994, as well as the qualifying period of re-enrollment and subsequent completion of an additional twelve credits.

The qualifying "2.5 GPA based upon first twelve semester hours completed" is defined as a GPA calculation involving all courses and attempts taken in any term (or terms) up to the point of the twelfth semester hour being completed. A 2.5 GPA must be achieved based upon a calculation of all courses and attempts within the qualifying period of re-enrollment.

Prerequisites and Corequisites

Many courses at DCC are associated with other courses referred to as "prerequisites" and "corequisites." The basic idea behind these associations is that in order to be successful in a particular course, the student must have acquired or be in the process of acquiring certain other skills or knowledge.

A prerequisite is a course that a student must take before enrolling in a particular course. A corequisite is a course which a student must take while they are taking another course if they have not already completed that course. For example, Biology 102 has Biology 101 as a prerequisite. Students must successfully complete Biology 101 before taking Biology 102. Further Algebra I (MTH 3) is a corequisite for Biology 101. One must take MTH 3 while taking Biology 101 if one has not completed MTH 3. Students should register only for those courses for which they have completed the prerequisite requirements and must register for corequisite courses as needed. If a student does not know what the prerequisites or corequisites are for a course, faculty advisers will be able to provide this information. For more information, please see the list of prerequisites for each course beginning on page 182.

GPA for Repeat Courses

The GPA of a student will reflect only the last grade received for repeat courses which were initially taken in the Summer of 1994 or later. "General Usage" courses such as 099, 199, etc. are not counted as repeat courses. Repeat courses not figured in the GPA will be designated on the transcript with a parenthesis.

Attendance

Instructors will provide students with a statement of attendance policy during the first class meeting of each term. When absence from a class or laboratory becomes necessary, it is the responsibility of the student to inform the instructor prior to the absence.

Examinations

Students are expected to take all examinations, including final examinations, at the regularly scheduled time. Exceptions cannot be made without permission of the instructor.

Repeating a Course

A student is normally limited to two enrollments in the same credit course. If special circumstances warrant consideration of a third enrollment, the student must make the request in writing to the Director of Student Development and Enrollment Management. After reviewing the request with the Admissions Review Committee and receiving input from the appropriate Dean and faculty, the Committee will make a recommendation to the Vice President of Academic and Student Services, who will notify the student in writing of the decision.

If a student is denied further enrollment in a course, that student may not enroll in any other course for which the denied course is a prerequisite. For example, a student at DCC denied further enrollment in ENG 1, 3, 4, or 5 will not be allowed to enroll in an ENG course numbered 100 or higher.

Continuing Education and Workforce Services

Continuing Education and Workforce Services includes credit and non-credit courses and activities designed to meet occupational, professional, and personal interests and needs. These activities begin at various times throughout the year and vary in length according to need. Non-credit activities, by law, are self-supporting.

Continuing Education

Continuing Education includes special courses for college credit and non-credit activities for which the Continuing Education Unit (CEU) is awarded. These courses and activities are intended

primarily for adults who want to upgrade their technical skills, improve their employability, increase their earnings, acquire new skills, or meet educational requirements for job certification. For more information, call (434) 797-8430.

Community Services

Community Services includes non-credit activities for which Continuing Education Units (CEU's) are not awarded. They consist of courses in crafts, leisure-time activities, as well as exhibits and special community projects. For more information, call (434) 797-8430.

Center for Business, Industry, and Government (C-BIG)

Danville Community College has a vital interest in the economic development of its service region. Through its Center for Business, Industry, and Government, the College provides a wide variety of educational opportunities for companies and organizations. Services include on-campus or on-site tailored training programs; short courses, workshops, and seminars; high-tech training using state-of-the-art equipment; management and supervisory development training; basic skills training; teleconferencing; and use of College facilities for company-sponsored training. For more information, contact the C-BIG Director, or call (434) 797-8412.

Apprenticeship Training

Apprenticeship training is coordinated through Danville Community College in partnership with the Virginia Department of Labor and Industry. Apprenticeship is a voluntary training system which assists businesses and their employees with obtaining training in the technologies. Apprentices learn the "how to" of their occupation on the job and learn the "why" in related technical instruction taught in the classroom. For more information, contact the Apprenticeship Coordinator at (434) 797-8494.

Regional Center for Applied Technology and Training (RCATT)

The Regional Center for Applied Technology and Training (RCATT) serves as a catalyst to help stimulate regional economic growth. As a proactive educational partner, RCATT helps industries explore new technologies, adapt technology to their unique applications, and train the skilled workers necessary to maximize productivity so that area industries can be more competitive in the global marketplace. For more information, call (434) 773-3034.

Southern Piedmont Educational Opportunity Center

The Southern Piedmont Educational Opportunity Center is a federally funded grant program that provides free educational assistance to low-income adults and first generation college students. The EOC offers: assistance in completing admission and financial aid applications, information on G.E.D. programs and postsecondary institutions, career counseling and assessments, and academic advising. For more information about the SPEOC, call (434) 797-8577 or stop by the office located in the Learning Resources Center.

Workforce Investment Act One-Stop Center

The Workforce Investment ACT (WIA) One-Stop Center at Danville Community College is a federally funded program designed to provide employment related services and resources to clients in overcoming barriers to employment. The Center partners with community agencies to help meet the workforce needs of the community. The Center is dedicated to creating citizen access to career-related services. For more information, call (434) 797-8461.

Other Programs

Tech Prep

Tech Prep offers a secondary/postsecondary educational career path that provides avenues for

students to obtain a technical education, beginning in high school and continuing through college. If students choose the Tech Prep path, they have the option to enter the workforce after completing a technical degree/certificate/diploma program at DCC.

Tech Prep links academic and technical studies and uses input from business, industry, government, and the community in order to build a curriculum that leads to successful employment. Tech Prep students may be eligible to earn credit for work completed in high school under existing articulation agreements.

Students interested in Tech Prep options should consult their high school counselors and/or the Tech Prep Coordinator at (434) 797-8520.

Upward Bound

The Upward Bound Program at DCC is a federal pre-college program designed to assist economically disadvantaged students complete high school and to enter and succeed in postsecondary education. Upward Bound offers extensive academic instruction as well as counseling, mentoring, tutoring, a summer bridge program, and other support services. Students interested in Upward Bound should consult their high school counselor and/or DCC's Coordinator of Upward Bound at (434) 797-8562.

Old Dominion University TELETECHNET

TELETECHNET (TELEvised TECHNical NETwork) allows students to complete freshman and sophomore level courses at DCC and then continue with junior and senior level courses taught by Old Dominion University faculty live, via satellite, in a DCC classroom. Students view the professor on a television monitor and may ask questions using microphones at their tables.

ODU offers 18 bachelor degree options at DCC: business administration (accounting, finance, information systems, management, marketing), communications, computer science, criminal justice, engineering technology (civil, civil with a concentration in surveying sciences, computer, electrical, general, mechanical), nursing, human services counseling, interdisciplinary studies - professional writing and teacher preparation tracks, occupational and technical studies, health sciences (health care management, counseling).

ODU offers six master's degrees at DCC: elementary education (part of four-year program), middle school education, nursing, special education, community health, and occupational and technical studies. ODU also offers certificates in surveying, industrial training, and is a participant in an on-going statewide special education grant.

The TELETECHNET office and classrooms are located in the lower level of the Learning Resources Center. The ODU site director is available to assist students as they plan their course of study. Students are strongly encouraged to meet with the site director as early in their academic careers as possible because certain substitutions may be applicable to their program of study at DCC. For more information, call (434) 791-5334.

VA's Philpott Manufacturing Extension Partnership

Danville Community College is the site for an office of VA's Philpott Manufacturing Extension Partnership, which promotes economic growth in the southern Virginia region by helping smaller manufacturing firms recognize and achieve their full market potential. The Project Manager at DCC and the Center's staff of other engineering and manufacturing professionals across the state, are available to provide practical experience, objectivity, and hands-on services. For more information, call (434) 797-8411.

The Whittington W. Clement Learning Resources Center

The Whittington W. Clement Learning Resources Center (LRC) provides information and instructional support services for the college community. Centrally located on the DCC campus, the Learning Resources Center opened to students, faculty, and the community in October 1994. Housing the Library, Learning Assistance Center (LAC), Audio-Visual Services, and distance learning classrooms, the LRC incorporates the latest in educational technology to offer a unique mix of traditional and nontraditional resources for learning and teaching. Old Dominion University TELETECHNET is also located in the lower-level of the LRC. For more information, please call (434) 797-8404.

Library Services

The Library houses a collection of more than 68,000 items including books, non-print media, periodicals, government documents, and other materials to support the instructional programs of the College. In addition, a large collection of electronic resources are available including computerized online databases, CD-ROM databases, and access to the Internet. Audio-visual equipment is available for the preview of audio and video disk, and other instructional materials. The Southside Child Care Resource Center is the newest addition to the permanent collection. The Library offers strong reference support and the staff is committed to instruction in the use of resources, both on an individual and group basis. For more information on library services and information skills instruction, please call (434) 797-8555.

Learning Assistance Center

The Learning Assistance Center (LAC) is located on the upper level of the Learning Resources Center. The mission of this large multipurpose area is to provide support and resources for teaching and learning. An open computer lab is available for students, staff, and public users. Other services

include peer tutoring, make-up testing, testing for distance learning classes, and placement testing. Students are encouraged to use the LAC for group study. For more information, please call (434) 797-8404.

Audio-Visual Services

Located on the lower level of the building, this LRC component provides general audio-visual operation, maintenance, and repair services for the College.

Distance Learning

Coordinated through the Learning Resources Center, the Distance Learning Program gives students the opportunity to attend accredited college classes in a flexible way which fits individual schedules and lifestyles. The college employs sound and acceptable practices for determining the amount and level of credit awarded for courses, regardless of format or mode of delivery. Distance learning students use videos, textbooks, study guides, Interactive Television, and the Internet to complete their coursework and earn college credits at home or at convenient off-campus locations. Using communications technologies to deliver instruction, distance-learning courses are designed to provide the same quality and content as traditional classroom-based courses. The primary difference between traditional courses and distance-learning courses centers on the degree of freedom and responsibility the student accepts when taking a distance-learning course. For some, this aspect makes distance-learning courses an ideal way of continuing their education because it alleviates many time constraints and scheduling conflicts.

All distance learning courses have an assigned instructor. In addition, distance-learning students have access to the same learning resources and student services as do students enrolled in traditional courses. The institution employs sound and acceptable practices for determining the amount and level of credit awarded for courses, regardless of format or mode of delivery. For more information, please call (434) 797-8455.

Student Services

Counseling

As a service to current and prospective students, the College maintains a staff of professional counselors and faculty advisors who are committed to helping students with their academic, personal, career, and vocational plans. As part of this assistance, students are provided appropriate tests, inventories, college transfer information, and occupational/technical information regarding financial assistance or employment.

Testing

A well-planned testing program for students is coordinated by the Student Development staff. An appropriate placement test is required for all new students planning to enter one of the associate degree, diploma or certificate programs. This test is administered at the College, normally prior to registration. A student may retake the placement test after a five-year separation with exceptions made by the division dean.

Students with a documented disability should contact the Disability Services Counselor in the Counseling Office prior to taking the Placement Test. For more information on the College's testing services, please call (434) 797-8404.

Orientation

Orientation (STD 100) is a program/course designed to acquaint new students with the purposes and programs of the College. Orientation (STD 100) is a one-credit course that is mandated by the state for all students who are pursuing a degree, certificate, or diploma from the College. Students must pay for the course and will receive a grade for their participation and attendance.

Orientation includes a group orientation to the College and a discussion of student services and activities. At Orientation, students will meet with a faculty advisor in their program of study to plan a course of study, thereby registering students for their courses.

Prior to attending Orientation at DCC, the student **MUST** have taken the DCC Program Placement Test. DCC does **NOT** require the SAT or ACT. The student will then meet with a DCC academic counselor for an interview to discuss the student's educational interest and to plan the student's application for admission to a specific curriculum. Afterwards, the student will chose an Orientation Session to attend prior to the date classes start.

Students unable to attend an Orientation session are required to attend a one-credit orientation class. This class will meet only once to disseminate course materials. The course is independent study and the student will be required to complete a packet of information including: a multiple choice quiz, self assessment quizzes, a GPA quiz, and a short essay on him/herself. This course is listed as STD 100-50 in the schedule of classes and is offered in the Fall and Spring Semesters. STD 100-50 is convenient for evening students who may not be able to adjust their work schedules to attend a daytime Orientation session. The daytime Orientation sessions discussed above are **ONLY** offered prior to the beginning of the Fall Semester each year. Students beginning enrollment in the Spring Semester will enroll in STD 100-50 and complete an Orientation packet.

If you have questions about Orientation, please contact the Counseling Office at (434) 797-8460.

Consumer Information

Literature is available in the Student Development Office on the following areas: post graduate employment and college transfer success; curriculum retention and completion; related educational expenses; student rights and responsibilities; financial aid policies, procedures, and the award process.

Financial Aid

Danville Community College is committed in its belief that qualified students should have an opportunity to pursue educational objectives, regardless of financial resources.

Full-time and part-time students may qualify for financial aid. Classes may be taken in the day or in the evening.

To be considered for financial assistance, students must apply by completing the Free Application for Federal Student Aid and have the results submitted to the Financial Aid Office. In addition, the student must enroll in an eligible curriculum and make satisfactory academic progress in the program of study.

Contact the Financial Aid Office at (434) 797-8567 for more information and application forms.

Federal and State Financial Assistance Programs

Federal Work-Study Program

This program provides an opportunity for a student who shows sufficient financial need to work while attending college. Numerous jobs are available each year on campus. Some students are assigned to off-campus community service jobs.

Federal Pell Grant Program

Full-time and part-time students who are enrolled in eligible curricula may receive non-repayable aid under this program, provided they demonstrate financial need.

Federal Supplemental Educational Opportunity Grant Program

Students who show financial need may qualify for this program. This is a non-repayable grant.

Federal Family Education Loan Program

Students who do not receive sufficient grant aid to attend Danville Community College may request a student loan under this program. Request forms are available in the Financial Aid Office. Students who wish to apply for a Federal Student Loan must also apply for federal assistance by completing the Free Application for Federal Student Aid.

College Scholarship Assistance Program

The Virginia State Council of Higher Education provides grants under this program to students who will be enrolled in participating Virginia institutions, who have been Virginia residents for at least one year, and who demonstrate sufficient financial need.

Other State Grants

The Virginia State Council of Higher Education (SCHEV) provides funds through the Virginia Community College System to award to eligible students who are Virginia residents. The grant pays tuition for program-placed students enrolled for three, four, or five credits only.

Scholarships

DCC Scholarships are awarded through the College and the DCC Educational Foundation. Generally, only one application form is needed to apply for scholarships. The applications are available in the Foundation Office, Financial Aid Office, high school Guidance Counselors' offices, and on the Educational Foundation's website. The DCC Educational Foundation reserves right to limit the amount of each award to endowment's annual return from investments. Scholarship listings are based on information available February 2004. For more information contact the Foundation Office at (434) 797-8437. Information is also available on the Foundation's website on the DCC home page (www.dcc.vccs.edu).

Ahmed Children Scholarship

This scholarship is awarded to a full-time or part-time student who has enrolled for self-improvement with intention of completing a program or working on plans for a degree. The recipient must maintain a 2.5 or better GPA and have financial need.

American National Bank and Trust Company Scholarship

This scholarship was made possible by American National Bank and Trust Company. The award is made to an entering freshman who is enrolling full time in a two-year program at DCC. The same student will be given preference for the award during his/her second year. The student must demonstrate a clear commitment to completing the academic program in a timely manner and cannot be eligible for other types of financial assistance.

Ashby-Pryor Endowed Scholarship

This scholarship was established in memory of Fred James and Pernie Sizer Ashby and Claude Edison and Mary Early Pryor. It is awarded to a DCC student selected by the Scholarship Committee of the Danville Community College Educational Foundation in conjunction with the College Scholarship Committee. This scholarship will be awarded at the beginning of each Fall Semester to a student who demonstrates scholastic ability and good citizenship and enrolled in at least nine credit hours.

Barkhouser Endowed Scholarship

Richard and Kit Barkhouser established the Barkhouser Endowed Scholarship in 1998 to support a full-time freshman at DCC. The first year student must reside within the DCC service region or in Caswell County, demonstrate scholastic achievement, have at least a 2.50 high school GPA, and exhibit leadership potential.

Barksdale Honors Scholarship

The estate of Ms. Mary M. Barksdale endowed the Barksdale Honors Scholarship in 2000. DCC graduates who are transferring to accredited four-year colleges or universities must be considered by the College as "most likely to succeed." The recipients must have compiled exceptional records, both in academics and in extracurricular activities and displayed leadership qualities on campus or in the community which influence positively the actions of others.

Barksdale - Rorrer Study Abroad Endowed Scholarship

The Barksdale-Rorrer Study Abroad Endowed Scholarship was established by Ms. Mary M. Barksdale, a DCC librarian until her retirement. The purpose is to enable DCC students to experience the culture and history of other countries thus broadening and promoting international understanding. The scholarship also honors DCC history professor, Kinney Rorrer. Consideration for the scholarship include financial need and academic achievement. Students must take the study-tour as a credit course. Applications are available from Mr. Kinney Rorrer in the History Department.

O. T. Bonner Memorial Scholarship

The O. T. Bonner Memorial Scholarship was established in 1996 by Dr. John Bonner in memory of his father, O. T. Bonner, an educator who served as the first chair of the Danville Community College Board. The award is presented to a full-time student at DCC.

Bucknam Scholarship

The Bucknam Scholarship, created in 1999 by Gregory and Tracy Bucknam and given in memory of Ms. Mary Barksdale, is an annual award. The recipient must be a resident of Patrick Henry Boys Home, have graduated from high school during the same year in which the first scholarship award is received (current graduate),

have maintained at least a 2.50 GPA during high school, and be enrolled full-time in any program at DCC. If the recipient maintains at least a 2.50 GPA at DCC during the first year, the student will be eligible to receive the Bucknam Scholarship for the second year.

Elizabeth B. Bustard Endowed Scholarship

The Elizabeth B. Bustard Endowed Scholarship award is made to a full-time freshman who is committed to high ideals and demonstrates leadership and good citizenship. Scholastic achievement of at least a 3.00 GPA is the final criterion for this award.

James Bustard Endowed Scholarships

These scholarships, established in memory of James Bustard, a friend of the College, are presented annually to graduating DCC students who plan to transfer to an accredited four-year college or university. Other award criteria include commitment to high ideals, leadership, good citizenship and scholastic achievement.

Alexander Berkeley Carrington, Jr. & Ruth Simpson Carrington Charitable Trust Scholarships

The Carrington Charitable Trust Scholarships are awarded to two full-time students who demonstrate a commitment to completing the academic program in a timely manner and who have financial need.

James T. Catlin, Jr. - Kiwanis Scholarship

The James T. Catlin, Jr.-Kiwanis Scholarship is presented to a student who has completed two years at DCC, who is a legal resident of Virginia Community College Region Number 12, and who is transferring as a full-time student to a senior institution in pursuit of a baccalaureate degree. The purpose of the award is to recognize scholarship, to further the educational develop-

ment toward leadership and citizenship of DCC students and to honor the memory of James T. Catlin, Jr. The scholarship recipient is selected by a Danville Community College Scholarship Committee with the approval of the Board of Directors of the Kiwanis Club of Danville, Virginia. The basis of selecting the recipient shall be: (1) financial need, (2) scholastic achievement, (3) leadership, and (4) citizenship.

Chatham Rotary Club Scholarship

The Chatham Rotary Club Scholarship is available to a student who is a resident of Pittsylvania county and enrolled full-time at DCC. The selection is based on academic merit and financial need.

Child Abuse Prevention Team Scholarship

Funds have been provided by the Danville Pittsylvania County Mental Health Association to assist with book and tuition costs of individuals who are working in the field of child care and who desire more knowledge and training in the child care curriculum. Eligible applicants include day care workers, home care providers, and foster parents. This award is for full-time or part-time students who may not qualify for other financial aid.

CIT Group/Factoring Scholarship

The CIT Group/Factoring Scholarship is awarded to a full-time rising sophomore from the DCC service area. The student must demonstrate evidence of financial need, academic promise, and leadership potential and cannot be receiving other financial assistance from the CIT Group.

Climate Control, Inc. Endowed Scholarship

The Climate Control, Inc. Endowed Scholarship was established by the company's Board of Directors and Mr. John Cannon. Preference is given to children of employees of Climate Control, Inc. and then to Halifax County residents. To be eligible, a student must be enrolled full-time in a

degree, diploma, or certificate program. The award is renewable for a second year, provided the recipient maintains a 2.50 GPA and reapplies.

College Board Academic Excellence Scholarships

The Danville Community College Board has established two-year, full tuition scholarship to be awarded annually at each of the area's six public high schools. Eligibility will be based solely upon the class rank: the top five students at George Washington High School and Halifax County High School; and the top two graduates at Chatham, Dan River, Greta, and Tunstall High Schools. Information about these scholarships can be obtained from the respective high school Counseling Offices.

College Board Recognition of Achievement Scholarships

The Danville Community College Board has established scholarships to be awarded to a graduate of each of the six public high schools in the College's service region. The recipient of each award is recommended by the high school on the basis of academic potential and not financial need. These scholarships are awarded annually.

Corning Incorporated Endowed Scholarship

The Corning Incorporated Endowed Scholarship is presented each year to a rising sophomore who has demonstrated academic excellence. The recipient must be a full-time student (12 credit hours) enrolled in Electronics, Information Systems Technology, or Accounting.

The Daniel Group Scholarships

The Daniel Group Scholarships were established in 1997 by The Daniel Group and its subsidiary companies: John W. Daniel & Company, Inc., Southeastern Associates, Inc., General Development Company, Inc., and Riverside Equipment Co. The award provides scholarships for tuition, books, and fees to students who are residents of

Danville or Pittsylvania County and who demonstrate need and academic promise. Preference is given to students in technical programs, particularly engineering, drafting and design, air conditioning (HVAC), and electronics.

Danville Kiwanis Club Scholarship

The Danville Kiwanis Club Scholarship will provide awards for each of the two years a student is enrolled. The award covers tuition and books to a full-time or part-time DCC student who demonstrates financial need, scholastic ability, and good citizenship.

Danville Lions Foundation Endowed Scholarship

The Danville Lions Foundation Endowed Scholarship was established for full-time or part-time students who demonstrate visual or hearing impairments or other disabilities. The award(s) may be made for tuition, books, and fees. Tuition assistance is also available through the Danville Lions Foundation Endowment to train local teachers in sign language and other communications skills for the hearing impaired.

Danville Virginia Tech Alumni Scholarship

The Danville Virginia Tech Alumni Scholarship is presented annually to a graduating DCC student who plans to transfer to Virginia Tech as a full-time student. The award is based on commitment to high ideals, leadership, good citizenship, and a GPA of 3.00 or better in the graduate's curriculum.

Davenport Scholarship

The Davenport Scholarship was established by Mr. and Mrs. Ben Davenport, Jr., to benefit the child of an employee of Banister Bend Farms, Chatham Communications, Chatham Oil Company, Chatham Security Inc., Davenports, First Piedmont Corporation, or Piedmont Transport. The student must be enrolled in a degree, diploma, or certificate program; and the

basis of selection will be: scholastic achievement, financial need, and good citizenship. In order to receive the scholarship for a second semester, the student must maintain a 2.50 GPA for the first semester. The amount of the award will not exceed tuition for 16 hours per semester.

DIMON Incorporated Endowed Scholarship

Funded by DIMON Incorporated in 2000, the endowed scholarship is given to a full-time student who is in good academic and social standing with the college. Preference is given to students who are dependents of full-time employees of DIMON Incorporated.

Excelsis Research Scholarship

Mr. John Primiano, CEO of Excelsis Research, Inc., established this award in 1994 as the Danville Community College Science Scholarship. Two full-time students majoring in Science who demonstrate scholastic ability, financial need, and good citizenship will receive a scholarship.

Stephanie Ferguson Memorial Scholarship

Created in memory of Ms. Stephanie Ferguson by her parents and friends in 1991, the scholarship was first awarded in 2000. The recipient must be a current graduate of Dan River High School, maintain at least a 2.50 GPA, enrolled as a first-year student in the Child Development, Liberal Arts, or Science program, participated in extracurricular activities during high school exemplifying leadership, and exhibited a great determination to succeed.

John Carlyle Forney Memorial Scholarship

In 2001, Mrs. Ronda Forney established the John C. Forney Memorial Scholarship in memory of her husband. Mr. Forney taught in the Precision Machining Technologies program at Danville Community College from 1974 until

his retirement in 1991. The award will be given to a full-time student who is enrolled in the Engineering and Technologies Division who has maintained a 3.00 GPA.

Thelma E. Forney Endowed Scholarship

The Thelma E. Forney Endowed Scholarship has been established as a memorial to a deeply respected individual who was employed at Danville Technical Institute and Danville Community College for 27 years. The scholarship is awarded to a full-time student in the Administrative Support Technology Program, or in any other diploma-certificate program at DCC. Selection is based upon potential ability and financial need.

Archer T. Gammon Chapter #19 Disabled American Veterans/Sgt. Kenneth Gentry Memorial Scholarship Fund

The Archer T. Gammon Chapter #19 Disabled American Veterans has established the Sgt. Kenneth Gentry Memorial Scholarship Fund. Sgt. Gentry was killed in action while serving in Iraq in 1991. Each recipient will be selected in accordance with the following criteria:

- The recipient shall be enrolling at DCC, shall be a disabled American veteran, and maintain at least a 2.00 GPA.
- The financial circumstances of the applicant shall be such that the scholarship aid is necessary to the beginning and continuance of his/her education in college.
- The student will be able to demonstrate a record of good citizenship and a strong belief in the American (U.S.) form of government.

Roy and Joan Gignac Endowed Scholarship

This scholarship is provided for a second-year student enrolled in electronics. If no candidate meeting this criterion is available, then the schol-

arship may be awarded to a student enrolled in Marketing or Business Administration. The student must also be a resident of Danville or Pittsylvania County, and preferably have a brother or sister who is attending an accredited institution of higher education as a full-time student. A 2.80 GPA in the curriculum is required for each of the two semesters that the scholarship is utilized. The scholarship must be used within twelve months of the date it is awarded and can only be used for tuition and fees. The student must demonstrate a clear commitment to completing the academic program in a timely manner and have a record of good citizenship.

Governor's School/Dual Enrollment Scholarship

The Governor's School/Dual Enrollment Scholarship is awarded to a student who was a Governor's School or dual enrollment student while attending high school.

Walter L. and E. Stuart James Grant Memorial Endowed Scholarships

The scholarships are awarded to children and immediate family members (defined as living in the same household) of Danville Register & Bee employees. In the event that there are no applicants from immediate family members of employees, then consideration will be given to a current Danville Register & Bee carrier in good standing or the spouse, son, or daughter of a current carrier (good standing to be determined by the Danville Register & Bee) or former who gave up a route in good standing. To receive the award, the recipient must agree to assist in the Estelle H. Womack Museum of Natural History for three hours per week. The full-time student must show evidence of financial need and the ability to successfully complete college-level academic requirements. Recipients are eligible to reapply for successive years.

Norman D. Haar Endowed Scholarship

The Dr. Norman D. Haar Endowed Scholarship has been established in memory of an exceptional DCC Professor of Psychology. In order to be eligible, a student must have successfully completed Developmental Studies requirements and entered his/her chosen curriculum.

Halifax Dental Hygiene Scholarship

This scholarship was made possible by a group of dentists from the Halifax County Community. The award is made to second-year students in the Dental Hygiene Program at DCC. The recipient must have maintained a minimum of a 3.0 GPA during the first year and be a resident of Halifax County.

Hancock Dees -Murray-Sacred Heart Church-School Scholarship

The Hancock Dees-Murray-Sacred Heart Church-School Scholarship was established in 1996 by Pat and Cathy Daly in honor of Marguerite "Eddie" Hancock, former principal of Sacred Heart School. The scholarship is awarded to a Sacred Heart School Alumnus, a member of Sacred Heart Church, or a resident of the City of Danville, Virginia who demonstrates financial need or is no longer receiving parental support.

Rebekah L. Heldreth Memorial Scholarship

The Rebekah L. Heldreth Memorial Scholarship has been established in memory of an exceptional young lady. In order to be eligible, the recipient must be a female senior graduating from Chatham High School who has achieved a 3.0 GPA for her senior year in high school and has academic promise with a commitment to complete college, maintained high moral character, demonstrated concern for others, high ideals, good citizenship, and possess leadership qualities, participated in community service, demonstrated financial need and enrolled full-time in the transfer Science program of study.

International Association of Administrative Professionals (IAAP) Scholarship

The DCC Chapter of IAAP awards scholarships for members who are returning full-time Administrative Support Technology or Office Information Processing students. Selection will be made by the IAAP Scholarship Committee based on the highest GPA attained by current members.

Intertape Polymer Group Scholarships

The Intertape Polymer Group Scholarships provide awards to children of employees of Intertape Polymer who are enrolled in a degree, diploma, or certificate program. The recipients must demonstrate scholastic achievement, financial need, and good citizenship.

Thelma Swann Johnson Memorial Endowed Scholarship

The Thelma Swann Johnson Memorial Endowed Scholarship was established in 2001 in memory of his wife, Thelma Swann Johnson. The scholarship will be awarded to a sophomore who has maintained a 3.00 or better GPA and has enrolled full-time in a two-year program. The recipient must have participated in multiple activities during the first year at DCC, exemplified leadership within the community and at the College, and exhibited great determination and will to succeed.

Nathan Lester Excellence Endowed Scholarship

The Nathan Lester Excellence Endowed Scholarship has been established by The Lester Family. The award will be made to a goal-directed, motivated young person who has displayed a positive sense of excellence in art, music, or another academic arena. The recipient should be someone who might be unable to attend college without some financial assistance.

Mildred Smoot McCall/SHS of '45 Memorial Endowed Scholarship

Established in August 2002 by Robert McCall in memory of his wife, this scholarship will be awarded to a first or second-year student who has maintained at least a 2.50 GPA while in high school and during the first year at DCC. The recipient is enrolled in either full-time or part-time as a program-placed student in a transfer program.

McGovern Endowed General Excellency Award

The McGovern Endowed General Excellency Award is presented each year at graduation. The scholarship is the result of a gift by Dr. and Mrs. Francis H. McGovern of Danville, Virginia. The recipient of this award will be a student who has completed two years at Danville Community College; has fulfilled the requirements of an Associate in Arts and Science Degree; is a legal resident of Virginia Community College Region Number 12; and is transferring to a senior institution in pursuit of a baccalaureate degree. The purpose of this award is to recognize scholarship and to further the educational development toward leadership and citizenship of Danville Community College students. The basis for selecting the recipient shall be: (1) scholastic achievement; (2) leadership; (3) citizenship.

McGovern Endowed Honor Scholarships

The McGovern Endowed Honor Scholarships are the result of a gift by Dr. and Mrs. Francis H. McGovern of Danville, Virginia. The scholarships will be awarded to a full-time associate degree student and a full-time diploma student who have completed their first year and are remaining at the College to complete requirements. The recipients must be legal residents of the district served by the College. Selection is based on (1) scholastic achievement, (2) leadership, (3) citizenship, (4) financial need, and (5) ability to complete the degree or diploma program within the number of terms normally required of full-time students.

James R. Meissner, II Memorial Scholarship

The James R. Meissner, II Memorial Scholarship was established by Mrs. Judith Meissner in January 1998 in memory of her husband who was a long-time faculty member in the Precision Machining Technology program. The scholarship will be awarded to a full-time freshman or sophomore who is enrolled in the Precision Machining Technology program and who has maintained at least a 3.00 GPA.

Clyde and Joyce Midkiff Endowed Scholarship

The Clyde and Joyce Midkiff Endowed Scholarship is awarded to a graduate of Gretna Senior High School, enrolling full-time at Danville Community College. The award is applicable to tuition and books in the academic year in which the award is made. The award is based on financial need.

Ethel C. Mitchell Memorial Foundation Scholarship

The Ethel C. Mitchell Memorial Foundation Scholarship was established at DCC in 2002. The scholarship will be awarded to two first-year students at DCC who have maintained a high school GPA of at least 2.50; have enrolled in Public Service, Child Development, or a Liberal Arts program; have demonstrated financial need; and have performed at least one year of community service, either school-sponsored or community-based. Preference will be given to residents of the Almagro and surrounding communities in Danville.

Ann and Frank Mobley Endowed Scholarship

The Ann and Frank Mobley Endowed Scholarship is presented to an incoming full-time student from Pittsylvania County, with preference being given to a Tunstall High School student. Need, scholastic achievement of at least a 3.00 GPA for the last year in school, academic promise, and good citizenship are among the criteria for selection.

Robert E. Morgan Memorial Endowed Scholarship

The Robert E. Morgan Memorial Endowed Scholarship was established in memory of Robert E. "Bob" Morgan, a long-time professor of Electrical/Electronics at Danville Technical Institute and DCC. The award will be made to a student in the Electrical/Electronics curriculum who shows potential for successfully completing the program and does not qualify for other financial assistance.

Lyle Carter Motley, Sr. Endowed Scholarship

The Lyle Carter Motley, Sr. Endowed Scholarship was established in memory of Lyle C. Motley, a broadcaster of WMNA in Gretna, VA. The award will be made to a student who has graduated from any Pittsylvania County High School. The recipient must be enrolled in the Electronics program and have maintained at least a 3.0 GPA during high school or during the first year at DCC. Preference will be given to a student who is interested in working in the communications field such as radio or television.

Vera B. Murphy Memorial / John M. Langston High School Reunion Committee Scholarship

This scholarship was established in memory of a former Danville principal and educator, Vera B. Murphy. The award will be made to a graduating high school senior who will enroll full-time at DCC, has maintained a 2.5 or better GPA, and resides in Danville, Pittsylvania County or Halifax County.

Kenneth L. Neathery Memorial Endowed Scholarship

The Kenneth L. Neathery Endowed Memorial Scholarship has been established at DCC to provide students with educational opportunities. Mr. Neathery devoted many years of service to the College. His deep concern for students and

his belief in the worth of each individual guided his every action. This scholarship shall be awarded to a full-time program-placed business student at DCC. The scholarship may be awarded to a student in any curriculum who demonstrates scholastic achievement and a commitment to high ideals.

Lawrence Olds Memorial Endowed Scholarship

The Lawrence Olds Memorial Endowed Scholarship was established as a living tribute to an individual dedicated to the education of the community. The scholarship will be awarded annually to a student who demonstrates academic potential and good citizenship.

Rexford E. O'Neil Endowed Scholarship

The Rexford E. O'Neil Endowed Scholarship, named in memory of DCC's long-time registrar, is awarded to an entering freshman enrolled full-time in an associate degree or diploma program. The award is restricted to tuition and fees. The recipient should be a student who does not qualify for other types of financial assistance and shows promise of educational success.

Peoples Mutual Telephone Endowed Scholarship

The Peoples Mutual Telephone Endowed Scholarship is awarded annually and may be used for tuition and fees. The recipient shall be selected in accordance with the following criteria:

- Up to six semesters and three summer sessions provided the student maintains at least a 2.50 GPA, has entered a curriculum, remains in the program, demonstrates good citizenship, and reapplies annually.
- If no candidate qualifies under the above, then the scholarship shall be awarded to a student who has resided in the Peoples Mutual Telephone service area for one year prior to the award.

Peoples Mutual Telephone Company, Inc. - Tech Prep Scholarship

Peoples Mutual Telephone Company, Inc. an independent telephone firm located in Gretna, Virginia, expanded its scholarship endowment in 1998 in order to provide a scholarship for a graduate of the Tech Prep Program who has maintained at least a 2.50 GPA and who will continue his/her education at DCC. Preference for the scholarship will be given to a Gretna High School student or to a student from Pittsylvania County.

Pilot Club of Danville, Inc. Scholarship

In 1995, the Pilot Club of Danville, Inc. established an annual award for a full-time or part-time student who demonstrates financial need and resides in Danville or Pittsylvania County.

Shirley Day Primiano Scholarship

The Shirley Day Mayhew Scholarship has been established by Dr. Shirley Day Mayhew and the award may be used for tuition and books to a full-time or part-time student. The selection of the recipient will be based upon financial need, scholastic ability, and good citizenship.

Printing Excellence Scholarship

In 2001, an anonymous donor established a scholarship which will be awarded each semester to a second-year student enrolled in the Graphic Imaging Technology program who has financial need, has maintained a 2.50 or better GPA, and exhibits academic promise in the printing field.

Sandra Lee Riddle/RACO Endowed Honor Scholarship

This scholarship shall be awarded to a graduate of Greta Senior High School or someone who has lived within ten miles of Gretna for five years. The award may be used for tuition and books in the academic year the award is made.

The recipient must be a full-time student entering a curriculum at DCC. Preference will be given in the following order: (1) a student planning to enter a registered nursing program; (2) a business student; (3) a student in other programs. In order to use this scholarship for a second semester; a full-time student must earn at least a 2.50 GPA for the first semester of the scholarship.

Rippe Endowed Scholarship for Women in Science and Business

Established in 1992 by Rippe's and Ben Rippe, this scholarship is awarded to a full-time female student enrolled in college transfer and majoring in business or science. Selection of the criteria is based on the educational ability of the student.

Riverdan Benevolent Fund Endowed Scholarship

The Riverdan Benevolent Fund Endowed Scholarship has been established for Dan River Inc. employees and their dependents. The award may be used for tuition, books, and fees in the academic year in which the award is made. Length of continuous employment at Dan River Inc. is a factor in determining eligibility. This award is also available to sons, daughters, and spouses of deceased employees, who at the time of death had three or more years of continuous service.

Riverview Rotary Club Scholarship

The Riverview Rotary Club Scholarship will be awarded to a first or second-year student who shows scholastic ability and good citizenship. The student must be enrolled at least half-time.

Roberts-Hunt Endowed Scholarship

The Roberts-Hunt Endowed Scholarship is awarded to a student who is a resident of South Boston or Halifax County, and is made possible by a gift of Dr. and Mrs. Lucien W. Roberts.

James A. Robertson Scholarship

The James A. Robertson Scholarship was established through the generosity of James and Ann Robertson in 1992. Upon Mr. Robertson's death

in 2001, the scholarship became active with the first award made in 2002. Multiple scholarships will be awarded annually to students who have financial need.

Schoolfield High School Reunion Committee Endowed Scholarship

Members of the Schoolfield High School Reunion Committee established this award in 2001 through the generosity of its members and the alumni of Schoolfield High School. The scholarship will be awarded to a current high school graduate who has maintained at least a 3.00 GPA while in high school, has financial need, has been involved in community and school-related activities and demonstrated leadership potential. The student may be enrolled in any DCC program either full-time or part-time.

Wendell O. Scott Memorial Scholarship

The Scott family and the Wendell Scott Scholarship Foundation initiated the Wendell O. Scott Memorial Scholarship fund in 1994 with the first academic award presented in 1999. The award is given to a student enrolled in the automotive/auto body program or a related technical program. The student must maintain at least a 2.50 GPA and have athletic potential.

Claude I. Slayton, Jr./FOP Memorial Scholarship

This scholarship was established in 2002 by the Fraternal Order of Police of Danville, Inc., (Lodge #36) in memory of Claude I. Slayton, Jr. who was a graduate of DCC's Administration of Justice program, former FOP Lodge #36 president, and a 26-year veteran of the Danville Police Department. The award will be given to a rising second-year student in the Administration of Justice curriculum who has maintained at least a 3.00 GPA during the first year and has demonstrated high academic performance. The recipient must also possess high moral character; demonstrate good citizenship; and exhibit leadership potential.

Obra E. and Shirley J. Spangler Endowed Scholarship

The Obra E. and Shirley J. Spangler Endowed Scholarship Fund was established in 1996. A recipient must be enrolled in the printing program; have maintained at least a 2.50 GPA; and have demonstrated good citizenship through community involvement.

Stendig-Miller Family Endowed Scholarship

Stendig-Miller Family Endowed Scholarship was established by Mr. & Mrs. Joseph Stendig and the late Mrs. Minnie Miller. It is awarded annually to a student entering DCC, enrolled full-time or part-time in a program. The award is to be used for tuition and books. Selection is determined by financial need and the student's strong commitment to acquiring an education.

Christopher Daniel Turner Scholarship

The Christopher Daniel Turner Scholarship was first awarded in 1997 in memory of an outstanding young man who died tragically during his military service. The award was established by his parents and provides for tuition, books, and fees. The scholarship is given to a student who has been a Law Enforcement Explorer in Post 911, Danville, Virginia for at least six months, resides in Danville or Pittsylvania County, and is enrolled or enrolling in the Administration of Justice program. The recipient must demonstrate financial need and have a GPA of at least 2.50.

Luther R. Vaughan Memorial Scholarship

The Luther R. Vaughan Memorial Scholarship was established by Mr. Vaughan's widow, Jane, and daughter, Valerie. Mr. Vaughan was a 1962 graduate of the Electrical/Electronics program at Danville Technical Institute. The scholarship will be awarded to a full-time second-year student who is enrolled in the Electrical/Electronics pro-

gram; has maintained a 2.50 GPA in high school or in the first year of the program; is committed to acquiring an education; and has demonstrated good citizenship ideals.

Jean Harper Vernon Scholarship

The Jean Harper Vernon Scholarship was first awarded in 1996 by Main Street United Methodist Church in honor of Mrs. Vernon's dedication to using musical talent as a ministry. Since that time, Mrs. Vernon and her husband, Melvin, have continued to provide the award for DCC students who have an interest in choral direction or sacred musical performance. Preference will be given to a student from the service region who plans to complete a four-year degree.

Virginia Bank and Trust Company Endowed Scholarship

Established by the Virginia Bank and Trust Company, this tuition scholarship is presented to a rising sophomore who has completed 30 semester hours in Business Management or Marketing at DCC. The student is required to have a 2.75 GPA or above, reside in the Danville area (within 30 miles of the main office of Virginia Bank and Trust Company), and be taking at least 12 credit hours. The award will be based on need, scholastic ability, and good citizenship.

Jack I. White Endowed Scholarships

The Jack I. White Endowed Scholarships were established by a bequest from the estate of Miss Annie E. White in memory of her sisters, Miss Elizabeth H. White and Miss Juliette I. White. Recipients must be graduates of Dan River High School who demonstrate financial need and sufficient aptitude and commitment to complete a college education. One or more full tuition scholarships will be made each year. Announcement of the recipient(s) will be made at the Dan River High School Commencement.

Whittle Family Endowed Scholarship

The Whittle Family Endowed Scholarship, established by Mr. and Mrs. Henry D. Whittle, Jr., is an award for tuition and books. Selection of the recipient is based on need, scholastic ability, and good citizenship.

Wilkins & Co. Realtors Scholarship

Mr. Hampton Wilkins with Wilkins & Co. Realtors created the scholarship in 1999 to recognize a rising sophomore enrolled in the Marketing program who demonstrates academic ability and has maintained a 2.50 GPA. Wilkins & Co. Realtors also funds four students to take the Virginia Real Estate Licensing Exam.

Plumer Wiseman Endowed Scholarship

The Plumer Wiseman Endowed Scholarship was established in memory of Mr. Plumer Wiseman, a dedicated volunteer at the Estelle H. Womack Museum of Natural History, by the John James Westbrook Society and the DCC Educational Foundation. The purpose of the award is to provide an opportunity for a full-time student to receive tuition assistance in return for working at the Museum three hours per week. The student must have at least a 2.50 GPA in the major field and be working towards a degree, diploma, or certificate.

Woodward Scholarship

The Woodward Scholarship will be awarded to a high school senior who has overcome obstacles in order to graduate and obtain a high school diploma. The recipient must have potential for success in post secondary education and future work; enroll in any certificate, diploma, or degree program at DCC; and maintain at least a 2.00 GPA while enrolled at DCC. Recommendations will be solicited from the Regional Alternative Schools in Halifax County and Danville/Pittsylvania County, the Southside Regional Group Home in

Halifax; Patrick Henry Boys Home; and the directors of Social Services in Danville, Halifax County, Pittsylvania County, and Farmville.

Garland M. Wyatt Endowed Scholarship

The Garland M. Wyatt Endowed Scholarship is presented to a student enrolled in a business-related curriculum at DCC who demonstrates financial need.

James B. Wyatt, Jr. Memorial Scholarship

The James B. Wyatt, Jr. Memorial Scholarship was established by Mr. Wyatt's widow, Gayle, and their daughter, Laura. The award serves as a means of continuing Mr. Wyatt's interest in educating the youth of this community and his desire to improve the lives of disadvantaged individuals. An award will be made to a full-time or part-time student enrolled in the Administration of Justice curriculum.

Wyatt-Benton Endowed Scholarship

The Wyatt-Benton Endowed Scholarship was established by Landon and Kathryn Benton Wyatt in memory of their parents. The award is made to a rising sophomore, based on need, scholarship, and good citizenship.

L. Wilson York Endowed Memorial Scholarship

The L. Wilson York Endowed Memorial Scholarship was established as a tribute to an outstanding member of the community who placed a high value on education. Mr. York served on the DCC Educational Foundation Board as treasurer, and was a member of the Scholarship Committee. The award is presented to a student who shows academic promise regardless of financial resources.

Other Programs

Other financial aid assistance and options may be added throughout the year. Students are encouraged to regularly contact the Financial Aid Office, the Educational Foundation Office, or check the DCC webpage (www.dcc.vccs.edu) for information on such programs and/or scholarships.

Full-time Academic Status

Official enrollment for each semester must be 12 semester hours or more, not audit, to permit certification of full-time student status for Veterans Administration or Social Security benefits, and most other purposes.

Veterans

Programs and courses of study at Danville Community College are approved by the State Department of Education for payment of veteran's benefits. Applications for the G.I. Bill are available from the Admissions Office in the Wyatt Building. Applications for benefits may be returned to the Admissions Office. Call (434) 797-8420 for more information.

Career Services

The College maintains a Career Services area in the Admissions/Counseling Office for students who desire to secure part-time or full-time employment while attending college, during vacation, or after graduation. Occupational information on job requirements and opportunities is also provided. There is also a Job Placement website for students and employers. Students can post their resumes on the website. Employers can post job vacancies and review students' resumes. The site is found on the DCC website at www.dcc.vccs.edu/jobs.

Full-time Employment

The College maintains continuous contact with the State employment service, business, industry, the professions, and government for the latest information about jobs. Prior to graduation, students may interview with potential employers

who recruit on campus. The Career Placement Service also provides assistance with the ethics and techniques of interviewing. For more information, contact the coordinator at (434) 797-8520.

Part-time Employment

The Career Placement Office assists students in securing employment while enrolled in school. An effort is made to advise students of jobs which may relate to their college programs. The experience gained will assist them in finding permanent and satisfying positions. Students should limit themselves to approximately 15 hours per week if they are enrolled full-time. Call (434) 797-8520 for information.

Student Activities

The student activities program is designed to provide a variety of meaningful educational, cultural, and social experiences. Programs may include the following activities: student government, publications, intramural and extramural (club sports such as baseball) athletics for men and women, dramatic activities, departmental clubs, and special interest groups as approved by the College. All of the activities have a staff advisor or sponsor.

Official recognition is given only to scholastic, civic, athletic, professional and religious clubs and organizations which have been approved by the Student Government Association and the Director of Student Development and Enrollment Management. Should a sufficient number of students desire a particular activity, they must petition the Student Government Association for official recognition.

Student Handbook

A student handbook is available to provide additional information of interest to students. The handbook describes student activities and organizations and also lists the College rules and regu-

lations. All new students will be given one when they register. Students are bound by the policies set forth in the Student Handbook.

Student Conduct

Each individual is considered a responsible adult, and it is assumed that men and women of college age will maintain standards of conduct appropriate to membership in the College community.

Failure to meet standards of conduct acceptable to the College may result in disciplinary probation, depending upon the nature of the offense. The Student Handbook includes the complete College Initiated Code of Student Conduct and Discipline and explains the channels of communication available to students.

Senior Citizen Tuition and Fees Waiver

The Senior Citizens Higher Education Act of 1974, amended in 1977, 1982, and 1989, has established specific fee waiver provisions for Virginia residents who have reached 60 years of age and wish to attend classes at a State-supported institution of higher education.

1. To be eligible for free tuition and fees for CREDIT COURSES, part-time or full-time, a person must meet the following criteria:
 - be 60 years of age or older;
 - be a legal resident of Virginia;
 - had a taxable income not exceeding \$15,000* for Federal income tax purposes for the year preceding the year in which enrollment is sought; be admitted to the College as a student.
2. To be eligible for free tuition for AUDIT OF CREDIT COURSES or for taking NON-CREDIT COURSES (not to exceed three courses per term), a person must meet the following criteria:
 - be 60 years of age or older;
 - be a legal resident of Virginia;
 - be admitted to the College as a student.

Any senior citizen planning to enroll at the College should contact the Office of Admissions and Records when registering for classes under the tuition waiver program. Paragraph 23-38.56 of the Senior Citizens Higher Education Act states in part "...a senior citizen shall only be admitted to a course in which enrollment is sought after all tuition paying students have been accommodated." If eligible senior citizens wish to enroll in a course free of charge, they must wait until after the registration period for tuition paying students is over and then register on a space available basis. If they wish to reserve a place in a class, they are welcome to register in the same fashion as any fee-paying student. In doing so, the refund policy of the College shall apply the same as for any fee-paying student.

Note: *Income restriction subject to change. Contact the Admissions Office for more information.

Waived Tuition

Section 23-7.1 of the Code of Virginia provides that free tuition for State-supported institutions be granted to children of: (1) deceased or permanently disabled veterans of the armed forces, or (2) prisoners of war or persons missing in action; or (3) persons who have been killed in the line of duty while employed or serving as a law enforcement officer, a fire fighter, or a member of a rescue squad. To be eligible for such aid, the student must be between the ages of 16 and 25, and the parent must have met certain State residency requirements.

If you are eligible for the waiver of tuition and required fees under items (1) or (2) above, you must present a letter of certification from the State Division of War Veterans' Claims to the Vice President of Financial and Administrative Services before tuition can be waived. Requests for applications should be directed to the Director, Division of War Veterans' Claims, Commonwealth of Virginia, 210 Franklin Road, S.W., Roanoke,

VA, 24011. If possible, applications should be submitted at least four months before the expected date of matriculation.

If you are eligible for the tuition waiver under item (3) above, you must provide certification from the chief administrative officer of the law enforcement agency or the State Fire Marshall that the deceased parent was employed or serving as a law enforcement officer or fire fighter or a member of a rescue squad and was killed in the line of duty. This certification must be submitted to the Vice President of Financial and Administrative Services so that a determination can be made on the request for free tuition and required fees.

Bookstore

DCC's Bookstore is operated for the convenience of the students, faculty, and staff. Operating hours are posted each term.

The bookstore offers a variety of products including books; supplies; and discounted computer items such as software, hardware, and other peripherals. The Bookstore also sponsors a monthly Student Spotlight and an Excellence in Academics Scholarship.

Return and Refund Policy

Cash register receipts must be submitted for refund. All refunds are made by check. The refund will be mailed within two weeks after the item is returned. New books and related materials must be in new, resalable condition to obtain a refund. Names should not be written in books until the student is sure he/she will remain in the class. Receipts are required for state audit purposes. If a receipt is unavailable, exchanges will be permitted for equal value.

Textbooks

Textbooks may be returned for a refund until the last day of the add/drop period. An official drop form along with the dated bookstore receipt is required.

General Books

General books such as trade paperbacks, hardcover fiction, and non-fiction are non-refundable.

Calculators and Electronics

Refunds on calculators are not available. Defective items are not replaced after 30 days of purchase. Merchandise must be returned with its carton, related product materials (instructions, warranty, etc.) and the dated sales receipt.

For defective merchandise purchased and held for more than 30 days, the manufacturer or local service outlet must be contacted directly.

Computer Software

Computer software that is in its original shrink wrap and is the current version may be returned within seven days of the purchase date. No refund if opened.

General Merchandise

All merchandise purchased from the bookstore other than the above is non-refundable. Defective merchandise will be exchanged for like items.

Used Books

The Bookstore purchases and resells used books to provide more reasonable prices for students. Buy-back dates are posted around the campus prior to each book-buy.

The Knights' Armor

The Knights' Armor, located at the Taylor Building, is a convenience store which sells beverages, snacks, and paper supply items. Operating hours are posted each term. The Knights' Armor is operated as a branch of the Bookstore.

Parking and Traffic

All student, faculty, and staff vehicles that are parked on the campus must bear a current DCC parking sticker. Spaces for the faculty and staff are clearly marked, and they are reserved for fac-

ulty and staff only. Student parking spaces are marked with white lines. Faculty and Restricted spaces are marked with yellow lines. The College provides designated parking areas to accommodate handicapped students. Students should park only in parking spaces painted white.

Parking permits are issued to students at the College Information Desk, located in the main hall of the Wyatt Building. Faculty and staff permits are available in the Office of the Vice President of Financial and Administrative Services. Parking permits for the disabled are issued in the Office of the Vice President of Academic and Student Services.

The College has a 20 mile per hour speed limit within parking areas and 25 mile per hour speed limit on Neathery Lane. These limits are strictly enforced. Anyone violating these limits will have their parking privileges revoked.

Security personnel will issue tickets for all parking violations. Individuals receiving more than one ticket will be subject to the College-Initiated Code of Student Conduct and Discipline, which includes towing.

Drug and Alcohol Abuse Policy

Danville Community College is committed to providing a drug-free environment for its employees and students. It is a violation of College rules for students to manufacture, distribute, dispense, possess, or use controlled substances while participating in College-related activities, on or off campus. Students who are using or dealing drugs are subject to disciplinary procedures. Students who are convicted of drug-related offenses are required to notify the Vice President of Academic and Student Services within five (5) days of such conviction. Students who are involved with drugs or who have drug-related problems are

encouraged to contact the Director of Student Development and Enrollment Management for assistance in obtaining treatment. (All such contacts will remain confidential.) For more information, see the Student Handbook/Calendar or contact the Director of Student Development and Enrollment Management.

The College is committed to providing on-going educational information to students covering the effects and consequences of substance abuse.

Campus Security and Crime Awareness Annual Report

In compliance with Title II of the 1990 Student Right-to-Know and Campus Security Act, each year Danville Community College provides the following information to students, faculty, staff, the College Board, and the community:

- Procedures for Reporting Crimes and Other Emergencies
- Access to the Campus Facilities and Campus Security
- Campus Awareness Programs Relative to Safety and Security
- Vital Statistics
- College Policy on Alcohol and Illegal Drugs

The information is published in the Danville Community College Campus Security and Crime Awareness Annual Report. A paper copy of this information can be obtained from the Office of the Vice President of Financial and Administrative Services. The report is also published on the College's website at <http://www.dcc.vccs.edu/StudentServices/CRIME.pdf>.

Firearms and Other Weapons

Use or possession of firearms or any other kind of weapon is a violation of College policy. According to state law, firearms and other weapons cannot be brought on campus. This policy includes firearms and/or weapons left in vehicles on campus property.

Policy Statement for the Prohibition of Sexual Harassment

Danville Community College shall not tolerate any verbal or physical conduct by any member of the College community which constitutes sexual harassment of any other member of the College community as outlined in Part 1604.11 Discrimination because of Sexual Harassment, Title VII, Sec. 703, of the Civil Rights Act of 1964, as amended; or other applicable State or federal law.

Upon receipt of a complaint of sexual harassment, the College will take action appropriate to the charge presented by the complainant. All faculty, staff, students, and administrators will be held accountable for compliance with this policy.

The complete document can be found in the College Policy Manual which is on record in the Library and available on the College's website (www.dcc.vccs.edu).

Information Technology Resources

Danville Community College provides telecommunications centers, library technological infrastructure, and computing centers to support the academic programs of the College. Users of these resources are expected to abide by the established Computer Ethics Guidelines (See page 193).

Transfer Associate Degrees

(Associate in Arts and Science)

Business Administration
Liberal Arts
Humanities Specialization
Social Science Specialization
Science

Danville Community College offers transferable courses to meet the first two years' requirements for four-year degrees for any American college or university. Since much of the coursework taken during the first two years of a Bachelor's Degree is in the area of general education, the same DCC courses would be appropriate for a variety of four-year degree programs. Listed below are several illustrations of four-year degrees with the recommended two-year program at DCC which would serve as good preparation for transfer. This list is not all-inclusive. Please contact DCC's Counseling Office at (434) 797-8460 for advice on a specific program at a particular university.

<u>Four-Year Degree/Teaching Option</u>	<u>DCC Associate Degree Counterpart</u>
Accounting	Business Administration
Actuarial Science	Business Administration
Agriculture	Science

Note: Persons interested in a teaching career should discuss options with a counselor or academic advisor. Also see page ____ for other options in the pre-teacher program.

Business Administration

Award: ASSOCIATE IN ARTS AND SCIENCE

Length: A full-time student may complete this program in four semesters.

Purpose: The Associate in Arts and Science Degree in Business Administration is designed for students who plan to transfer to a four-year college or university to complete a baccalaureate degree program in Business Administration, Accounting, Business Information Systems, Economics, Finance, Marketing, or Management.

Admission Requirements: In addition to the admission requirements established by the College, entry into this program requires completion of four units of high school English, three units of college preparatory mathematics, one unit of Laboratory Science, and one unit of Social Studies. If you meet the general admission requirements, a counselor will discuss with you the strengths and weaknesses of your academic background and your strengths and weaknesses as revealed by an appropriate placement test. You may correct any deficiencies in academic preparation in the College's Developmental Studies program.

Program Description: This program requires courses in the humanities, natural sciences and social sciences, in addition to the Principles of Economics, Principles of Accounting, Introduction

to Information Systems, and Business Statistics usually required in the first two years of a baccalaureate Business program. Courses should be selected to satisfy the requirements of the senior college or university to which you plan to transfer. You are urged to familiarize yourself with the college or university to which transfer is contemplated. A DCC counselor will help you in the initial planning of your program. You will also be assigned an academic advisor in the Business Department who will assist you in course selections at Danville Community College. In order to prepare for junior class standing at a four-year college or university, you must normally complete a program at the community college which is comparable in length and course content to the first two years of the program at the four-year institution. Upon satisfactory completion of this program at DCC, you will be awarded the Associate in Arts and Science Degree (AA&S) in Business Administration.

Program Requirements: To receive the Associate in Arts and Science Degree in Business Administration, you must complete a minimum of 62 credits with a grade point average of 2.00 or better. The following outline represents a typical order of courses taken by full-time day students. Part-time and/or evening students may take courses in any desired sequence, except for sequence courses or others requiring prerequisites.

Liberal Arts

Award: ASSOCIATE IN ARTS AND SCIENCE

Length: A full-time student may complete this program in four semesters.

Purpose: The Associate in Arts and Science degree program in Liberal Arts is designed for students who plan to transfer to a four-year college or university to complete a Bachelor of Arts degree program in any of the liberal arts. This Associate degree may also be appropriate for students who plan to complete a baccalaureate degree program with certification to teach elementary or secondary English, humanities, or social sciences.

Admission Requirements: In addition to the admission requirements established for the College, entry into this curriculum requires completion of four units of high school English; two units of college preparatory algebra; one unit of college preparatory geometry; one unit of laboratory science; and one unit of history.

If you meet the general admission requirements, a counselor will discuss with you the strengths and weaknesses of your academic background and your strengths and weaknesses as revealed by an appropriate placement test. You may correct any deficiencies in academic preparation in the College's Developmental Studies program.

Program Description: This curriculum requires courses in the humanities, natural sciences, mathematics, social sciences, and health and physical education. You are urged to acquaint yourself with the requirements of the major

department in the college or university to which transfer is contemplated. A DCC counselor will help you in the initial planning of your program. You will also be assigned an academic advisor in the Division of Arts and Sciences who will assist you in schedule preparation for the time you are enrolled in the Liberal Arts curriculum at Danville Community College. In order to prepare for junior class standing at a four-year college or university, you must complete a program at the community college which is comparable in length and course content to the first two years of the program at the four-year institution. Upon satisfactory completion of the program at Danville Community College, you will be awarded the Associate in Arts and Science Degree in Liberal Arts.

Program Requirements: To receive an Associate in Arts and Science Degree in Liberal Arts, you must complete a minimum of 63 credits with a 2.00 or better grade point average. The following outline represents a typical order of courses taken by full-time day students. Part-time and/or evening students may take courses in any desired sequence, except for hyphenated courses or others requiring prerequisites in the course descriptions portion of this Catalog.

Focus Courses: A sequence of four Focus Courses must be selected by a Liberal Arts student for presentation to the academic advisor. Approval by the advisor is required. The Focus Courses should be related to each other and should also be accepted in transfer to the four-year program of the student's choice.

Total Minimum Credits for the Associate in Arts and
Science Degree in Liberal Arts 63

¹The four Focus Courses (minimum of 12 credits) must be approved by the academic advisor. Focus Courses should be planned as preparation for transfer into the four-year degree program of choice. Examples of Focus Course sequences would include the following:

- ART 101-102, MUS 121-122
- HIS 121-122-266-268
- HLT 100-116-200-215
- PHI 100, REL 200-210-230
- PSY 201-202-215-238
- PSY 201-202-235-236
- SCM 100-110-200-105
- SOC 201-202-235-236
- SPA 101-102-203-204

²Students must complete a full-year of social science coursework by taking one of the following sequences: ECO 201 and ECO 202, or PLS 211 and PLS 212, or SOC 201 and SOC 202, or SOC 200 and 1 sophomore level sociology course excluding SOC 202, or PSY 201 and PSY 202, or PSY 200 and one sophomore-level psychology course excluding PSY 202. Courses used to complete the social science requirement will not count as Focus Courses.

³This credit can be satisfied by a single 2 or more credit course in Health, Physical Education, or Recreation.

Liberal Arts - Humanities Specialization

Award: ASSOCIATE IN ARTS AND SCIENCE

Length: A full-time student may complete this program in four semesters.

Purpose: The Associate in Arts and Science degree in Liberal Arts with the Humanities Specialization is designed for students who plan to transfer to a four-year college or university and who intend to complete a Bachelors degree in a humanities or related discipline. Humanities disciplines include English, philosophy, foreign languages, drama, religion, and speech. This program is also appropriate for students intending to pursue humanities-related fields which include communications and journalism as well as some of the fine arts such as theatre, music, and creative writing. Students interested in teaching in the above disciplines will find this program a good starting point for their careers.

Admission Requirements: In addition to the admission requirements established for the College, entry into this curriculum requires completion of four units of high school English, two units of college preparatory algebra and one unit of college preparatory geometry, one unit of laboratory science, and one unit of history. If you meet the general admission requirements, a counselor will discuss with you the strengths and weaknesses of your academic background and your strengths and weaknesses as revealed by an appropriate placement test. You may correct any deficiencies in academic preparation in the College's Developmental Studies program.

Program Description: This curriculum requires a broad range of general education requirements in mathematics, social science, natural science and humanities. Like the Social Science Specialization it is designed to give the student maximum flexibility in the selection of courses to meet both the interests of the student and the demands of

the institution to which the student intends to transfer. It is important for students to identify their preferred transfer institution as soon as possible and to work closely with their academic advisor to ensure transferability of their selected courses. In order to prepare for junior class standing at a four-year college or university, you must ensure that the curriculum completed in the first two years at Danville Community College is comparable to the first two years of study at the four-year institution. Upon satisfactory completion of the program at Danville Community College, you will be awarded the Associate in Arts and Science Degree in Liberal Arts.

Program Requirements: To receive an Associate in Arts and Science Degree in Liberal Arts, Humanities Specialization, you must complete a minimum of 62 credits with a grade point average of 2.00 or better. The following outline represents a typical order of courses taken by full-time day students. Part-time and/or evening students may take courses in any desired sequence, except for hyphenated courses or others requiring prerequisites in the course descriptions portion of this Catalog.

Humanities and Fine Arts Elective: The core of this program consists of a requirement that students complete at least three humanities courses of their choice in addition to one sophomore literature course. Further, students must take at least two courses in fine arts. The combination of the humanities and fine arts requirement is intended to promote an understanding of the connections between humanities disciplines and the arts. Students may continue to explore these connections by using the liberal arts elective requirement of six credit hours to pursue greater depth in the fine arts or humanities. Again, selection of courses should be based on the students' interests and the demands of their intended transfer institution.

*Humanities Elective: Students must take three courses in humanities disciplines, two of which must be at the sophomore level.

**Students must take one literature class from the following list: ENG 241, ENG 242, ENG 243, or ENG 244.

***Students must take two courses in fine arts (ART, MUS, PHT, Creative Writing, and Theatre).

Liberal Arts - Social Science Specialization

Award: ASSOCIATE IN ARTS AND SCIENCE

Length: A full-time student may complete this program in four semesters.

Purpose: The Associate in Arts and Science degree in Liberal Arts with the Social Science Specialization is designed for students who plan to transfer to a four-year college or university and who intend to complete a Bachelor's degree in a social science discipline. Social Science disciplines include sociology, anthropology, psychology, history, political science, and economics. This program is also appropriate for students intending to pursue social science-related fields such as communications as well as some of the helping professions that include public administration, social work and counseling. Students interested in teaching in the above disciplines will find this program a good starting point for their careers.

Admission Requirements: In addition to the admission requirements established for the College, entry into this curriculum requires completion of four units of high school English, two units of college preparatory algebra and one unit of college preparatory geometry, one unit of laboratory science, and one unit of history.

If you meet the general admission requirements, a counselor will discuss with you the strengths and weaknesses of your academic background and your strengths and weaknesses as revealed by an appropriate placement test. You may correct any deficiencies in academic preparation in the College's Developmental Studies program.

Program Description: This curriculum requires a broad range of general education requirements in mathematics, social science, natural science and humanities. Like the Humanities Specialization,

it is designed to give the student maximum flexibility in the selection of courses to meet both the interests of the student and the demands of the institution to which the student intends to transfer. It is important for students to identify their preferred transfer institution as soon as possible and to work closely with their academic advisor to ensure transferability of their selected courses. In order to prepare for junior class standing at a four-year college or university, you must ensure that the curriculum completed in the first two years at Danville Community College is comparable to the first two years of study at the four-year institution. Upon satisfactory completion of the program at Danville Community College, you will be awarded the Associate in Arts and Science Degree in Liberal Arts.

Program Requirements: To receive an Associate in Arts and Science Degree in Liberal Arts, Social Science Specialization, you must complete a minimum of 62-63 credits with a grade point average of 2.00 or better grade point average. The following outline represents a typical order of courses taken by full-time day students. Part-time and/or evening students may take courses in any desired sequence, except for hyphenated courses or others requiring prerequisites in the Course Descriptions section of this Catalog.

Social Science Requirements and Electives: The core of this program consists of a requirement that students complete courses in history, sociology, psychology, and political science or economics. This gives the student breadth of exposure to social science disciplines. Students may then use the nine hours of required social science electives to achieve greater depth in one or more areas. Again, selection of courses should be based on the students' interests and the demands of their intended transfer institution.

Science

Award: ASSOCIATE IN ARTS AND SCIENCE

Length: A full-time student may complete this program in four semesters.

Purpose: The Associate in Arts and Science degree program in Science is designed for students who plan to transfer to a four-year college or university to complete a baccalaureate degree program in any of the sciences or related pre-professional programs. Students interested in pursuing pre-med or health care bachelor's programs will find this degree the best place to begin their studies. This Associate degree may also be appropriate for students who plan to complete a baccalaureate degree program with certification to teach elementary or secondary math, science, or technologies.

Program Description: Although the major emphasis in this curriculum is on mathematics, and the biological and physical sciences, the curriculum also includes a range of courses in humanities and social sciences. You have sufficient flexibility to select appropriate courses to correspond to the requirements of the senior college or university to which you plan to transfer. You are urged to familiarize yourself with the requirements of the college or university to which transfer is contemplated.

A DCC counselor will assist you in the initial planning of your program. In addition, an academic advisor in the Division of Arts and Sciences

will assist you on a regular basis with your program plan. In order to prepare for upper division (junior class) standing at a senior college or university, you should complete a program at the community college that is comparable to the first two years of the program at the senior college or university. Upon satisfactory completion of this program, you will be awarded the Associate in Arts and Science degree.

Admission Requirements: In addition to the admission requirements established for the College, entry into this curriculum requires completion of four units of high school English, three units of college preparatory mathematics, one unit of laboratory science, and one unit of social studies. If you meet the general admission requirements, a counselor will discuss with you the strengths and weaknesses of your academic background and your strengths and weaknesses as revealed by an appropriate placement test. You may correct any deficiencies in academic preparation in the College's Developmental Studies program.

Program Requirements: To receive the Associate in Arts and Science degree in Science, you must complete a minimum of 63 credits with a grade point average of 2.00 or better. The following outline represents a typical order of courses taken by full-time day students. Part-time and evening students may take courses in any desired sequence, except for sequence courses or others requiring prerequisites.

Total Minimum Credits for the Associate in Arts and Science Degree in Science 63

¹Students must complete 20 credit hours of lab science coursework. This work must include at least one full year lab science sequence which may be satisfied by one below:

CHM 111-112
CHM 241-242
CHM 251-252
BIO 101-102
BIO 141-142
BIO 231-232
PHY 201-202
PHY 241-242

Acceptable 200-level laboratory science sequences are:
BIO 231-232 Human Anatomy and Physiology I-II
BIO 256 General Genetics along with
BIO 205 General Microbiology
CHM 241-242 Organic Chemistry I-II with lab
CHM 251-252 Quantitative Analysis I-II
PHY 201-202 General College Physics I-II
PHY 241-242 University Physics I-II

²This credit can be satisfied by a single 2 or more credit course in Health, Physical Education, or Recreation.

³Acceptable literature sequences are:
ENG 241-242 Survey of American Literature I-II
ENG 243-244 Survey of English Literature I-II
ENG 251-252 Survey of World Literature I-II

⁴Students must complete a full-year of social science coursework by taking one of the following sequences:
ECO 201 and ECO 202, or
PLS 211 and PLS 212, or
SOC 201 and SOC 202, or
SOC 200 and 1 sophomore level sociology course excluding SOC 202, or
PSY 201 and PSY 202, or
PSY 200 and 1 sophomore level psychology course excluding PSY 202.

⁵Student must take one of the following to meet this requirement:
MTH 271, Applied Calculus I, or
MTH 174, Calculus w/Analytic Geometry II, or
MTH 240, Statistics, or
MTH 241, Statistics I

Pre-Teacher Education Program

Danville Community College is a participant in the Virginia Community College System Chancellor's Pre-Teacher Education Program. This program consists of courses which have been agreed to by many four-year colleges and universities within the Commonwealth as being adequate preparation for their teacher education programs. The teacher education program provides students with a number of benefits. First, students can be assured that their course of study in the program is approved by the transfer institution. Second, students' access to housing, communications and financial aid will be weighed equally with the institution's own students. Third, students may be able to participate in an institution's early registration. Fourth, admission of a VCCS graduate to an institution's teacher education program will be given equal consideration with native students. Fifth, SAT and ACT requirements will be waived. Sixth, students will enjoy a seamless transition to the transfer school and will be eligible for special tuition scholarships. Students at DCC who are interested in participating in this program will register in the AA&S Liberal Arts-Humanities Specialization degree program. While in that program, they must complete the following courses.

1. ENG 111 College Composition I 3
2. ENG 112 College Composition II 3
3. SPD 110 Introduction to Speech Communication 3
4. One sophomore literature class selected from the list below: 3
 - ENG 241 Survey of American Literature I
 - ENG 242 Survey of American Literature II
 - ENG 234 Survey of English Literature I
 - ENG 244 Survey of English Literature II
 - ENG 251 Survey of World Literature I
 - ENG 252 Survey of World Literature II
5. One humanities class selected from the list below: 3
 - ART 101
 - ART 102
 - ART 105
 - ART 201
 - ART 202
 - MUS 121
 - MUS 122
6. One of the below pairs of Math courses 6
 - MTH 163 and MTH 240 or
 - MTH 151 and MTH 152
7. GEO 210 People and the Land: Intro to Cultural Geography 3
8. One of the below pairs of history courses: 6
 - HIS 121 and HIS 122 or
 - HIS 101 and HIS 102
9. PLS 135 American National Politics 3
10. One of the below economics courses: 3
 - ECO 201 Principles of Macroeconomics
 - ECO 202 Principles of Microeconomics
11. Approved Computer Course 3
12. BIO 101 General Biology I 4
13. BIO 102 General Biology II 4
14. Approved health course 2
15. STD 101 Orientation to Education 1
16. EDU 200 Introduction to Teaching as a Profession 3

Students must complete the above courses with a 2.5 grade point average or better and pass the Praxis I examination in order to secure the benefits mentioned above. Students must also complete and sign a letter of intent to pursue the Pre-Teacher Education program which specifies the school to which they intend to transfer. This letter is signed by the transfer school's representative, the DCC Advisor (Dewitt Drinkard, Temple Building, Room 112, [434] 797-8485), and the student, and announces to the transfer school your engagement in the program.

The following colleges are current participants in this program:

- George Mason University
- James Madison University
- Liberty University
- Longwood University
- Mary Baldwin College
- Norfolk State University
- Old Dominion University
- Radford University
- University of Virginia -Wise
- Virginia Commonwealth University
- Virginia State University
- Virginia Union University

The Associate in Applied Science degree is designed for the student who does not plan to pursue a four-year program of study, but still seeks an educational experience that includes courses other than those directly related to the chosen field. The AAS degree requires 65-69 credits, which can be completed in two academic years. Along with the courses that are directly related to the chosen field of study, students will take a variety of general education courses such as English, speech, psychology, science or mathematics, and physical education or wellness. The types of jobs that you might expect to obtain upon completion of the degree requirements are listed on the following catalog pages. Also included are the specific requirements for completing each program of study.

Accounting

Award: ASSOCIATE IN APPLIED SCIENCE

Length: A full-time student may complete this program in four semesters.

Purpose: The Associate in Applied Science Degree program in Accounting is designed for persons who seek employment in the accounting field immediately upon completion of the program. Persons seeking initial employment in the accounting field and those in accounting seeking advancement may benefit from this program.

Occupational Objectives: The following occupational titles represent examples of possible employment opportunities:

- Accounting
- Accounting Technician
- Accounting Trainee
- Junior Accountant and many more

Admission Requirements: In addition to the admission requirements established for the College, entry into this program requires completion of four units of high school English and one unit of high school mathematics. If you meet the general admissions requirements, a counselor will discuss with you the strengths and weaknesses of your academic background and

your strengths and weaknesses as revealed by an appropriate placement test. You may correct any deficiencies in your academic preparation in the College's Developmental Studies program.

Program Description: The first two semesters (first year) of the Associate in Applied Science Degree program in Accounting are similar to other programs in business. In the second year, you will pursue your specialty in Accounting. You are urged to consult with the Counseling Office and your faculty advisor in planning your program and selecting electives. Upon satisfactory completion of the four-semester program, you will be awarded the Associate in Applied Science Degree in Accounting. Some courses within this program may be applied to a four-year program at the discretion of the admitting institution. However, if your objective is to obtain a four-year degree in Accounting, you should enroll in DCC's Business Administration program.

Program Requirements: To receive the Associate in Applied Science Degree in Accounting, you must complete a minimum of 69 credits with a grade point average of 2.00 or better. The following outline represents a typical order of courses taken by full-time students.

Accounting

		Lecture Hours	Lab Hours	Course Credits
First Semester				
ACC 111	Accounting I	3	0	3

Total Minimum Credits for the Associate in Applied
Science Degree in Accounting 69

¹One unit of high school algebra or MTH 3 is required as
a prerequisite for MTH 121.

²Students who take MTH 121 may substitute an approved
business elective for the BIO or NAS elective.

Administration Of Justice

Award: ASSOCIATE IN APPLIED SCIENCE

Length: A full-time student may complete this Program in four semesters (two years).

Purpose: The Administration of Justice (ADJ) program is designed to prepare individuals for careers in law enforcement, corrections and protective services (private security). The curriculum serves the interests of career-oriented students and provides courses to meet the needs of in-service personnel. The A.A.S. degree does not substitute for attendance at a basic police academy required by Virginia's local and state law enforcement agencies. Transferability of ADJ coursework to four-year colleges or universities is contingent on the academic credit transfer policies of those institutions. The ADJ Program Coordinator and/or Counseling personnel will facilitate inquiries of ADJ majors, including possible transfer limitations of DCC ADJ coursework, regarding four-year programs in Administration of Justice/Criminal Justice, or related academic programs.

Occupational Objectives: The following occupational titles represent examples of possible law enforcement, corrections and/or protective service (private security) civilian or military employment opportunities:

- Air Force Office of Special Investigations
(AFOSI)
- Air Force Security Forces
- Commercial and Industrial Security Officers
- Correctional Officer
- Deputy Sheriff
- Dispatcher
- Insurance Investigator
- Jail Deputy
- Loss Prevention Manager
- Military Police
- Military Intelligence
- Police Officer
- Security Supervisor
- Virginia State Trooper
- Youth Care Workers

Program Requirements: To receive the Associate in Applied Science degree in Administration of Justice, a student must complete 67-69 credits with a grade point average of 2.0, or better. More than one-half of the curriculum includes courses in administration of justice. Remaining courses are considered general education classes to be taken from disciplines such as natural science (or math), sociology, psychology and so on. Instruction includes both the theoretical concepts and practical applications needed for future success in public safety. Students who plan to transfer DCC courses into a four-year program in criminal justice/administration of justice are strongly urged to consult with the ADJ Program Coordinator and the Counseling Office as the student may be advised to substitute coursework for some classes listed in the suggested four-semester ADJ Program. The following sample program represents a typical order taken by full-time ADJ majors. Part-time students may take courses in any desired sequence. In all cases, prerequisites must be met.

Note: Depending on the interests of the Administration of Justice major, he or she should select one of the following three specializations allowing for a concentration of coursework in:

- Specialization I: Law Enforcement
- Specialization II: Corrections
- Specialization III: Protective Services
(Private Security)

DCC's ADJ Program is part of the Tech Prep Initiative. Students who have successfully completed certain high school courses may qualify for advanced standing and receive free credit in equivalent college courses. For additional details regarding Tech Prep, see your ADJ Program Coordinator and/or Tech Prep Coordinator.

Finally, the applicant must also consult with the ADJ Program Coordinator to learn if he or she would meet the specialized requirements set by criminal justice agencies. Minimal criminal justice agency requirements include:

- 1) Excellent physical and mental health;
- 2) Normal hearing and color vision. Eye functions must be normal (visual acuity must not be less than 20/40 in either eye without correction;
- 3) Weight should be in proportion to height;
- 4) Excellent moral character;
- 5) No conviction of any crime involving moral turpitude or conviction of any felony;
- 6) An excessive number of traffic citations would be cause to exclude an applicant from consideration by most all criminal justice agencies;
- 7) U.S. citizenship.

Note: An extensive background investigation will be conducted by the criminal justice agency to confirm the foregoing. Any student who has been convicted of a felony or any offense involving moral turpitude or violence is ineligible for admission to the ADJ Program. Enrollment in certain ADJ courses may be restricted to only those who have been accepted into the ADJ Program. The ADJ Program Coordinator reserves the right to recommend the withdrawal of any student who does not exhibit suitable classroom attendance, behavior, and adherence to the regulations governing student conduct in DCC's Catalog.

College Credit for Academy Training: After an ADJ student completes 35 or more credits required for graduation, 21 and 15 credits respectively will be awarded to the ADJ major, as follows:

Virginia State Police Academy:

- 3 credits -ADJ 100, Survey of Criminal Justice
- 3 credits -ADJ 130, Criminal Law
- 3 credits -ADJ 236, Criminal Investigation
- 9 credits -ADJ coursework*
- 3 credits -Wellness Elective

TOTAL: 21 credits

Virginia Department of Criminal Justice Services Regional Academies:

- 3 credits -ADJ 100, Survey of Criminal Justice
- 3 credits -ADJ 130, Criminal Law
- 3 credits -ADJ 236, Criminal Investigation
- 3 credits -ADJ coursework*
- 3 credits - Wellness Elective

TOTAL: 15 credits

*Possible ADJ coursework could include:

- ADJ 116, Special Enforcement Topics
- ADJ 227, Constitutional Law
- ADJ 215, Report Writing

Admission Requirements: In addition to DCC's admission requirements, entry into the ADJ Program requires proficiency in high school English and mathematics. Applicants with deficiencies will be required to enroll in a DCC developmental English and/or mathematics course. All applicants must consult with the ADJ Program Coordinator for assistance in planning his or her ADJ curriculum, including program options - Specializations I, II, or III (see Program Requirements). Students who are sure that they will pursue bachelor-level studies should seek guidance from the ADJ Program Coordinator and/or a DCC Counselor regarding college transfer policies.

Administration Of Justice Law Enforcement Specialization

Administrative Support Technology

Award: ASSOCIATE IN APPLIED SCIENCE

Length: A full-time student may complete this program in four to five semesters, depending upon the track chosen.

Purpose: The Associate in Applied Science Degree program in Administrative Support Technology is designed to educate and train students wishing to enter or advance in an office support career. With three tracks offered under the Administrative Support Technology umbrella, students are given the opportunity to select a course of study that will meet their occupational objectives.

Occupational Objectives: Possible employment opportunities include:

- Administrative Assistant
- Executive Secretary
- Legal Secretary
- Medical Secretary
- Medical Transcriptionist
- Medical Insurance Coder
- Office Manager
- Paralegal

Admission Requirements: In addition to the admission requirements established for the College, entry into this program requires completion of four units of high school English and one unit of high school mathematics. If you meet the general admission requirements, a counselor will discuss with you the strengths and weaknesses of your academic background and your strengths and weaknesses as revealed by an appropriate placement test. You may correct any deficiencies in academic preparation in the College's Developmental Studies program.

Program Description: Designed for completion in two years, all tracks of the Administrative Support Technology program combine instruction in critical areas related to successful career advancement within the office support area.

The General Office track provides broad-based knowledge and skills needed in many different types of businesses. It may also serve as the first two years of study for a student's baccalaureate degree in business education.

The Legal Specialization track is geared specifically to individuals who want a career as a legal secretary or an entry-level paralegal (a person capable of performing independent legal work under the supervision of an attorney). Small firms often use this qualified employee in a combination of these positions. As shown on the outline that follows, courses include general education courses, computer courses, word processing, and five legal courses. The legal courses are taught in the evening by practicing attorneys or paralegals, but all other courses may be taken in the day or evening. Any student making less than a "C" on a legal course is encouraged to repeat that course.

The Medical Office Specialization track offers training needed to work in a medical environment with specific training in medical insurance coding and medical transcription. The medical courses are usually taught during the evenings.

Program Requirements: To receive the Associate in Applied Science Degree, you must complete a minimum of 69 credits in the General Office Track; a minimum of 69 credits in the Legal Specialization; and 67-69 credits for the Medical Office Specialization. Students must have a grade point average of 2.0 or better. The following outlines represent a typical order of courses taken by full-time day students. Part-time and/or evening students may take courses in any desired order, except for sequence courses, or courses requiring prerequisites.

Business Management

Track I: Management Specialization

Award: ASSOCIATE IN APPLIED SCIENCE

Length: A full-time student may complete this program in four semesters.

Purpose: The Associate in Applied Science Degree program in Business Management is designed primarily for persons who seek employment in business immediately upon completion of the program. Both persons who are seeking their first employment position and those who are seeking promotion may benefit from this program.

Occupational Objectives: The following occupational titles represent examples of possible employment opportunities for graduates of the management specializations:

- Management Trainee
- Administrative Assistant
- Purchasing Agent
- Human Resource Supervisor
- Production Supervisor
- Small Business Owner/Manager
- Office Manager

Admission Requirements: In addition to the admission requirements established for the College, entry into this program requires completion of four units of high school English and one unit of high school mathematics. If you meet the general admission requirements, a

counselor will discuss with you the strengths and weaknesses of your academic background and your strengths and weaknesses as revealed by an appropriate placement test. You may correct any deficiencies in your academic preparation in the College's Developmental Studies program.

Program Description: The first two semesters (first year) of the Associate in Applied Science Degree program in Business Management are similar to other curriculums in business. In the second year you will pursue your specialty in Business Management. The program includes technical courses, courses in related areas, general education courses and electives. Instruction will include both the theoretical concepts and practical applications needed for success in business. You are urged to consult with the Counseling Office and your faculty advisor in planning your program and selecting electives. Upon satisfactory completion of the four-semester program, you will be awarded the Associate in Applied Science Degree (AAS) in Business Management.

Program Requirements: To receive the Associate in Applied Science Degree in Business Management, you must complete a minimum of 69 credits with a grade point average of 2.00 or better. The following outline represents a typical sequence of courses taken by full-time students.

Business Management

Track II: Graphic Imaging Management Specialization

Award: ASSOCIATE IN APPLIED SCIENCE

Length: A full-time student may complete this program in two years, which includes one summer term.

Purpose: The Business Management - Graphic Imaging Management Specialization is designed for persons who seek employment in graphic imaging management or marketing positions. Both persons who are seeking their first employment in a managerial position and those presently in management who are seeking promotion may benefit from this program.

Occupational Objectives: The following occupational titles represent examples of possible employment opportunities:

- Owner - Manager
- Department Manager
- Management Trainee
- Sales/Marketing Representative

Admission Requirements: In addition to the admission requirements established for the College, entry into the Graphic Imaging Management Specialization requires completion of four units of high school English, one unit of keyboarding, one unit of high school mathemat-

ics, and one unit of vocational printing/graphics. Students with deficiencies in academic preparation may correct weaknesses in the College's Developmental Studies program or through fundamental printing courses offered by the Graphic Imaging Department.

Program Description: The Graphic Imaging Management Specialization is similar to other curriculums in business; however, the program provides opportunity for you to pursue a specialization in printing technology. Instruction will include both the theoretical concepts and practical applications needed for success in the printing management/marketing field. You are urged to consult with your faculty advisor in planning your program and selecting electives.

Program Requirements: To receive the Associate in Applied Science Degree in Business Management (Graphic Imaging Management Specialization), you must complete a minimum of 69 credits with a grade point average of 2.00 or better. The following curriculum outline represents a typical order of courses taken by full-time day students. Part-time students may take courses in any desired sequence except sequence courses or others requiring prerequisites.

Business Management

Track III: Marketing Specialization

Award: ASSOCIATE IN APPLIED SCIENCE

Length: A full-time student may complete this program in four semesters.

Purpose: The Business Management - Marketing Specialization program is designed for students who are preparing for full-time employment in merchandising, retailing or related marketing occupations. Persons seeking initial employment in Marketing or those already employed in Marketing and seeking advancement may benefit from this program.

Occupational Objectives: The following occupational titles represent examples of possible employment opportunities:

- Sales Representative
- Buyer and Assistant Buyer
- Manager/Manager Trainee
- Department Manager
- Real Estate/Insurance Sales
- Small Business Management/Owner
- Other Related Marketing Occupations

Admission Requirements: In addition to the admission requirements established for the College, entry into this program requires completion of four units of high school English and

one unit of high school mathematics. If you meet the general admission requirements, a counselor will discuss with you the strengths and weaknesses of your academic background and your strengths and weaknesses as revealed by an appropriate placement test. You may correct any deficiencies in academic preparation in the College's Developmental Studies program.

Program Description: The program includes technical courses in marketing, related business courses and general education courses. Instruction will include both the theoretical concepts and practical applications needed for further success in Marketing. You are urged to consult with the Counseling Office and a faculty advisor in planning your program and selecting electives. Upon satisfactory completion of the program, you will be awarded the Associate in Applied Science Degree (AAS) in Business Management - Marketing Specialization.

Program Requirements: To receive the Associate in Applied Science Degree with Marketing Specialization, you will need to complete a minimum of 69 credits with a grade point average 2.00 or better. The following outline represents a typical order of courses taken by full-time students.

Business Management

Track IV: Automotive Management Specialization

Award: ASSOCIATE IN APPLIED SCIENCE

Length: A full-time student may complete this program in four semesters and one summer term.

Purpose: The Business Management - Automotive Management Specialization is designed primarily for persons who seek employment in the automotive field immediately upon completion of the program. Both persons who are seeking their first employment position and those who are seeking promotion may benefit from the program.

Occupational Objectives: The following occupational titles represent examples of possible employment opportunities:

- Automotive Management/Support Service Advisor
- Service Manager
- Automotive Parts Sales/Management
- Automotive Manufacturer Representative
- Automotive Sales
- Automotive Warranty Claims Administrator

Admission Requirements: In addition to the general admission requirements established for the College, entry into this program requires:

1. Four units of high school English
2. One unit of high school mathematics

If you meet the general admission requirements, a counselor will discuss with you the strengths and weaknesses of your academic background as revealed by an appropriate placement test. You may correct any deficiencies in the College's Developmental Studies Program.

Program Description: The Automotive Management Program is designed for students who wish to pursue employment in management and support areas of automotive sales, repair, parts and manufacturing businesses. The program includes courses in automotive technology, general education and electives. Instruction will include both the theoretical concepts and practical applications needed for success in automotive management. You are urged to consult with the Counseling Office and your faculty advisor in planning your program and selecting electives. Upon satisfactory completion of the four semester program, you will be awarded the Associate in Applied Science Degree (AAS) in Business Management Track IV -Automotive Management Specialization.

Program Requirements: To receive the Associate in Applied Science Degree in Business Management -Automotive Management Specialization, you must complete a minimum of 69 credits with grade point average of 2.00 or better. The following outline represents a typical order of course taken by full-time students.

Business Management

Track V: Motorsports Management Specialization

Award: ASSOCIATE IN APPLIED SCIENCE

Length: A full-time student may complete this program in four semesters.

Purpose: The Business Management – Motorsports Management Specialization is designed primarily for persons seeking their first job or who desire a promotion in their present position or in another field, including self employment. Students will be provided knowledge, skills, and training necessary to perform mid-management level functions in motorsports related companies. Coursework includes instruction in mathematics, critical thinking, technical writing, interpersonal relationships, communications, team building, motorsports industry, safety regulations, motorsports transportation, management, law, hospitality management, computer applications, accounting, marketing, and other areas related to the motorsports industry.

Occupational Objectives: Completion of this program may lead to employment or career advancement in a variety of positions including the following:

- Distribution Specialist
- Hospitality Manager
- Media Specialist
- Motorsports Activity Manager
- Motorsports Event Manager
- Motorsports Team Manager
- Public Relations Specialist
- Sales Representative
- Transportation Specialist

Admission Requirements: Entry into this curriculum may be attained by meeting the general admission requirements established for the College. If you meet the general admission requirements, a counselor will discuss with you the strengths and weaknesses of your academic background and your strengths and weaknesses as revealed by an appropriate placement test. You may correct any deficiencies in academic preparation in the College's Developmental Studies Program.

Program Description: The Motorsports Management Specialization is designed for students who wish to pursue employment in management and support areas of Motorsports related companies. The program includes courses in motorsports technology and management, general education and electives. Instruction will include both the theoretical concepts and practical applications needed for success in motorsports management. Some courses may be taught as web-based courses. This is a joint program between Danville Community College and Patrick Henry Community College. You are urged to consult with the Counseling office and your faculty advisor in planning your program and selecting electives.

Program Requirements: To receive the Associate in Applied Science Degree in Business Management -Motorsports Management Specialization, you must complete a minimum of 69 credits with a grade point average of 2.00 or better. The following outline represents a typical order of courses taken by full-time students.

Dental Hygiene

Award: ASSOCIATE IN APPLIED SCIENCE

Danville Community College is a cooperating institution for the Virginia Western Community College two-year program in Dental Hygiene. This Joint Venture Dental Hygiene program accepted its first class of students in the Fall Semester 1997. The second class started in Fall 1999 and the third class started in Fall 2001. The next class will begin in Fall Semester 2005. Prospective students are encouraged to apply to DCC and enroll in related coursework.

It is recommended that students complete a preparatory curriculum for dental hygiene students such as the First-Year Studies/Certificate program. A recommended curriculum for dental hygiene students may be found on the DCC website (www.dcc.vccs.edu) in the Arts and Science Division section.

A student may complete this Associate in Applied Science Degree without moving from the Danville

area. Applicants to the Dental Hygiene Program must have completed four units of high school English, one unit each of high school or college biology and chemistry, two units of high school or college social studies, and Algebra II or MTH 4. After a student is accepted by VWCC into the program, core courses in DNH are offered at Danville via distance learning technology, while clinical experiences are conducted by DNH instructors at the George Washington High School site. The contact person at Virginia Western Community College is Pam Woody, (540) 857-7307. Students must submit a complete application packet in one envelope. This envelope must be submitted to Pam Woody, VWCC Health Technology Office, P.O. Box 14007, Roanoke, VA 24038.

Additional information about this program may be obtained from the DCC Site Coordinator, Lynn Turner, who may be reached on the DCC campus at (434) 797-6427, or the site clinic at (434) 791-5353.

Notes:

¹Health and Wellness are emphasized throughout the Dental Hygiene Program, but specifically in DNH 150 Nutrition.

²Includes instruction in fundamental mathematical skills.

³SPD 105 may be substituted.

* Courses may be taken at Danville Community College prior to admission to the AAS Dental Hygiene program. DCC and Virginia Western Community College have agreed to a sequence of courses that will satisfy all non-DNH coursework requirements. This sequence may be taken through DCC's First Year Studies program.

Early Childhood Development

Award: ASSOCIATE IN APPLIED SCIENCE

Length: A full time student may complete this program in four semesters.

Purpose: The Early Childhood Development curriculum is designed for students who plan to work with children from birth through age eight years using developmentally appropriate practices. The Associate in Applied Science Degree program is primarily designed to benefit persons interested in employment in the child development field immediately after completion of community college studies. However, several adjustments in program schedules are available to enable a student to prepare for transfer to a baccalaureate degree program in Early Childhood Education.

Occupational Objectives: The following occupational titles represent examples of possible employment opportunities:

- Child Care Center Director
- Child Care Center Teacher
- Teacher Aide/Assistant
- Child Care Center Teacher Assistant
- Recreation Aide or Program Leader
- Substitute Teacher

Admission Requirements: In addition to the admission requirements established by the College, entry into this curriculum requires a high school diploma or the equivalent. Students with academic weaknesses, as determined by the College's placement test, can correct these weaknesses by enrolling in Developmental Studies. Entry into the Associate in Applied Science degree

program in Early Childhood Development also requires the following:

1. A personal interview with a representative of the Child Development Department.
2. Special Requirement: Students who wish to enroll in the Early Childhood Development curriculum with the objective of obtaining employment in early childhood education settings are advised that excellent moral character is generally considered prerequisite to such employment. Background investigations will be conducted by employing agencies to confirm that potential employees have not been convicted of a crime involving moral turpitude or any felony.

Program Description: The Early Childhood Development curriculum prepares individuals to work in services for children from birth through age eight years. The program includes courses in child development, behavior management, methods of teaching children, general education and electives. Instruction will include both theoretical concepts and practical applications needed for success in providing high quality services for children. Upon successful completion of the four-semester program, you will be awarded the Associate in Applied Science Degree (AAS) in Early Childhood Development.

Program Requirements: To receive the Associate in Applied Science Degree in Early Childhood Development you must complete a minimum of 65 credits with a grade point average of 2.00 or better. The following outline represents a typical order of courses taken by full time students.

¹PSY 201 Introduction to Psychology I or PSY 200 Principles of Psychology - recommended for students planning to transfer to four-year institutions.

²ENG 112 College Composition II is recommended for students planning to transfer to four-year institutions.

³BIO 101 General Biology is recommended for students planning to transfer to four-year institutions.

⁴MTH 151 Mathematics for Liberal Arts I is recommended for students planning to transfer to four-year institutions.

⁵Students planning to transfer to four-year institutions should select an appropriate transfer course.

General Engineering Technology

Award: ASSOCIATE IN APPLIED SCIENCE

Length: Two years. Part-time students determine their own pace.

Purpose: The Associate in Applied Science Degree in General Engineering Technology is designed to provide a broad base of math, science, and engineering knowledge which will prepare the graduate to enter the technical workforce upon graduation. Entry into the workplace would be at the Engineering Assistant level. The graduate will have knowledge in areas of Engineering Technology such as engineering materials, design drafting, engineering mechanics, manufacturing methods, electronics, and computer programming.

Occupational Objectives:

- Engineering Technician
- Quality Control Technician
- Industrial Engineering Technician
- Material Testing Technician
- Technical Salesperson

Admission Requirements: In addition to the admission requirements established for the College, this curriculum requires successful completion of four units of high school English; three units of high school mathematics (Algebra I, Algebra II and Geometry); two units of high

school social studies; one unit of laboratory science, and one unit of Technical Drafting. If a student meets the general admission requirements, a counselor will discuss the student's academic strengths and weaknesses. Any academic deficiencies may be corrected in the College's Developmental Studies program.

Program Description: General Engineering is a two-year curriculum combining a basic core of engineering courses. These courses are drawn from the field of Mechanical, Industrial, and Electronic Engineering. The first year includes studies in science, math, English, drafting, and general education courses. Although the first year is composed almost exclusively of engineering technology courses, these courses will prepare the student to enter the engineering field as an engineering technician upon graduation.

Program Requirements: To receive an Associate in Applied Science Degree in General Engineering Technology you must complete a minimum of 67 credits with a 2.00 or better grade point average. The 67 credits are distributed according to the following outline. The outline represents a typical order of courses taken by full-time day students. Part-time and/or evening students may take courses in any desired sequence, except for hyphenated courses or others requiring prerequisites.

Health Science

with a Specialization in Practical Nursing

Award: ASSOCIATE IN APPLIED SCIENCE

Length: A full-time student may complete this program in four semesters (two years)

Purpose: The Health Science program with a Specialization, in Practical Nursing is designed to prepare students for careers as practical nurses. In addition, this program requires students to develop a firmer foundation in positive health practices, anatomy and physiology, and applied mathematics than is required in typical practical nursing certificates. This degree should be chosen by students who wish to develop professionally in directions of health care education, community health, or more advanced nursing training and supervision. Upon completion of the program, graduates will be eligible to take the National Council Licensure Examination (NCLEX-PN).

Occupational Objectives: Opportunities for the Licensed Practical Nurse include employment in hospitals, nursing homes, clinics, day care centers, doctor's offices, industry, hospice, and private duty nursing.

Prerequisites/Admission Requirements:

1. High School diploma or GED
2. Non-developmental placement in English (writing and reading) and strong competence in basic arithmetic.
3. Successful completion of the Nursing Entrance examination
4. Current C.P.R. certification at the professional rescuer level.
5. Priority consideration will be given to students who have completed a sequence of preparatory

college-level courses with a grade of "B" or better. These courses are specified on the DCC web site (www.dcc.vccs.edu). Go to Academic Information, then Programs of Study and click First Year Studies. The courses are indicated under the First Year Studies Certificate for LPNs.

Note: This program is academically rigorous and there are more applicants than available seats. Therefore, admission is on a selective, not first-come, first-served basis. The selection process will focus on the student's past academic performance and the results of the entrance examination. It is recommended that students enroll initially in the First-Year Studies program and then apply to this degree.

Readmission Requirements: Students desiring to be readmitted to the program will follow the same procedures outlined above. Once a student is readmitted, there are additional requirements regarding repetition of previous coursework. A copy of these additional requirements may be obtained from the Practical Nursing Department following readmission.

Program Requirements: To receive the Associate in Applied Science Degree in Health Science with a Practical Nursing Specialization, students must complete a minimum of 67 credits with a grade point average of 2.00 or better. In order to advance to the next semester, you must earn a grade of "C" or better in BIO, HLT, and individual components of all PNE courses. You must also demonstrate satisfactory attendance and performance in nursing clinical areas.

Specialization 67

Information Systems Technology

Track I: Computer Programming

Award: ASSOCIATE IN APPLIED SCIENCE

Length: A full-time student may complete this program in four semesters.

Purpose: The Associate in Applied Science Degree program in Information Systems Technology is designed primarily for persons who seek employment in the information processing field immediately upon graduation. Persons seeking initial employment in an information processing position and those in information processing who are seeking advancement will benefit from the program.

Occupational Objectives: The following occupational titles represent examples of possible employment opportunities:

- Computer Operator
- Computer Programmer
- Data Analyst
- Data Base Administrator
- Information Systems Trainer
- Junior Systems Analyst
- System Manager
- Technical Writer

Admission Requirements: In addition to the admission requirements established for the College, entry into this program requires completion of four units of high school English and one unit of college preparatory high school algebra. If you

meet the general admission requirements, a counselor will discuss with you the strengths and weaknesses of your academic background and your strengths and weaknesses as revealed by an appropriate placement test. You may correct any deficiencies in your academic preparation in the College's Developmental Studies program.

Program Description: Approximately one-half of the program includes courses in Information Systems Technology. The program includes technical courses in Information Systems Technology, courses in related areas, and general education. Instruction includes both the theoretical concepts and practical applications needed for success in Information Systems Technology. "Hands-on" training in an interactive setting is achieved through exercises and assignments. You are urged to consult with the Counseling Office and your faculty advisor in planning your program. Upon satisfactory completion of the four-semester program, you will be awarded the Associate in Applied Science Degree (AAS) in Information Systems Technology.

Program Requirements: To receive the Associate in Applied Science Degree, you must complete a minimum of 66 credits with a grade point average of 2.00 or better. The following outline represents a typical order of courses planned for full-time students.

Information Systems Technology - Track I

(Computer Programming)

Information Systems Technology

Track II: Microcomputer Specialist

Award: ASSOCIATE IN APPLIED SCIENCE

Length: A full-time student may complete this program in four semesters.

Purpose: The Information Systems Technology Track II Microcomputer Specialist program is designed primarily for persons who seek employment immediately upon graduation. Persons seeking initial employment in a microcomputer processing position and those in microcomputer processing who are seeking advancement may benefit from this program.

Occupational Objectives: The following occupational titles represent examples of possible employment opportunities:

- Microcomputer Operator
- Microcomputer Technician
- Productivity Software Specialist
- Technical/Software Support Specialist

Admission Requirements: In addition to the admission requirements established for the College, entry into this program requires completion of four units of high school English and one unit of college preparatory high school algebra. If you meet the general admission requirements, a counselor will discuss with you the strengths and weaknesses of your academic background and

your strengths and weaknesses as revealed by an appropriate placement test. You may improve any deficiencies in your academic preparation in the College's Developmental Studies program.

Program Description: Approximately one-half of the program includes courses in microcomputer software and systems applications. The program offers technical courses in microcomputer software and operations, courses in related areas, and in general education. Instruction includes both the theoretical concepts and practical applications needed for success using microcomputers. "Hands on" training in an interactive setting is achieved through exercises and assignments. You are urged to consult with the Counseling Office and your faculty advisor in planning your program. Upon satisfactory completion of the four-semester program, you will be awarded the Associate in Applied Science Degree (AAS) in Information Systems Technology Track II - Microcomputer Specialist.

Program Requirements: To receive the Associate in Applied Science Degree, you must complete a minimum of 65 credits with a grade point average of 2.00 or better. The following outline represents the typical order in which courses are planned for full-time students.

advanced standing.

Information Systems Technology

Track III: Network Specialist

Award: ASSOCIATE IN APPLIED SCIENCE

Length: A full-time student may complete this program in four semesters.

Purpose: The Associate in Applied Science Degree program in Information Systems Technology Track III - Network Specialist is designed for those persons seeking employment in the field of network technology upon graduation. Persons currently employed in another field of information processing and seeking advancement will benefit from this program. In addition, persons already employed in the networking field and preparing for certification examinations will find the material in this program helpful.

Occupational Objectives: The following occupational titles represent examples of possible employment opportunities:

- PC Support Specialist
- PC Support Technician
- Network Administrator
- Network Support Specialist
- Network Engineer
- Data Communications Specialist

Admission Requirements: In addition to the admission requirements established for the College, entry into this program requires completion of four units of high school English and

one unit of college preparatory high school algebra. If you meet the general admission requirements, a counselor will discuss with you the strengths and weaknesses of your academic background and your strengths and weaknesses as revealed by an appropriate placement test. You may correct any deficiencies in your academic preparation in the College's Developmental Studies program.

Program Description: This program contains courses which provide an emphasis on designing, creating and maintaining local area networks. Courses providing instruction in microcomputer hardware, microcomputer software, and basic electronics concepts are an integral part of the curriculum. General education and business-related courses provide the student with a perspective on the role of technology in today's society. Upon satisfactory completion of the four-semester program, the Associate in Applied Science in Information Systems Technology Track III - Network Specialist will be awarded.

Program Requirements: To receive the Associate in Applied Science Degree, you must complete a minimum of 66 credits with a grade point average of 2.00 or better. The following outline represents the typical order of courses planned for full-time students.

Information Systems Technology-Track III (Network Specialist)

Medical Laboratory Technology

Award: ASSOCIATE IN APPLIED SCIENCE

Danville Community College is a cooperating institution for the Central Virginia Community College program in Medical Laboratory Technology.

A student may complete this Associate in Applied Science Degree without moving from the Danville area. Approximately 36 credits in specified DCC courses must be completed prior to acceptance by CVCC in the Medical Laboratory Technology program. After a student is accepted by CVCC into the program, core courses in MLT are offered in the Danville area via distance learning technology, while clinical experiences are obtained in Lynchburg two days a week. Students should register initially in the First-Year Studies Certificate program to complete the required non-MDL courses.

Below is the Central Virginia Community College curriculum for the Associate in Applied Science Degree in Medical Laboratory Technology. For more details about this program, please call DCC's Division of Arts and Sciences at (434) 797-8402.

		Course Credits
First Semester		
CHM 111	*College Chemistry I	4
	¹ Social Science Elective	3
BIO 101	*General Biology I	4
ENG 111	*College Composition I	3
	¹ Humanities Elective	3
STD 100	*Orientation	1
Total		18

Second Semester		
CHM 112	*College Chemistry II	4
	¹ Social Science Elective	3
BIO 150	*Introductory Microbiology	4
MTH 120	*Introduction to Mathematics	3
SPD	*Elective	3
Total		17

Third Semester

MDL 110	Urinalysis and Body Fluids	3
MDL 125	Clinical Hematology I	3
MDL 215	Immunology	2
MDL 235	Mycology	2
MDL 236	Parasitology and Virology	2
MDL 261	Clinical Chemistry and Instrumentation I	4
Total		18

Fourth Semester		
MDL 150	Clinical Calculations & Statistics	2
MDL 216	Blood Banking	4
MDL 225	Clinical Hematology II	4
MDL 251	Clinical Microbiology I	4
MDL 265	Advanced Clinical Chemistry	2
MDL 281	Clinical Correlations	1
Total		17

Total Minimum Credits for the Associate in Applied Science Degree in Medical Laboratory Technology . . . 70

Notes:

¹For a listing of approved courses, contact the Arts & Science Division, (434) 797-8402.

²BIO 141 may substitute for BIO 101

³BIO 205 may substitute for BIO 150

⁴MTH 121 or MTH 151 may substitute for MTH 120

⁵It is recommended that students take HLT 140

*Course may be taken at Danville Community College prior to admission to the CVCC program. Students may take these courses under DCC's First-Year Studies Certificate program. Please contact the Arts & Sciences Division to schedule an appointment with an academic adviser.

Respiratory Therapy

Award: ASSOCIATE IN APPLIED SCIENCE

Danville Community College is a cooperating institution for the J. Sergeant Reynolds Community College program in Respiratory Therapy.

A student may complete this Associate in Applied Science Degree without moving from the Danville area. Approximately 30 credits in specified DCC courses must be completed prior to acceptance by JSRCC in the Respiratory Therapy program. After a student is accepted by JSRCC into the program, core courses in RTH are offered in the Danville area via distance learning technology, while clinical experiences are coordinated through Danville Regional Medical Center and other cooperating hospitals.

Below is the J. Sergeant Reynolds Community College curriculum for the Associate in Applied Science Degree in Respiratory Therapy. For more details about this program, please call DCC's Division of Arts and Sciences at (434) 797-8402.

		Lecture Hours	Lab Hours	Course Credits
First Semester				
RTH 102	Integrated Sciences for Respiratory Care	3	0	3
RTH 110	Fundamental Theory & Procedures for Respiratory Care	2	6	4
RTH 121	Cardiopulmonary Science I	3	0	3
RTH 135	Diagnostic Therapeutic Procedures I	1	3	2
RTH 145	Pharmacology for Respiratory Care I	1	0	1
ENG 111	*College Composition I	3	0	3
STD 100	*Orientation	1	0	1
	*Health or Physical Ed.	0	0	1
Total		14	9	18

Second Semester				
RTH 113	Pathophysiology of the Cardiopulmonary Sys.	3	3	4
RTH 131	Respiratory Care Theory & Procedures I	3	3	4
RTH 190	Coordinated Practice in Respiratory Care	0	20	6
RTH 199	Supervised Study in Respiratory Care	1	0	1
ENG 112	*College Composition I	3	0	3
Total		10	26	18

Third Semester				
RTH 132	Respiratory Care Theory & Procedures II	3	3	4
RTH 222	Cardiopulm. Science II	3	0	3
RTH 190	Coordinated Practice in Respiratory Care	0	10	3
RTH 215	Pulmonary Rehabilitation	1	0	1
RTH 265	Current Issues in Respiratory Care	2	0	2
NAS 161	Health Science I	3	3	4
Total		12	16	17

Fourth Semester				
RTH 290	Coordinated Practice in Respiratory Care	0	20	6
RTH 299	Supervised Study in Respiratory Care	1	0	1
NAS 162	Health Science II	3	3	4
	*Social Science Elective	6	0	6
	*Health or Physical Education	0	0	1
Total		10	26	18

Total Minimum Credits for the Associate in Applied Science Degree in Respiratory Therapy 71

*Note: Students may prepare for the above program by taking this course while registered in DCC's First Year Studies program. Please contact an academic adviser in the Arts and Sciences Division to discuss this program, (434) 797-8402.

Diploma Programs

Air Conditioning and Refrigeration
Automotive Analysis and Repair
Computer-Aided Drafting & Design
Electrical-Electronics
Option: Analyst Electronics
Option: General Electronics

Graphic Imaging Technology
Industrial Electrical-Electronic
Equipment Servicing
Industrial Maintenance Technology
Precision Machining Technology

The diploma programs differ from the associate degree programs in several ways. They may be presented at a different educational level and are developed in response to specific local employment needs, as identified by the programs' lay advisory committees and the College's Curriculum Committee. Their specific objective is to give students a variety of hands-on training experiences to prepare them for immediate employment. The diploma programs do not require the same level of general education training as the associate degree programs, so more of the required courses are directly related to the chosen field of study. There is no limit on the maximum number of credits required in these programs but they are designed to be completed after one or two years of full-time study. The types of jobs that you might expect to obtain upon completion of the degree requirements are listed on the following catalog pages which also outline the specific courses for completing each program of study.

Air Conditioning & Refrigeration

Award: DIPLOMA

Length: A full-time student may complete this program in two years.

Purpose: The Air Conditioning & Refrigeration Diploma program is designed to prepare you for employment as an air conditioning and refrigeration technician upon completion of the program.

Occupational Opportunities: The following occupational titles represent examples of possible employment opportunities:

- Air Conditioning/Heating Technician
- Sales Engineer
- Installation and Service
- Sales and Design Engineer

Admission Requirements: Entry into this curriculum may be attained by meeting the general admission requirements established for the College. If you meet the general admission requirements, a counselor will discuss with you the strengths and weaknesses of your academic background and your strengths and weaknesses as revealed by an appropriate placement test. You may correct any deficiencies in academic preparation in the College's Developmental Studies program.

Program Description: The Air Conditioning & Refrigeration program is designed to provide both the practical experience and technical knowledge required for competence as a technician in the air conditioning industry. Laboratory experience, field trips and specialized seminars give you the skill and know-how you need in order to plan, install and service air conditioning equipment. The program contains general education courses to assist you in social and business communications and to prepare you to meet the obligations of a citizen in the American democratic society.

Program Requirements: To receive a Diploma in Air Conditioning & Refrigeration, you must complete a minimum of 96 credits with a grade point average of 2.00 or better. The credits are distributed according to the following outline. This outline represents a typical order of courses taken by full-time day students. Part-time students may take courses in any desired order, except for hyphenated courses or others requiring prerequisites.

Air Conditioning & Refrigeration

Note: STD 100-Orientation is required for graduation and should be taken during the 1st semester the student is enrolled in the curriculum.

Automotive Analysis and Repair

Award: DIPLOMA

Length: A full-time student may complete this program in two years.

Purpose: The Automotive Analysis and Repair curriculum is designed to train persons for employment in the many occupations available in servicing motor transportation vehicles.

Occupational Objectives: The following occupational titles represent examples of possible employment opportunities:

- Automotive Technician
- Auto Parts Counter Clerk
- Diagnostician
- Automotive Machinist
- Service Manager
- Automotive Dealer
- Service Representative

Admission Requirements: Entry into this curriculum may be attained by meeting the general admission requirements established for the College. If you meet the general admission requirements, a counselor will discuss with you the strengths and weaknesses of your academic background and your strengths and weaknesses as revealed by an appropriate placement test. You may correct any deficiencies in academic preparation in the College's Developmental Studies program.

Program Description: The Automotive Analysis and Repair program includes theoretical and practical experiences in engine overhaul, engine tune up, emission control servicing, automatic transmission servicing, power train servicing, front-end alignment, computerized fuel systems, electrical system diagnosis, and maintenance. Diagnosis of problems with the ability to correct the specific problem located is emphasized. The program contains general education courses to assist you in social and business communications and to prepare you to meet the obligations of a citizen in the American democratic society.

Program Requirements: To receive a Diploma in Automotive Analysis and Repair, you must complete a minimum of 80 credits with a grade point average of 2.00 or better. The credits are distributed according to the following outline. This outline represents a typical order of courses taken by full-time day students. Part-time students may take courses in any desired sequence, except for hyphenated courses or others requiring prerequisites.

Computer-Aided Drafting and Design

Award: DIPLOMA

Length: A full-time student may complete this program in two years.

Purpose: The Computer-Aided Drafting and Design curriculum is designed to train persons for employment in the many occupations available in the field of drafting and design. Graduates of this program will be prepared to go into one of the following occupations.

Occupational Objectives: The following occupational titles represent examples of possible employment opportunities:

- Drafting Technician
- Drafting Supervisor
- Fixture Design Technician
- Machine Design Technician
- Engineering Assistant
- Piping Designer
- Numerical Control Technician

Admission Requirements: In addition to the admission requirements established for this College, this curriculum requires completion of four units of high school English and two units of high school mathematics. If you meet the general admission requirements, a counselor will discuss with you the strengths and weaknesses of your

academic background and your strengths and weaknesses as revealed by an appropriate placement test. You may correct any deficiencies in academic preparation in the College's Developmental Studies program.

Program Description: The Computer-Aided Drafting and Design program offers instruction in the drafting procedures, materials, manufacturing processes, and science and mathematics that is needed by the technician or engineering assistant in the field. You will receive theoretical and practical experiences in drafting principles, drafting skills, CAD Drafting (AUTOCAD) manufacturing processes, and machine and tool design. The program contains general education courses to assist you in social and business communications and to prepare you to meet the obligations of a citizen in the American democratic society.

Program Requirements: To receive a Diploma in Computer-Aided Drafting and Design you must complete a minimum of 95 credits with a grade point average of 2.00 or better. The 95 credits are distributed according to the following outline. This outline represents a typical order of courses taken by full-time day students. Part-time students may take courses in any desired sequence, except for hyphenated courses or others requiring prerequisites.

Computer-Aided Drafting and Design

		Lecture Hours	Lab Hours	Course Credits
First Semester				
STD 100	Orientation	1	0	1
ITE 116	Comp. Software Appl.	2	0	2

Note: STD 100—Orientation is required for graduation and should be taken during the first semester the student is enrolled in the curriculum.

Electrical-Electronics

Award: DIPLOMA

Length: A full-time student may complete these programs in six semesters, which includes two summers.

Purpose: The purpose of the Electrical/Electronics program is to train persons for employment in the technical positions available in business and industry related to electricity and electronics.

Occupational Objectives: The following occupational titles represent examples of possible employment opportunities:

- Communications Technician
- Electronics Technician
- Industrial Electronics Technician
- Laboratory Technician
- Instrument Technician
- Service Technician
- Computer Technician
- Broadcast Technician

Admission Requirements: To enter this curriculum requires that an individual meets the general admission requirements of the College. If you

meet the general admission requirements, a counselor will discuss with you the strengths and weaknesses of your academic background and your strengths and weaknesses as revealed by an appropriate placement test. You may correct any deficiencies in academic preparation in the College's Developmental Studies program.

Program Description: The program is designed to develop a general foundation in mathematics, electricity, electronics, theorems, networks, and fundamental circuits. The first three semesters of the Electrical/Electronics curriculum includes common core courses. Prior to the fourth semester you, with the aid of your faculty advisor, will select either Analyst Electronics Technology or General Electronics Technology. The Analyst Electronics Technology major offers a practical and "hands on" approach, while General Electronics Technology offers a theoretical and practical approach. To receive the diploma, you must complete the required credits (97) with a grade point average of 2.00 or better. The courses are distributed according to the following outlines. These outlines represent a typical order of courses taken by full-time day students.

Electrical-Electronics

(With major options)

		Lecture Hours	Lab Hours	Course Credits
First Semester				
STD 100	Orientation	1	0	1

Total Minimum Credits for a Diploma in General Electronics 97

Note: STD 100—Orientation is required for graduation and should be taken during the first semester the student is enrolled in the curriculum.

Graphic Imaging Technology

Award: DIPLOMA

Length: A full-time student may complete this program in two years, which includes one summer term.

Purpose: The Graphic Imaging Technology program is designed to prepare you for full-time employment in occupations related to the Graphics Arts Industry.

Occupational Objectives: The following occupational titles represent examples of possible employment opportunities:

- Camera Operator
- Color Separator
- Digital Photographer
- Design Artist
- Desktop Publisher
- Estimator
- Film Assembler
- Manager
- Platemaker
- Press Operator
- Salesperson

Admission Requirements: Entry into this curriculum may be attained by meeting the general admission requirements established for the College.

If you meet the general admission requirements, a counselor will discuss with you the strengths and weaknesses of your academic background and your strengths and weaknesses as revealed by an appropriate placement test. You may correct any deficiencies in academic preparation in the College's Developmental Studies program.

Program Description: The Graphic Imaging Technology program provides both the practical experience and technical knowledge required for a career in the many phases of graphics. Laboratory experiences give you the skills and understanding of the complexities of the graphic imaging trades. The curriculum includes basic courses in the humanities to assist you in social and business communications and to prepare you to meet the obligations of a citizen in the American democratic society.

Program Requirements: To receive a Diploma in Graphic Imaging Technology, you must complete a minimum of 80 credits with a grade point average of 2.00 or better. The credits are distributed according to the following outline. This outline represents a typical order of courses taken by full-time day students. Part-time students may take courses in any desired sequence, except for hyphenated courses or others requiring prerequisites.

Graphic Imaging Technology

Industrial Electrical-Electronic Equipment Servicing

Award: DIPLOMA

Length: A full-time student may complete the program in two years. The actual time required to complete this program may vary depending upon the schedule of some course offerings and the student's schedule. Students enrolled in this program may be required to take some evening courses in order to complete the program requirements.

Purpose: The purpose of the Industrial Electrical-Electronic Equipment Servicing program is to train, upgrade and increase technical competence of qualified personnel to operate, maintain and service electrical-electronic equipment.

Occupational Objectives: The following occupational titles represent examples of possible employment opportunities:

- Industrial Electronic Equipment Technician
- Industrial Equipment Service Technician
- Instrument Technician
- Laboratory Technician

Admission Requirements: To enter this curriculum requires that an individual meet the general admission requirements of the college. If you meet the general admissions requirements, a counselor will discuss with you the strengths and weaknesses

as revealed by an appropriate placement test. You may correct any deficiencies in academic preparation in the college's Developmental Studies program. A student may enroll in sophomore-level courses only after completing all freshman courses or with the permission of the instructor of each course.

Program Description: The Industrial Electrical-Electronic Equipment Servicing program is a specialized and concentrated work-study program including specialized field trips and seminars. The program has been designed for the full or part-time student and provides maximum flexibility for the business and industrial worker. The first year includes common core courses. These courses provide for a general foundation in electrical-electronic concepts, devices, networks and fundamental circuits/systems. Technical electives are provided to reinforce the career objectives and must be approved by the students faculty advisor. Students working in related areas may receive 2 to 4 credits per semester by choosing the Coordinated Internship electives.

Program Requirements: To receive a Diploma in Industrial Electrical-Electronic Equipment Servicing, you must complete a minimum of 85-86 credits with a cumulative grade point average of 2.00 or better.

Industrial Maintenance Technology

Award: DIPLOMA

Length: A full-time student may complete this program in two years.

Purpose: South Central Virginia, in its significant industrial growth, has the need for highly skilled personnel to maintain heating and air conditioning systems as well as systems that are controlled by electrical, hydraulic, pneumatic, and mechanical devices. The industrial maintenance technology curriculum is designed to prepare students to repair and maintain machinery, electrical wiring and fixtures, hydraulic and pneumatic devices, and program logic controller systems found in industrial establishments. The curriculum is built upon a balanced program of studies drawn from a variety of disciplines in the electrical, mechanical, hydraulics and pneumatics and industrial fields and a solid core of general courses.

Occupational Opportunities: The following occupational titles represent examples of possible employment opportunities:

- Industrial Maintenance Technician
- Maintenance Mechanics

Admissions Requirements: Entry into this curriculum may be attained by meeting the general

admission requirements established for the college. If you meet the general admission requirements, a counselor will discuss with you the strengths and weakness of your academic background and your strengths and weakness as revealed by an appropriate placement test. You may correct any deficiencies in academic preparation in the College's Developmental Studies program.

Program Description: The Industrial Maintenance Technology program is designed to provide both the practical experience and technical knowledge required for competence as a maintenance technician. In addition to courses in a variety of technical fields, the program also contains general education courses to assist students in developing social and business communications skills.

Program Requirements: To receive a Diploma in Industrial Maintenance Technology, you must complete a minimum of 81 credits with a 2.00 grade point average or better. The 81 credits are distributed according to the outline below. The outline represents a typical order of courses taken by full-time day students. Part-time and/or evening students may take courses in any desired sequence, except for hyphenated courses or others requiring prerequisites.

Notes: ¹ Students who enroll in AIR 231 should take AIR 195 in the fourth semester.

² Students who enroll in AIR 213 should take AIR 214 in the fourth semester.

Precision Machining Technology

Award: DIPLOMA

Length: A full-time student may complete the program in two years.

Purpose: The Precision Machining Technology program is designed to train persons for employment in the many occupations available in industrial manufacturing shops.

Occupational Objectives: The following occupational titles represent examples of possible employment opportunities:

- Machine Tool Operator
- Machinist
- Mold Maker
- Shop Manager
- Tool and Die Maker

Admission Requirements: Entry into this curriculum may be attained by meeting the general admission requirements established for the College. If you meet the general admission requirements, a counselor will discuss with you the strengths and weaknesses of your academic background and your strengths and weaknesses as revealed by an appropriate placement test. You may correct any deficiencies in academic preparation in the College's Developmental Studies program.

Program Description: The Precision Machining Technology program provides training in basic machine shop operations, materials, and manufacturing processes. You will receive theoretical and practical experiences in the care and use of tools, care and use of machines, working to proper tolerances, technical drafting, computer numerical control programming, CAD-CAM training, metallurgy, tool making, jig and fixture design, precision measurements, and the development of leadership qualities. The program contains general education courses to assist you in social and business communications and to prepare you to be a leader and team player in high-tech manufacturing industries.

Program Requirements: To receive a Diploma in Precision Machining Technology you must complete a minimum of 81 credits with a grade point average of 2.00 or better. The credits are distributed according to the following outline. This outline represents a typical order of courses taken by full-time day students. Part-time students may take courses in any desired sequence, except for hyphenated courses or others requiring prerequisites.

Certificate Programs

Air Conditioning &
Refrigeration Servicing
Auto Body Mechanics
Child Care
First-Year Studies

Industrial Electrical Principles
Industrial Electronic Principles
Maintenance Mechanics
Office Information Processing
Practical Nursing

The certificate programs differ from the associate degree programs in several ways. They may be presented at a different educational level and are developed in response to specific local employment needs, as identified by the programs' lay advisory committees and the College's Curriculum committee. Their specific objective is to give students a variety of hands-on training experiences to prepare them for immediate employment. The certificate programs do not require the same level of general education training as the associate degree programs, so more of the required courses are directly related to the chosen field of study. There is no limit on the maximum number of credits required in these programs, but they are all designed to be completed in one year of full-time study. The types of jobs which you might expect to obtain upon completion of the certificate requirements are listed on the following catalog pages. Specific courses for completing each program of study are also included.

Air Conditioning & Refrigeration Servicing

Award: CERTIFICATE

Length: Variable

Purpose: The Air Conditioning & Refrigeration Servicing Certificate program is designed to train persons to service equipment currently in the field and to give them a background that will enable them to cope with new developments as they occur.

Occupational Objectives: The following occupational titles represent examples of possible employment opportunities:

- Air Conditioning Technician
- Circuits & Controls Service Technician
- Air Conditioning/Heating Technician
- Installation and Service Technician
- Refrigeration Service Technician

Admission Requirements: Entry into this curriculum may be attained by meeting the general admission requirements established for the College. If you meet the general admission requirements, a counselor will discuss with you the strengths and weaknesses of your academic background and your strengths and weaknesses as revealed by an appropriate placement test. You may correct any

deficiencies in academic preparation in the College's Developmental Studies program.

Program Description: The program is designed for both beginners and persons presently employed in the air conditioning and refrigeration field. It provides the practical experience and the technical knowledge required for competence as a service technician in the air conditioning and refrigeration field. The student will receive specialized seminars, theoretical and practical training in basic electricity, circuits and controls (electric, electronic, and pneumatic), combustion devices (oil burners and gas burners), refrigeration and air conditioning (residential and commercial).

Program Requirements: To receive a Certificate in Air Conditioning & Refrigeration Servicing, you must complete a minimum of 50 credits with a grade point average of 2.00 or better. The credits are distributed according to the following outline. This outline represents a typical order of courses taken by part-time students. Part-time and/or evening students may take courses in any desired sequence, except for hyphenated courses or others requiring prerequisites.

Auto Body Mechanics

Award: CERTIFICATE

Length: A full-time student may complete this program in one year.

Purpose: The program in Auto Body Mechanics is designed to provide the student with the knowledge and skill necessary to obtain full-time employment upon completion of the program of studies.

Occupational Objectives: The following occupational titles represent examples of possible employment opportunities:

- Auto Body Mechanic
- Painter
- Service Manager
- Insurance Adjuster

Admission Requirements: Entry into this curriculum may be attained by meeting the general admission requirements established for the College. If you meet the general admission requirements, a counselor will discuss with you the strengths and weaknesses of your academic background and your strengths and weaknesses as revealed by an appropriate placement test. You may correct any deficiencies in academic preparation in the College's Developmental Studies program.

Program Description: The Auto Body Mechanics program is designed to provide training in all phases of auto body mechanics. Emphasis is placed on the solution of every day problems that arise in auto body repair, such as blistering, chipping, cracking, blushing, pin holes, panel replacement, and the use of plastics. You will be taught to use up-to-date equipment and materials that are being constantly developed, as well as new methods for detecting and repairing damage. The program contains general education courses to assist you in social and business communications and to prepare you to meet the obligation of a citizen in the American democratic society.

Program Requirements: To receive a Certificate in Auto Body Mechanics, you must complete a minimum of 48 credits with a 2.00 grade point average or better. The credits are distributed according to the following outline. This outline represents a typical order of courses taken by full-time students. Part-time students may take courses in any desired sequence, except for hyphenated courses or others requiring prerequisites.

	Lecture Hours	Lab Hours	Course Credits
First Semester			
AUB 111 Automobile Body Theory & Shop Pract. I	5	9	8
AUB 116 Auto Body Repair	3	3	4
ENG 131 Technical Report Writing I	3	0	3

Child Care

Award: CERTIFICATE

Length: A full-time student may complete this program in one year.

Purpose: The Child Care curriculum is designed both for persons already working in the field and for students preparing for initial employment in child care and human services facilities. The curriculum also allows appropriate course substitutions for those students interested in pursuing academic programs beyond the Certificate in Child Care.

Admission Requirements: All applicants must have a high school diploma or the equivalent for admission to the Child Care program. Students with academic weaknesses, as determined by the college-wide placement test, can correct these in the College's Developmental Studies program.

Program Description: This curriculum requires coursework in the areas of humanities, social sciences, education, and health. Students will be given the opportunity to talk with an academic advisor about goals and will be assisted by an advisor in preparing the necessary schedules to fulfill these goals. Appropriate optional courses may be substituted in the curriculum to coincide with the student's goals if approved by the Division Dean.

Program Requirements: To receive a Certificate in Child Care, the student must complete a minimum of 49 credits with a grade point average of 2.00 or better. The following outline represents a typical order of courses taken by full-time students. Part-time students may take courses in any desired sequence, except for hyphenated courses or others requiring prerequisites in the Course Descriptions section of this Catalog.

*The Seminar and Project (SOC 298 or CHD 298) must be taken during the final semester. Requests for exceptions should be addressed to the academic advisor, who will forward the request to the Dean.

First-Year Studies

Award: CERTIFICATE

Length: A full-time student may complete this program in one year.

Purpose: The First-Year Studies Certificate program is designed for students who desire or need to complete one year of academic studies in preparation for admission to medical, dental or other fields requiring a firm foundation in college-level, academic courses. Students who wish to pursue associate degrees, advanced certificates, or bachelor's degrees in nursing, dental hygiene, medical laboratory technology, radiography and related fields may enroll in this certificate program to complete academic coursework typically required by programs in these areas. Course selection in consultation with an academic adviser is required to ensure that students complete courses required in their projected program of study.

Admission Requirements: Entry into this curriculum may be attained by meeting the general admission requirements established for the College. Students must take developmental coursework as required by placement testing, long-term educational goals, and the college-level coursework which they would like to pursue.

Program Description: This program consists of a minimum of 30 credit hours of instruction distributed into general education and elective course areas. In the general education area, students must take college composition, a 100-level or above math course, one social science course, one natural science course, and one humanities or arts course. Students are then allowed to select 12 credit hours of coursework which prepares them directly for the program to which they would like to transfer. Students are also required to take a computer elective and the college's orientation course. All courses should be selected in consultation with an academic adviser in the

Arts and Science Division who will have recommended sequences of coursework for various medical and dental programs. Completion of the appropriate sequence of courses for particular programs may benefit students by decreasing their course load on a semester-by-semester basis in their projected programs as well as prepare them for the specialized coursework in many fields of study.

Program Requirements: To receive a Certificate in First-Year Studies, students must complete a minimum of 30 credits with a grade point average of 2.00 or better. Credits for this certificate may be distributed according to the sequence of courses below:

First-Year Studies

Total Minimum Credits for the Certificate in First-Year Studies 30

Industrial Electrical-Electronic Principles

Award: CERTIFICATE IN INDUSTRIAL ELECTRICAL PRINCIPLES OR CERTIFICATE IN INDUSTRIAL ELECTRONIC PRINCIPLES.

Length: A full-time student may complete either program in three semesters, which includes one summer term.

Purpose: The purpose of the Industrial Electrical Principals and the Industrial Electronic Principals curricula are designed to train industrial workers who have the need or desire to keep up with occupational requirements or to learn a necessary skill in the Electrical-Electronic field.

Occupational Objectives: The following occupational titles represent examples of possible employment opportunities:

- Assembler
- Electrical Helper
- Electrician
- Electrical-Electronic Tester
- Salesperson/or Serviceperson

Admission Requirements: To enter these curricula require that an individual meet the general admission requirements for the College. If you meet the general admission requirements, a counselor will discuss with you the strengths and weaknesses of your academic background and your strengths and weaknesses as revealed by an appropriate placement test. You may correct any deficiencies in academic preparation in the College's Developmental Studies program.

Program Description: The Industrial Electrical Principals and the Industrial Electronic Principals curricula are designed for full-time or part-time students and allow flexibility for the industrial worker. These programs will prepare you for industrial employment and are also designed to aid those who need to keep abreast of occupational changes and requirements. The two programs offer a variety of field trips and seminars. You must complete the Industrial Electrical Principles Certificate requirements or have had equivalent courses and/or occupational experience prior to entering the Industrial Electronic program.

Program Requirements: To receive the Certificate in Industrial Electrical Principles, you must complete a minimum of 39 credits with a grade point average of 2.00 or better. To receive the certificate in Industrial Electronic Principles, you must complete a minimum of 37 credits with a 2.00 or higher grade point average. The credits are distributed according to the following outlines. These outlines represent a typical order of courses taken by full-time day students.

Maintenance Mechanics

Award: CERTIFICATE

Length: Variable

Purpose: The Maintenance Mechanics program provides training in the mechanical and electrical fields. The program provides training for persons seeking employment, preparing for promotion, or desiring a broader knowledge of the industrial maintenance field.

Occupational Opportunities: The following occupational titles represent examples of possible employment opportunities:

- Maintenance Mechanic
- Maintenance Assistant

Admission Requirements: See a college counselor for the admissions requirements for this program. If you meet the general admission requirements, a counselor will discuss with you the strengths and weaknesses of your academic background and your strengths and weaknesses as revealed by an appropriate placement test. You may correct any deficiencies in academic preparation in the College's Developmental Studies program.

Program Description: The curriculum is designed to assist students in entering technical careers in industrial maintenance. Academic and technical instruction and laboratory experiences provide a balance between theory and practice. The program contains general education courses to assist you in social and business communications and to prepare you to meet the obligations of a citizen in the American democratic society.

Program Requirements: To receive a Certificate in Maintenance Mechanics you must complete a minimum of 45 credits with a grade point average of 2.00 or better. The credits are distributed according to the following outline. The part-time and/or evening student may take courses in any desired sequence, except for hyphenated courses or others requiring prerequisites.

		Lecture Hours	Lab Hours	Course Credits

Office Information Processing

Award: CERTIFICATE

Length: A full-time student may complete this program in one year, which includes one summer term.

Purpose: The Office Information Processing program is designed for persons who are seeking employment in the information processing field immediately upon completion of the community college program. Persons who are seeking initial employment and those presently employed in information processing who are seeking advancement, or who want to improve or update skills, will benefit from this program.

Occupational Objectives: The following occupational titles represent examples of possible employment opportunities:

- Computer Operator Trainee
- Data Entry Clerk
- File Clerk
- Receptionist

Admission Requirements: You may be admitted to this program by meeting the admission requirements established for the College. If you meet the general admission requirements, a counselor will discuss with you the strengths and weaknesses of your academic background and your strengths and weaknesses as revealed by an appropriate placement test. You may correct any deficiencies in academic preparation in the College's Developmental Studies program.

Program Description: The Office Information Processing program includes technical courses in related areas and general education courses. Instruction includes both the theoretical concepts and practical applications needed for success in information processing.

Program Requirements: To receive the Certificate in Office Information Processing you

must complete a minimum of 50 credits with a grade point average of 2.0 or better. The credits are distributed according to the following outline. This outline represents a typical order of courses taken by full-time day students. Part-time and/or evening students may take courses in any desired order, except for sequence courses or others requiring prerequisites.

Practical Nursing

Award: CERTIFICATE

Length: A full-time student may complete this program in three semesters.

Purpose: The Practical Nursing curriculum is designed to prepare beginning practitioners with the knowledge and skills to care for clients of all age groups. In Virginia, a state license is required for this profession. For more information please contact the Virginia Board of Nursing. Upon completion of the program, graduates are eligible to take the National Council Licensure Examination (NCLEX-PN). Utilizing the nursing process, graduates will:

1. Assist in assessing the client's physical and mental health.
2. Participate in planning and implementing the health care plan.
3. Record and report the nursing care rendered and the client's response to care.
4. Communicate effectively with clients, their families, and other members of the health care team.
5. Recognize legal and self-limitations in the provision of patient care.
6. Serve as contributing members in the community.
7. Develop professionally to their fullest potential by taking advantage of available educational opportunities.

Occupational Objectives: Opportunities for the Licensed Practical Nurse include employment in hospitals, nursing homes, clinics, day-care centers, Civil Service, doctors, offices, industry, and private duty nursing.

Prerequisites/ Admission Requirements:

1. High school diploma or a State approved equivalent education.
2. Acceptable admissions test scores (Asset scores) or satisfactory completion of required developmental studies courses.
3. Completion of high school chemistry with a "C" or better.

4. Successful completion of Nursing Entrance examination.
5. College GPA, if applicable.
6. Must have current CPR certification at the professional rescuer level.
7. Priority consideration for completion of a recommended sequence of preparatory college-level courses with a grade of "C" or better. Please contact the Practical Nursing Department for a list of these courses.

Note: The Practical Nursing curriculum is an academically rigorous program and there are more applicants than available seats in the program. Therefore, admission is on a selective basis, not first-come, first-served. The selection process considers student academic background as well as timely and successful completion of Developmental Studies program requirements. Students completing First Year Studies in comparable programs will be given priority consideration. Please contact the Division of Arts & Sciences at (434)797-8402 for the selection criteria.

Readmission Requirements: Students wishing to be readmitted to the program will follow the same procedures outlined above. Once a student is readmitted, there are additional requirements regarding repetition of previous coursework. A copy of these additional requirements may be obtained from the Practical Nursing Department following readmission.

Program Requirements: To receive the Certificate in Practical Nursing, you must complete a minimum of 54 credits with a grade point average of 2.00 or better. In order to advance to the next semester, you must earn a grade of "C" or better in BIO, HLT, and individual components of all PNE courses. You must also demonstrate satisfactory attendance and performance in nursing clinical areas.

Award: CERTIFICATE

Length: Variable for part-time students. The options available represent the equivalent of one or more semesters of full-time community college work.

Purpose: A significant percentage of the student population served by the community college are part-time students ordinarily taking courses offered during the evening hours. Many students seek post-secondary programs of study that are less than the conventional one- or two-year programs designed primarily for the College's full-time student population. Many occupational, industrial, or student interest content areas within the DCC region do not typically require pre-service or in-service post-secondary preparation extending to one- and two-years of full-time studies. The Career Studies Certificate Program is a response to the non-conventional short-term program of study needs of many students within the College's region.

The programs are designed as a series of specialized program options. These options represent a variety of career and academic interest course areas. They are intended to represent the minimum amount of college coursework considered representative of these fields of study. Each of the program options is designed as a distinct "mini-curriculum" to meet minimum vocational skills.

Admission Requirements: Admission to these Career Studies Certificate programs is based upon the general requirements for admission to the College. Deficiencies in general education may require enrollment in Developmental Studies. The student is expected to select one of the available program options during admission and registration.

Advanced Manufacturing Concepts

Purpose: The Advanced Manufacturing Concepts Career Studies Certificate is designed to provide a program of study in modern manufacturing methods, quality and teamwork skills.

Occupational Objectives: Engineering Technician I

Admission Requirements: Admission to the Advanced Manufacturing Concepts Career Studies Certificate is based upon the general requirements for the college. If a student meets the general admission requirements, a counselor will discuss the student's academic strengths and weaknesses. Any academic deficiencies may be corrected in the College's Developmental Studies program.

Program Requirements: To receive an Advanced Manufacturing Concepts Career Studies Certificate you must complete 15 credits of the listed courses.

	Course Credits
IND 145 Introduction to Metrology	3
IND 137 Teamwork and Problem Solving	3
IND 181 World Class Manufacturing	3
IND 235 Statistical Quality Control	3
IND 298 Capstone Project	3
Total Minimum Semester Credit Hours	15

American Sign Language

Occupational Objective: The American Sign Language (ASL) Certificate Program is designed to train members of the community to communicate proficiently in ASL as well as enable them to develop an understanding of Deaf Culture. The ASL Career Studies Certificate Program prepares students, parents, educators, social workers, etc. to serve people who are Deaf or Hard of Hearing in the workforce. The program will also assist in making the work environment "Deaf-friendly" and accommodating to those who are Deaf or Hard of Hearing.

		Lecture Hours	Lab Hours	Course Credits
STD 100	Orientation	1	0	1
ASL 101	American Sign Language I	3	0	3
ASL 102	American Sign Language II	3	0	3
ASL 201	American Sign Language III	3	0	3
ASL 202	American Sign Language IV	3	0	3
ASL 125	History of U.S. Deaf Community	3	0	3
ASL 115	Fingerspelling and Number Use in ASL	2	0	2
Total Credits				18

Automotive Concepts

Occupational Objective: The Career Studies Certificate in Automotive Concepts is designed to give a basic understanding of various automotive systems through a variety of one-credit courses. Graduates can use these courses to update their skills or open new areas of automotive repair expertise.

The program is structured within the following courses:

		Lab Hours	Course Hours	Course Credits
AUT 195	Basic Automotive Fix-it Class			1
AUT 195	Automotive Braking Concepts			1
AUT 195	Automotive Steering Suspension & Alignment			1
AUT 195	Basic Engine Operation and Repair			1
AUT 195	Engine Performance and Tune-up			1
AUT 195	Automotive Air Conditioning & Retrofitting I			1
AUT 195	Automotive Air Conditioning & Retrofitting II			1
WEL 120 or	Fundamentals of Welding			
AUB 195	Auto Body Refinishing (or approved elective)			2 3
Total Minimum Semester Credit Hours				9-10

Note: Students may substitute 3- or 4-credit automotive courses to specialize in areas such as engine rebuilding, fuel systems, transmissions, computerized engine systems or suspension and alignment.

Building Construction Trades

Purpose: The career studies program in Building Construction Trades is designed to help entry-level employees in construction-related trades obtain job-specific knowledge and skills to improve their work performance and career status within the industry. The curriculum provides an understanding of the common principles and practices of the modern construction industry, as well as specific knowledge and skills in a trade area selected by the student. Five specializations are available: Electrical, HVAC, Plumbing, Carpentry and Masonry. The courses contained in these programs are applicable to fulfilling the related education requirements that are prerequisite to taking the Journeyman or Master Certification tests. Information on specific trade certification requirements may be obtained from the National Assessment Institute (NAI), Toll-Free in Virginia 1-800-356-3381.

Occupational Objectives: Opportunities for employment and license as a Journeyman or Master's Level Tradesman in the areas of Electrical, HVAC, Plumbing, Carpentry and Masonry fields.

Admission Requirements: Admission to the Building Construction Trades Career Studies Certificate Program is based upon the general requirements for admission to the college. Deficiencies in general education may require enrollment in Developmental Studies. The student is expected to select one of the available program options during admission and registration.

Program Requirements: Students entering any of the options must complete the three general education core courses as listed and all courses included in each option.

		Courses Credits
MTH 103	Applied Technical Math	3
BLD 111	Blueprint Reading	3
SAF 120	Safety & Health Standard Regulations and Codes	3

Total Minimum Credits		10	8	15

Commercial Art

Occupational Objective: The Career Studies Certificate in Commercial Art is designed to prepare individuals for employment as graphic artists and/or designers in advertising agencies, sign shops, or in the printing industry. Procedures and processes will be covered in both theory and hands-on application.

Students who complete the program will develop competencies in the following areas:

1. Basic drawing skills;
2. Application of design techniques for commercial purposes;
3. Use of airbrush in commercial art applications;
4. Paste up skills related to camera-ready printed materials;
5. Silkscreen stencil techniques with emphasis on design;
6. Desktop publishing techniques including Freehand and PageMaker.

The program is structured within the following courses:

		Lecture Hours	Lab Hours	Course Credits
PNT 110	Survey of Repo. Proces.	3	2	3
ART 121	Drawing Techniques I	2	2	3
ART 198	Airbrushing Techniques	1	2	2
PNT 221	Layout & Design I	2	3	3
ART 195	Silkscreen Printing I	1	2	2
PNT 211	Electronic Publishing I	2	2	4
Total Minimum Semester Credit Hours				17

Educational Interpreter Training

The Educational Interpreter Career Studies Certificate program is designed to train individuals with proficiency in American Sign Language to become educational interpreters. The focus is on developing the processing skills necessary to proceed from being "signer" to becoming a transliterator/interpreter. Coursework will focus on processing skills, transliterating skills, and continued sign vocabulary development as well as a specialized focus on interpreting in the educational setting. The objective of this career studies certificate is to prepare individuals to take the Virginia Quality Assurance Screening (VQAS).

Occupational Objective: Occupational opportunities include working as an interpreter in the public schools as well as working as an interpreter in private practice. A prerequisite to this program is the American Sign Language Career Studies certificate or approval of the coordinator/program director.

	Course Credits	
EIP 181	Pre-Interpreting Skills I	1
EIP 201	Linguistics of American Sign Lang I	1
EIP 202	Linguistics of American Sign Lang II	1
EIP 211	Sign-to-Voice Transliterating I	1
EIP 212	Sign-to-Voice Transliterating II	1
EIP 213	Sign-to-Voice Transliterating III	1
EIP 214	Sign-to-Voice Transliterating IV	1
EIP 231	Expressive Transliterating I	1
EIP 232	Expressive Transliterating II	1
EIP 233	Expressive Transliterating III	1
EIP 234	Expressive Transliterating IV	1
EIP 280	Interactive Transliterating	1
EIP 289	Prep. for Performance Evaluation-Transliteration	1
EIP	Elective	1
EIP	Elective	1
Total Credits		15

Total Minimum Credits for a Career Studies Certificate in Interpreter Education Program..... 15

NOTE: These courses do NOT articulate to the ASL/INT/SCM curriculum.

Electives:

	Course Credits	
EIP 101	Orientation to Deafness I	1
EIP 102	Orientation to Deafness II	1
EIP 111	Intro. to Expr. & Rec. Fingerspelling & Numbers	1
EIP 112	Adv. Expr. & Rec. Fingerspelling & Numbers	1
EIP 150	Expressive Voc. Building & Exp. Text Analysis I	1
EIP 151	Expressive Voc. Building & Exp. Text Analysis II	1
EIP 160	Receptive Voc. Building & Rec. Text Analysis I	1
EIP 161	Receptive Voc. Building & Rec. Text Analysis II	1
EIP 182	Pre-Interpreting Skills II	1
EIP 203	Linguistics of American Sign Language III	1
EIP 215	Adv. Sign-to-Voice Interpreting I	1
EIP 216	Adv. Sign-to-Voice Interpreting II	1
EIP 235	Adv. Expressive Transliterating I	1
EIP 236	Adv. Expressive Transliterating II	1
EIP 240	Interpreting in Educational Setting	1
EIP 242	Interpreting in Special Settings	1
EIP 245	Interpreter Ethics & Responsibilities	1
EIP 261	Intro. to English-to-ASL Interpreting I	1
EIP 262	English-to-ASL Interpreting II	1
EIP 263	English-to-ASL Interpreting III	1
EIP 264	English-to-ASL Interpreting IV	1
EIP 281	Interactive Interpreting	1
EIP 291	Prep. for Performance Evaluation - Interpreting	1

Note: This career studies certificate creates a flexible, accessible and unique template that can be offered by any of the 23 community colleges within the VCCS, specifically targeting those areas that have been historically underserved or not served by the current VCCS programs. This career studies certificate also serves to resolve issues related to the lack of qualified instructors/professors by accessing the current pool of qualified instructors/professors.

Electrical Concepts

Occupational Objective: The Electrical Concepts program is designed for the investigation of career possibilities, retraining for a career change, upgrading occupational skills and/or to provide entry level skills in the electrical field. Graduates of this program will be eligible for further specialized training in the electrical field or to become more productive in their present occupation. Other opportunities for the graduate are available in sales and installation of electrical components and equipment.

The program is structured within the following courses:

		Lecture Hours	Lab Hours	Course Credits
ELE 199	Supervised Study in Electrical Calculations I	3	0	3
ELE 113	Electricity I	3	0	3
ELE 123	Electrical Applications I	1	2	2
ELE 199	Supervised Study in Electrical Calculations II	3	0	3
ELE 114	Electricity II	3	0	3
ELE 124	Electrical Applications II	1	2	2
ELE	Approved Tech. Elective	-	-	3
Total Minimum Semester Credit Hours				19

Electronic Concepts

Occupational Objective: The Electronic Concepts program is designed for the investigation of career possibilities, retraining for a career change, upgrading occupational skills and/or to provide entry-level skills in the electrical field for those students who are proficient in electrical concepts. Graduates of this program will be eligible for further specialized training in the electrical field or to become more productive in their present occupation. Other opportunities for the graduate are available in sales and installation of electrical/electronic components and equipment.

The program is structured within the following courses:

		Lecture Hours	Lab Hours	Course Credits
ETR 141	Electronics I	3	0	3
ETR 123	Electronic Applications I	1	2	2
ETR 142	Electronics II	3	0	3
ETR 124	Electronic Applications II	1	2	2
ELE/ETR	Approved Tech. Electives	-	-	9
Total Minimum Semester Credit Hours				19

*Student must be proficient in electrical concepts.

Emergency Medical Training

Occupational Objective: The Career Studies Certificate in Emergency Medical Training is designed to prepare individuals to work in a variety of job entry-level positions in the broad field of health services. Job opportunities may be available with ambulance services, nursing homes, and home-health care sales and services. This program meets the educational requirements to sit for the Emergency Medical Technician Examination for State (Virginia) certification.

The program is structured within the following courses:

		Lecture Hours	Lab Hours	Course Credits
EMT 111	Emergency Medical Technology I	2	2	3
EMT 112	Emergency Medical Technology II	2	2	3
PSY 126	Psychology for Business and Industry	3	0	3
Total Minimum Semester Credit Hours				9

Gerontology

Occupational Objective: The Career Studies Certificate in Gerontology is designed to provide students with the skills and knowledge needed to work with an aging population in both nursing and community settings. To receive the Certificate in Gerontology, a 12-credit sequence of courses must be completed and the student must have a grade point average of 2.00 or better. The credits are distributed according to the following outline:

		Course Credits
NUR 114	Geriatric Nursing	3
HLT 270	Health and Well-Being of the Older Adult	3
HMS 231	Gerontology I	3
HMS 232	Gerontology II	3
Total Minimum Semester Credit Hours		12

Graphic Communications

Occupational Objective: The Career Studies Certificate in Graphic Communications is designed to prepare individuals for various entry-level positions or to upgrade existing skills to meet technology trends in the printing industry. Procedures and processes will be covered in both theory and/or hands-on application.

Students who complete the program will develop competencies in the following areas:

- Mathematical concepts for practical application
- Basic understanding of various printing processes
- Desktop publishing techniques including QuarkXPress and PageMaker
- Understanding of the varieties, properties, handling and printing characteristics of paper and inks
- Understanding of safety and health issues and of the OSHA Hazard Communication Standard
- Understanding of the current trends in technology in the field

The program is structured in the following courses:

	Lecture Hours	Lab Hours	Course Credits
PNT 295 Mathematics for Graphic Communications	3	0	3
PNT 110 Survey of Reproduction Processes	3	2	3
PNT 211 Electronic Publishing I	2	2	3
PNT 295 Paper and Ink Concepts	2	0	2
PNT 295 Safety and Health Issues	2	0	2
PNT 295 Industry Trends	2	0	2
Total Minimum Semester Credit Hours			15

Interior Decorating

Occupational Objective: The Career Studies Certificate in Interior Decorating is to give the student the basic knowledge and occupational skills to pursue employment at the job entry level. Positions may include serving as interior decorator trainee/assistant, interior designer assistant, and residential or business interior decorator sales.

The program is structured within the following courses:

	Lecture Hours	Lab Hours	Course Credits
DEC 100 Introduction to Interior Decorating	3	0	3
DEC 198 Seminar and Project	3	0	3
PSY 126 Psychology for Business and Industry	3	0	3
Total Minimum Semester Credit Hours			9

Legal Assisting

Occupational Objective: The Legal Assisting Career Studies Certificate gives the student the basic knowledge and occupational skills to conduct legal research under the supervision of an attorney and to prepare pleadings and trial notebooks.

		Lecture Hours	Lab Hours	Course Credits
AST 117	Keyboarding for Computer Usage	1	0	1
AST 238	Microsoft Word	2	0	2
AST 239	Microsoft Word Lab	0	2	1
LGL 110	Intro. To Law and the Legal Assistant	3	0	3
LGL 125	Legal Research	3	0	3
LGL 230	Legal Transactions	3	0	3
LGL 216	Trial Preparation and Discovery Practice	3	0	3
Total Minimum Semester Credit Hours				16

Manufacturing Leadership

Purpose: The Manufacturing Leadership Career Studies Certificate is designed to provide a program of study in modern manufacturing methods, quality, teamwork and leadership skills.

Occupational Objectives: Engineering Technician and First Line Supervisor

Admission Requirements: Admission to the Manufacturing Leadership Career Studies Certificate is based upon the general requirements for the college. If a student meets the general admission requirements, a counselor will discuss the student's academic strengths and weaknesses. Any academic deficiencies may be corrected in the College's Developmental Studies program.

Program Requirements: To receive a Manufacturing Leadership Career Studies Certificate you must complete 14 credits of the listed courses.

		Course Credits
IND 181	World Class Manufacturing	3
IND 137	Teamwork and Problem Solving	3
IND 235	Statistical Quality Control	3
PSY 126	Psychology for Business & Industry	3
IND 298	Capstone Project	2
Total Minimum Semester Credit Hours		14

Medical Terminology

Occupational Objective: The Career Studies Certificate in Medical Terminology is an employment option for clerk-typists and stenographers planning to seek employment as a medical records specialist in a medical facility, such as a hospital, medical clinic, or physician's office. Those entering the program should be proficient in typing and general secretarial skills or in the process of acquiring these skills.

The program is structured within the following courses:

		Lecture Hours	Lab Hours	Course Credits
HLT 143	Medical Terminology I	3	0	3
HLT 144	Medical Terminology II	3	0	3
PSY 126	Psychology for Business and Industry	3	0	3
Total Minimum Semester Credit Hours				9

Metal Processing

Occupational Objective: The Metal Processing program is both broad and detailed enough to permit the graduate to fill a number of jobs in a company's machine shop maintenance department, yet detailed enough to ensure that the student fully understands different types of metal processing. Layout procedures and processes on the lathe, drill press, grinding machines, and milling machines are covered in both theory and practice.

The program is structured within the following courses:

		Lecture Hours	Lab Hours	Course Credits
DRF 160	Mach. Blueprint Reading	3	0	3
MAC 161	Mach. Shop Practices I	2	3	3
MAC 162	Mach. Shop Practices II	2	3	3
MAC 163	Mach. Shop Practices III	2	3	3
MAC 164	Mach. Shop Practices IV	2	3	3
WEL 120	Fundamentals of Welding I	1	3	2
Total Minimum Semester Credit Hours				17

Microcomputer Software

Occupational Objective: This Career Studies Certificate in Microcomputer Software is designed to give a basic understanding of various microcomputer software through a variety of applications in word processing, spreadsheets, database, and graphic design. Graduates can use these courses to update their skills or open new areas of microcomputer expertise.

	Course Credits
AST 195 Microsoft Outlook Express	1
AST 238/239 Microsoft Word for Windows	3
AST 260 Powerpoint	2
ITE 140 Spreadsheet Software	3
ITE 182 User Support/Helpdesk Principles	3
Select two of the following:	
AST 151 Microsoft Publisher	1
AST 195 Microsoft FrontPage 2000 (Web Editor)	3
ITE 150 Desktop Database Software	4
Total Minimum Credit Hours	16-20

Motorsports Management

Occupational Objective: The Motorsports Management Career Studies program is offered in cooperation with Patrick Henry Community College through a unique articulation arrangement. The program is structured within the following courses.

	Lecture Hours	Lab Hours	Course Credits
MTS 100 Intro. to Motorsports Management	3	0	3
MTS 110 Motorsports Marketing	3	0	3
BUS 111 Principles of Supervision	3	0	3
BUS 295 'Motorsports Technology I	3	0	3
MTS 125 'Motorsports Technology II	3	0	3
MTS 205 Motorsports Safety, Environmental & Transportation Issues	3	0	3
ITE 115 Basic Computer Literacy	3	2	4
MKT 100 Principles of Marketing	3	0	3
PSY 126 Psychology for Business and Industry	3	0	3
Total Minimum Semester Credit Hours			28

'Student may substitute AUT courses approved by advisor

Network Technology

Occupational Objective: The Network Technology Career Studies Certificate Program is designed for individuals employed in the field of information systems who wish to upgrade their skills. It is also designed for individuals with previous occupational or academic experience relating to computing systems who may be contemplating a career change.

The program is structured within the following courses:

		Lecture Hours	Lab Hours	Course Credits
ITN 154	Networking Fundamentals CISCO	4	0	4
ITN 155	Introductory Routing - CISCO	4	0	4
ETR 228	Computer Troubleshooting and Repair	2	2	3
ITN 114	Windows XP Prof.	3	0	4
ITN 115	Windows 2003 Server (SER)	3	2	4
ITN 116	Windows 2003 Network Infra. Adm.	3	2	4
Total Minimum Semester Credit Hours				23

*Advanced standing credit may be awarded to those persons with a demonstrated proficiency in Microsoft Windows 95.

Networking with CISCO

Occupational Objective: The Networking with Cisco Career Studies Certificate program is designed to give an understanding of the various components of CISCO networking through the four levels of the CISCO courses. Graduates can use these courses to complete the CISCO Network Administrator (CCNA) examination, update their skills or open new areas of expertise with networking through the use of CISCO.

The program is structured within the following courses:

		Courses Credits
ITN 154	Networking Fundamentals (CISCO)	4
ITN 155	Introductory Routing (CISCO)	4
ITN 156	Basic Switching & Routing (CISCO)	4
ITN 157	WAN Technologies (CISCO)	4
Total Minimum Semester Credit Hours		16

Nurse Aide

Occupational Objective: The Nurse Aide is capable of working under the supervision of a licensed nurse in caring for residents of a long-term health care facility or to work under limited supervision in the home. In either situation, the Nurse Aide will use basic skills in observation, communication, reporting, and assisting in maintaining a safe, clean environment for the patient.

This program includes training in the following areas:

1. Orientation
2. Social, emotional, and spiritual needs
3. Communications and interpersonal relationships
4. Anatomy and physiology
5. Personal care
6. Nutrition and patient feeding
7. Activity and exercise
8. Safety and infection control
9. Admission, transfer, and discharge
10. Observation, charting, and reporting
11. Death and dying

The program is structured within the following courses:

		Lecture Hours	Lab Hours	Course Credits
NUR 25	Nursing Assistant	2	4	3
NUR 27	Nursing Assistant Advanced	2	3	3
NUR 98	Seminar and Project	2	2	3
Total Minimum Semester Credit Hours				9

PC Upgrade and Repair

Description: The PC Upgrade and Repair Career Studies Certificate is designed to present the student with an opportunity to obtain valuable skills in the exciting field of PC repair within a relatively short period of time. A student may complete this program in two semesters or less with all classes being offered in the day or evening.

Occupational Objectives: Employment opportunities may include PC Repair Technician or Wireless Network Technician.

The program is structured within the following courses:

		Lecture Hours	Lab Hours	Course Credits
ETR 149	PC Repair	3	0	3
ETR 115	DC & AC Fundamentals	3	0	3
ETR 195	Topics in operating systems and specialized software	3	0	3
Total Minimum Semester Credit Hours				9

Pharmacy Technician

Occupational Objectives: Pharmacy technicians work in hospital, retail, home health care, nursing home, clinic, nuclear medicine, and mail order prescription pharmacies. Pharmacy technicians have been employed with medical insurance, medical computer software, drug manufacturing, drug wholesale, and food processing companies, and as instructors in pharmacy technician training programs. Currently, hospital, home health care, and retail pharmacies hire the majority of technicians.

Admissions Requirements: In addition to the general admission requirements established for the College, entry into this program requires:

1. A high school diploma or a State approved equivalent education.
2. Acceptable admissions test scores or satisfactory completion of required developmental studies courses.
3. A personal interview with an admissions interview team. See note below.
4. A physician's report of good physical and mental health. (The required health certificate form will be provided by the College and may be completed by a physician of your choice.)

Note: The Pharmacy Technician program is an academically rigorous program and there are more applicants than available seats in the program. Therefore, admission is on a selective basis, not first-come, first-served. The selection process considers the student's academic background as well as the timely and successful completion of Developmental Studies requirements. Approximately one-half of the class will be selected by August of each year from those applicants meeting the second admissions requirement before January 1 and interviewed during February or March. The

remaining spots in the class will be filled during June from those applicants meeting the second requirement before May 16.

Readmission Requirements: Students wishing to be readmitted to the program will follow the same procedures outlined above. Once a student is readmitted, there are additional requirements regarding repetition of previous coursework. A copy of these additional requirements may be obtained from the Workforce Services Department following readmission.

Program Requirements: To receive a Certificate in the Pharmacy Technician Career Studies program, you must complete a minimum of 24 credits with a grade point average of 2.00 or better. The credits are distributed according to the following outline:

	Lecture Hours	Lab Hours	Course Credits	
First Semester				
MTH 126	Math for Allied Health	3	0	3
HTL 143	Medical Terminology I	3	0	3
HLT 250	General Pharmacology	3	0	3
HLT 261	Basic Pharmacy I	3	0	3
HLT 263	Basic Pharmacy Lab.	0	2	2
Total		12	2	14

Second Semester				
HTL 144	Medical Terminology II	3	0	3
SPD 126	Interpersonal Communication	3	0	3
HLT 290	Pharmacy Technician Lab./Clinical Practice	1	15	4
AST 114	Keyboarding for Info. Processing	1	0	1
AST 115	Keyboarding for Info. Processing Lab.	0	2	1
Total		8	17	12

Total Minimum Credits for a Certificate in Pharmacy Technician Career Studies 26

Programming

Occupational Objective: The Programming Career Studies Certificate is designed to gain a basic understanding of various programming languages through a variety of 3 and 4 credit courses. Graduates can use these courses to update their skills or open new areas of programming expertise.

The program is structured within the following courses:

	Credits
ITP 100 Software Design	3
ITP 134 Visual C++ Programming I	4
ITP 112 Visual Basic NET 1	4
ITP 234 C++ Programming II and/or	4
ITP 212 Visual Basic NET II	4
ITP 120 Java Programming I	4
ITE 150 Desktop Database Software	4
ITX Elective	3-4
Total Minimum Credit Hours	26-27

Real Estate Abstracting

Occupational Objective: The Real Estate Abstracting Career Studies Certificate gives the student the basic knowledge and occupational skills to conduct title examinations under the supervision of an attorney*.

		Lecture Hours	Lab Hours	Course Credits
AST 117	Keyboarding for Comp. Usage	1	0	1
LGL 110	Intro. To Law and the Legal Assistant	3	0	3
LGL 115	Real Estate Law for Legal Assistants	3	0	3
LGL 226	Real Estate Abstracting	3	0	3
Total Minimum Semester Credit Hours				10

*Students are encouraged to complete an internship after the coursework to further their skills in this area prior to seeking employment.

Sheet Metal Layout and Installation

Occupational Objective: The Career Studies Certificate in Sheet Metal Layout and Installation is designed to prepare individuals for employment in the Sheet Metal Layout and/or Installation Field. Job opportunities may be available with HVAC Air Conditioning and Heating Companies, Sheet Metal Layout and/or Installation Companies.

The program is structured within the following courses:

		Lecture Hours	Lab Hours	Course Credits
AIR 117	Metal Layout I	1	6	3
AIR 118	Metal Layout II	1	6	3
AIR 165	Air Conditioning Systems	2	3	3
AIR 195	System Installation	1	4	3
Total Minimum Semester Hours:		5	19	12

Web Site Design

Occupational Objective: Students completing the Web Site Design Career Studies Certificate program will have the skills to fully develop a web site, from conceptualizing the overall logic and design of the site to creating the Web pages using graphics and other media. Students will learn how to work with a client to achieve the business, organizational, professional or commercial requirements desired. A professional portfolio will be developed as the student progresses through the program. This program can be completed entirely on line. This means that the student can decide the time and place to complete the courses. This is a perfect option for the working person who has trouble finding the time to come to school or for the individual who lives too far from campus for an easy commute.

The program is structured within the following courses:

		Required/ Elective	Course Credits
ITE 130	Intro. to Internet Services	Required	3
ITD 110	Web Page Design I	Required	3
ENG 123	Writing for the World Wide Web	Required	3
	or		
	Approved English elective		
ITP 140	Client Side Scripting	Required	3
ITX	Elective	Elective	4
AST 195	Microsoft FrontPage 2000	Required	3
ITD 112	Designing Web Page Graphics	Required	3
MKT 281	Marketing on the Internet	Required	3
	Approved ITX Elective Programming Language, Database, etc.	Required	3-4
Total Minimum Semester Credit Hours			28-29

Welding

Occupational Objective: The Welding Career Studies Certificate program is a response to the short-term training needs of many adults in our service region. It is designed to provide students with the knowledge and skills needed to obtain employment in the welding field. The fundamental objective of the program is to teach students how to weld. Individuals trained in this program must be able to meet welding performance demands of industry; consequently, a minimum amount of time is spent on book and classroom study with most of the time used on supervised welding practice.

The program is structured within the following courses:

		Lecture Hours	Lab Hours	Course Credits
DRF 160	Machine Blueprint Reading	3	0	3
MAC 161	Machine Shop Practices I	2	3	3
WEL 145	Welding Metallurgy	3	0	3
WEL 120	Fundamentals of Welding	1	3	2
WEL 123	Arc Welding I	2	2	3
WEL 124	Arc Welding II	2	2	3
WEL 135	Inert Gas Welding I	1	3	2
WEL 136	Inert Gas Welding II	1	3	2
Total Minimum Semester Credit Hours				21

Developmental Studies

ward: NONE

Length: Variable

Purpose: The Virginia Community College system requires that each campus assess student readiness for college level work. Based on assessment outcomes, a student may be required to take developmental courses in mathematics, reading and writing. These courses do not carry college level credit but are designed to develop essential skills necessary for college level work. By obtaining these skills, students increase the likelihood of successful completion of their chosen program of study.

CCS campuses currently use both the A.C.T. ASSET and COMPASS tests to assess incoming students who register for transfer or vocational degrees and certificates. Both tests are developed by the American College Testing which ensures the validity and accuracy of their assessment tools. Students seeking additional information on these tests are invited to view A.C.T.'s website at www.act.org. This site contains valuable information about the test, sample questions and tips for taking both the ASSET and COMPASS.

Program Requirements: Students who require developmental studies before entry into their desired curriculum will be assigned to an academic

advisor in the developmental program. Students will not be allowed to enroll in other courses without the approval of the advisor. It is important to note that students requiring such remedial work will be encouraged to pursue this effort to the exclusion of other activity which may interfere with successful completion of Developmental Studies requirements. Early removal of deficiencies through this method increases the student's chances of accomplishing degree/diploma/certificate requirements. When a student completes the required objectives for the Developmental Studies courses, a grade of "S" (satisfactory completion of objectives) is awarded. When a student makes satisfactory progress during the term, the student receives a grade of "R" (re-enroll) and should re-enroll in that Developmental Studies course during the subsequent term. When a Developmental Studies student receives the "U" (unsatisfactory) grade, that student is to be re-counseled by a Developmental Studies academic advisor with the assistance of the Counseling Office. During re-counseling, the student may elect to change to a curriculum not requiring Developmental Studies or may be permitted to continue Developmental Studies in the student's present or newly chosen curriculum.

Course Descriptions

(ACC) Accounting

ACC 111 Accounting I (3 cr.)

Presents fundamental accounting concepts and principles governing the accounting cycle, journals, ledgers, working papers, and preparation of financial statements for sole proprietorships. Covers services and merchandising businesses. Lecture 3 hours. Total 3 hours per week.

ACC 112 Accounting II (3 cr.)

Continues ACC 111 with emphasis on application to partnerships, and corporations. Also includes an introduction to cost and managerial accounting. Lecture 3 hours. Total 3 hours per week. Prerequisite: ACC 111.

ACC 195 Topics In Computerized Accounting - Peachtree (2 cr.)

Provides an opportunity to explore topical areas in Peachtree accounting. Prerequisite: ACC 111 or 211 or comparable accounting experience. Total 2 hours per week.

ACC 211 Principles of Accounting I (3 cr.)

Presents accounting principles and their application to various businesses. Covers the accounting cycle, income determination, and financial reporting. Studies services, merchandising, and includes internal controls. Lecture 3 hours per week. Total 3 hours per week.

ACC 212 Principles of Accounting II (3 cr.)

Continues ACC 211 with emphasis on application to partnerships and corporations, and the study of financial analysis. Includes an introduction to cost and managerial accounting. Prerequisite: ACC 211. Total 3 hours per week.

ACC 221 Intermediate Accounting I (4 cr.)

Covers accounting principles and theory, including a review of the accounting cycle and accounting for current assets, current liabilities, and investments. Introduces various accounting approaches, and demonstrates the effect of these approaches on the financial statement users. Prerequisite: ACC 212 or 112 or equivalent. Lecture 4 hours per week.

ACC 222 Intermediate Accounting II (4 cr.)

Continues accounting principles and theory with emphasis on accounting for fixed assets, intangibles, corporate capital structure, long-term liabilities, and investments. Prerequisite: ACC 221 or equivalent. Lecture 4 hours per week.

ACC 231 Cost Accounting I (3 cr.)

Studies cost accounting methods and reporting as applied to job order, process, and standard cost accounting systems. Includes cost control, and other topics. Prerequisite: ACC 212 or 112 or equivalent. Lecture 3 hours per week.

ACC 241 Auditing I (3 cr.)

Presents techniques of investigating, interpreting, and appraising accounting records and assertions. Studies internal control design and evaluation, evidence-gathering techniques and other topics. Prerequisite: ACC 221 or co-requisite ACC 222 or equivalent. Lecture 3 hours per week.

ACC 261 Principles of Federal Taxation I (3 cr.)

Presents the study of federal taxation as it relates to individuals, and related entities. Includes tax planning, compliance and reporting. Lecture 3 hours per week.

ACC 262 Principles of Federal Taxation II (3 cr.)

Presents the study of federal taxation as it relates to partnerships, corporations, and other tax entities. Includes tax planning, compliance, and reporting. Lecture 3 hours per week. Prerequisite: ACC 261

(ADJ) Administration of Justice

ADJ 100 Survey of Criminal Justice (3 cr.)

Presents an overview of the United States criminal justice system; introduces the major system components law enforcement, judiciary, and corrections. Lecture 3 hours per week.

ADJ 110 Introduction to Law Enforcement (3 cr.)

Studies the philosophy and history of law enforcement, presenting an overview of the crime problem and policy response issues. Surveys the jurisdictions and organizations of local, state, and federal law enforcement agencies. Examines the qualification requirements and career opportunities in the law enforcement profession. Lecture 3 hours per week.

ADJ 116 Special Enforcement Topics (3 cr.)

Considers contemporary issues, problems, and controversies in modern law enforcement. Lecture 3 hours per week.

ADJ 118 Crisis Intervention and Critical Issues (3 cr.)

Addresses basic problems involved in crisis intervention and current critical issues in law enforcement and the administration of justice; emphasizes practical approaches to discover and implement solutions. Lecture 3 hours per week.

ADJ 130 Introduction to Criminal Law (3 cr.)

Surveys the general principles of American criminal law, the elements of major crimes, and the basic steps of prosecution procedure. Lecture 3 hours per week.

ADJ 131 Legal Evidence (3 cr.)

Surveys the identification, degrees, and admissibility of evidence for criminal prosecution; examines pre-trial procedures as they pertain to the rules of evidence. Pre-requisite: ADJ 130. Lecture 3 hours per week.

ADJ 140 Introduction to Corrections (3 cr.)

Focuses on societal responses to the offender. Traces the evolution of practices based on philosophies of retribution, deference, and rehabilitation. Reviews contemporary correctional activities and their relationships to other aspects of the criminal justice system. Lecture 3 hours per week.

ADJ 145 Corrections and the Community (3 cr.)

Studies and evaluates the relationships and interactions between correctional organizations and free society. Focuses on the shared responsibility of the community and corrections agencies to develop effective programs for management and treatment of criminal offenders. Lecture 3 hours per week.

DJ 150 Introduction to Security Administration (3 cr.)
Introduces the student to the field of private security – its theories, structures, functions, and personnel; surveys the principles and practices of security administration. Lecture 3 hours per week.

DJ 171 Forensic Science I (4 cr.)
Introduces the student to crime scene technology, procedures for sketching, diagramming and using casting materials. Surveys the concepts of forensic chemistry, fingerprint classification/identification and latent techniques, drug identification, hair and fiber evidence, death investigation techniques, thin-layer chromatographic methods, and arson materials examination. Prerequisites: ADJ 100 and ADJ 130. Lecture 3 hours. Laboratory 3 hours. Total: 6 hours per week.

DJ 215 Report Writing (3 cr.)
Introduces the basic mechanics and procedures of report writing; emphasizes clear, concise and accurate writing of communications as they relate to law enforcement records, investigations, and research. Prerequisite: ENG 111. Lecture 3 hours per week.

DJ 227 Constitutional Law for Justice Personnel (3 cr.)
Surveys the basic guarantees of liberty described in the U.S. Constitution and the historical development of these restrictions on government power, primarily through U.S. Supreme Court decisions. Reviews rights of free speech, press, assembly, as well as criminal procedure guarantees (to counsel, jury trial, habeas corpus, etc.) as they apply to the activities of those in the criminal justice system. Prerequisite: DJ 130. Lecture 3 hours per week.

DJ 234 Terrorism and Counter-Terrorism (3 cr.)
Surveys the historical and current practices of terrorism that are national, transnational, or domestic in origin. Includes biological, chemical, nuclear, and cyber-terrorism. Teaches the identification and classification of terrorist organizations, violent political groups and issue-oriented militant movements. Examines investigative methods and procedures utilized in counter terrorist efforts domestically and internationally. Prerequisite: ADJ 100. Lecture 3 hours per week.

ADJ 236 Principles of Criminal Investigation (3 cr.)
Surveys the fundamentals of criminal investigation procedures and techniques. Examines crime scene search, collecting, handling and preserving of evidence. Lecture 3 hours per week.

ADJ 257 Loss Prevention (3 cr.)
Studies internal and external theft that affects all private and public operations, with focus on retail businesses. Examines and evaluates major loss prevention programs used by security operations, again with focus on retail security. Lecture 3 hours per week.

ADJ 296 Internship (3 cr.)
In order to apply criminal justice theory to practice, this course will allow the student to participate in an on-site criminal justice learning experience in a variety of criminal justice

agencies. Appropriate placements will be with police departments, sheriff's departments, juvenile and adult probation departments, correctional institutions, and departments of social services. Other placements will be evaluated on a case by case basis. Prerequisites: ADJ 100 and ADJ 130. Variable hours per week.

(AIR) Air Conditioning and Refrigeration

AIR 111-112 Air Conditioning and Refrigeration Controls I-II (3 cr. each)

Presents electron theory, magnetism, Ohm's Law, resistance, current flow, instruments for electrical measurement, A.C. motors, power distribution controls and their application. Pre-requisite AIR 161 or approval. Lecture 2 hours. Laboratory 2 hours. Total 4 hours per week.

AIR 117 Metal Layout 1 (3 cr.)

Presents measuring and gauging of sheet metal, types of metal, handling sheet metal, cutting and bending, layout. Teaches fundamentals of drafting, basic drawing instruments, lettering practices. Lecture 1 hour. Laboratory 6 hours. Total 7 hours per week.

AIR 118 Metal Layout II (3 cr.)

Presents practice in the laying out of various sheet metal pieces on paper and transposing to metal. Prerequisite: AIR 117 or approval. Lecture 1 hour. Laboratory 6 hours. Total 7 hours per week.

AIR 121 Air Conditioning and Refrigeration I (3 cr.)

Studies refrigeration theory, tools and equipment, soldering, brazing, refrigeration systems, system components, compressors, evaporators, metering devices. Provides laboratory application of refrigerators and freezers. Lecture 2 hours. Laboratory 2 hours. Total 4 hours per week.

AIR 122 Air Conditioning and Refrigeration II (3 cr.)

Presents operations of commercial refrigeration systems, ice machines, design, installation and service, air conditioning and heat pumps. Prerequisite: AIR 121 or approval. Lecture 2 hours. Laboratory 2 hours. Total 4 hours per week.

AIR 123-124 Air Conditioning and Refrigeration III-IV (3 cr. each)

Psychrometric properties of air, heat load and gain calculation, heated and chilled water systems, duct design, air distribution and air comfort requirements. Prerequisite: AIR 122 or approval. Lecture 2 hours. Laboratory 2 hours. Total 4 hours per week.

AIR 134 Circuits and Controls I (3 cr.)

Presents circuit diagrams for heating units, reading and drawing of circuit diagrams, types of electrical controls, and house wiring circuits. Includes analysis of heating circuits, components, analysis and characteristics of circuits and controls, testing and servicing. Lecture 2 hours. Laboratory 3 hours. Total 5 hours per week.

AIR 135 Circuits and Controls II (3 cr.)

Introduces electricity for air conditioning which includes circuit elements, direct current circuits and motors, single and three-phase circuits and motors, power distribution systems, and protective devices. Studies the electron and its behavior in passive and active circuits and components. Demonstrates electronic components and circuits as applied to air conditioning systems. Prerequisite: AIR 134 or approval. Lecture 2 hours. Laboratory 3 hours. Total 5 hours per week.

AIR 136 Circuits and Controls III (3 cr.)

Introduces types of circuits and controls used in home, commercial and industrial air conditioning systems. Includes servicing and installation procedures for electrical unloading of compressors, single- and two-stage thermostats, and electrical regulation of fan speed for air volume control. Explains operational and safety control and how schematic and pictorial diagrams are used in these systems. Prerequisite: AIR 134 or approval. Lecture 2 hours. Laboratory 3 hours. Total 5 hours per week.

AIR 137 Air Conditioning Electronics Survey (2 cr.)

Studies electronics and its applications in the HVAC field. Covers computers, programmable controllers, and microprocessors in the HVAC industry. Prerequisite: AIR 134 or approval. Lecture 1 hour. Laboratory 3 hours. Total 4 hours per week.

AIR 154 Heating Systems I (3 cr.)

Introduces types of fuels and their characteristics of combustion; types, components and characteristics of burners, and burner efficiency analyzers. Lecture 2 hours. Laboratory 2 hours. Total 4 hours per week.

AIR 155 Heating Systems II (3 cr.)

Studies commercial gas and oil boilers to include troubleshooting, preventive maintenance and servicing. Prerequisite: AIR 154. Lecture 2 hours. Laboratory 2 hours. Total 4 hours per week.

AIR 156 Heating Systems III (3 cr.)

Introduces types of boilers, sizing boilers, sizing radiators and convectors, designing piping systems for steam, hot water and vacuum systems. Includes testing and servicing wet heat systems. Prerequisite: 154 - 155 or approval. Lecture 2 hours. Laboratory 2 hours. Total 4 hours per week.

AIR 158 Mechanical Codes (2 cr.)

Presents mechanical code requirements for installation, service, and inspection procedures. Uses the BOCA code in preparation for the master's card. Lecture 2 hours per week.

AIR 161 Heating, Air Conditioning and Refrigeration Calculations I (3 cr.)

Introduces fractions, decimals, sign of operations, equations, Ohm's Law, subtraction, multiplication and division of signed numbers. Teaches fundamentals of algebra, expression of stated problems in mathematical form, and solutions of equations. Lecture 2 hours. Laboratory 3 hours. Total 5 hours per week.

AIR 162 Heating, Air Conditioning & Refrigeration Calculations II (3 cr.)

Introduces the functions of angles, trigonometric functions, angles of elevation and depression, and powers and roots. Prerequisite: AIR 161 or approval. Lecture 2 hours. Laboratory 2 hours. Total 4 hours per week.

AIR 165 Air Conditioning Systems I (3 cr.)

Introduces comfort survey, house construction, load calculations, types of distribution systems, and equipment selection. Lecture 2 hours. Laboratory 3 hours. Total 5 hours per week.

AIR 166 Air Conditioning Systems II (3 cr.)

Introduces designing, layout, installation, and adjusting of duct systems, job costs, and bidding of job. Prerequisite: AIR 165 or approval. Lecture 2 hours. Laboratory 3 hours. Total 5 hours per week.

AIR 167 Air Conditioning Systems III (4 cr.)

Introduces building survey, commercial load calculations, design conditions, solar heat gain, ventilation, internal heat gains, cooling, heating and humidification with water psychrometrics distribution systems, ice and water for air conditioning. Prerequisite: AIR 166 or approval. Lecture 3 hours. Laboratory 3 hours. Total 6 hours per week.

AIR 181 Planning & Estimating I (2 cr.)

Presents fundamentals of blueprint reading as applied to the building trades. Emphasizes air conditioning and distribution, designing and drawing residential systems take-off of materials and estimating the cost of the systems. Lecture 1 hour. Laboratory 3 hours. Total 4 hours per week.

AIR 182 Planning & Estimating II (2 cr.)

Presents designing and estimating cost of commercial air conditioning systems applying student's previous studies. Prerequisite: AIR 187 or approval. Lecture 1 hour. Laboratory 3 hours. Total 4 hours per week.

AIR 213-214 Air Conditioning and Refrigeration Controls III-IV (3 cr. each)

Introduces electrical, pneumatic and electronic control circuits as applied to year-round air conditioning systems. Includes reading wiring and schematic diagrams, troubleshooting, and designing high and low voltage control systems. Prerequisite: AIR 111 or approval. Lecture 2 hours. Laboratory 2 hours. Total 4 hours per week.

AIR 231 Circuits and Controls V (5 cr.)

Applies controls and control circuits to air conditioning and refrigeration, including components, pilot devices and controls and circuit diagrams. Prerequisite: AIR 136 or approval. Lecture 4 hours. Laboratory 3 hours. Total 7 hours per week.

AIR 232 Circuits and Controls VI (3 cr.)

Presents application and design of wiring and schematic diagrams of commercial refrigeration systems. Teaches fundamentals of operation and applications of pneumatic controls including basic pneumatic control circuits. Prerequisite: AIR 231 or approval. Lecture 2 hours. Laboratory 3 hours. Total 5 hours per week.

AIR 233 Circuits and Controls VII (3 cr.)
Studies planning and design of electric, pneumatic, and combination control systems used in the air conditioning industry. Prerequisite: AIR 232 or approval. Lecture 2 hours. Laboratory 3 hours. Total 5 hours per week.

AIR 254 Air Conditioning Systems IV (3 cr.)
Presents air balancing including taking duct pressure readings, finding register and grille CFM's, fans, laws and their applications. Explores instruments used for air balancing and proper procedures. Lecture 2 hours. Prerequisite: AIR 253 or approval. Laboratory 3 hours. Total 5 hours per week.

AIR 255 Air Conditioning Systems V (3 cr.)
Studies water-cooled and air-cooled condensers, refrigerant piping design, capacity control, air washers, water and steam piping arrangements. Prerequisite: AIR 254 or approval. Lecture 2 hours. Laboratory 3 hours. Total 5 hours per week.

AIR 271 Refrigeration I (6 cr.)
Studies refrigeration, care and use of refrigeration tools and equipment, soldering, brazing, refrigeration systems, cycles, and compressors, domestic refrigeration, charging and testing systems. Lecture 4 hours. Laboratory 6 hours. Total 10 hours per week.

AIR 272 Refrigeration II (5 cr.)
Studies commercial refrigeration systems, components, sizing, and testing. Includes low temperature refrigeration systems equipment selection, load calculations, absorption systems, air conditioning systems, window units, air-cooled and water-cooled condensers. Lecture 3 hours. Prerequisite: AIR 271 or approval. Laboratory 6 hours. Total 9 hours per week.

AIR 273 Refrigeration III (3 cr.)
Studies heat pumps, sizing, installation, and servicing, reciprocating chillers and centrifugal air conditioners. Prerequisite: AIR 272 or approval. Lecture 2 hours. Laboratory 3 hours. Total 5 hours per week.

(ARC) Architecture

ARC 115 Architectural Graphics (2 cr.)
Covers various types of presentation techniques associated with architecture, including rendered plans and elevations, pictorial drawings and perspectives, and the use of drawing media. Lecture 1 hour. Laboratory 3 hours. Total 4 hours per week.

(ART) Arts

ART 101-102 History and Appreciation of Art I-II (3 cr. each)
Presents the history and interpretation of architecture, sculpture, and painting. Begins with prehistoric art and follows the development of western civilization to the present. Lecture 3 hours per week.

ART 121-122 Drawing I-II (3 cr. each)

Develops basic drawing skills and understanding of visual language through studio instruction/lecture. Introduces concepts such as proportion, space, perspective, tone and composition as applied to still life, landscape and the figure. Uses drawing media such as pencil, charcoal, ink wash and color media. Includes field trips and gallery assignments as appropriate. Variable hours per week.

ART 131-132 Fundamentals of Design I-II (3-4 cr. each)

Explores the concepts of two- and three-dimensional design and color. May include field trips as required. Lecture 1-2 hours. Studio instruction 4 hours. Total 5-6 hours per week.

ART 195-295 Silkscreen Printing I-II (2 cr. each)

Develops skills in silkscreen stencil techniques with emphasis on design. Includes field trips when applicable. Lecture 1 hours. Studio instruction 2 hours. Total 3 hours per week.

ART 198-298 Airbrush I-II (2 cr. each)

Teaches concepts and use of the airbrush in a variety of applications. Prerequisites: ART 121, ART 131, ART 140, or divisional approval. Lecture 2 hours. Studio instruction 2 hours. Total 4 hours per week.

(ASL) American Sign Language

ASL 101-102 American Sign Language I-II (3-4 cr. each)

Introduces the fundamentals of American Sign Language (ASL) used by the Deaf Community, including basic vocabulary, syntax, fingerspelling, and grammatical non-manual signals. Focuses on communicative competence. Develops gestural skills as a foundation for ASL enhancement. Introduces cultural knowledge and increases understanding of the Deaf Community.

ASL 115 Fingerspelling and Number Use in ASL (2 cr.)

Provides intensive practice in comprehension and production of fingerspelled words and numbers with emphasis on clarity and accuracy. Focuses on lexicalized fingerspelling and numeral incorporation as used by native users of American Sign Language. Prerequisite: ASL 101 or permission of instructor.

ASL 125 History & Culture of the Deaf Community I (3 cr.)

Presents an overview of various aspects of Deaf Culture, including educational and legal issues. Examines the history of the Deaf Community. Lecture 3 hours per week.

ASL 201-202 American Sign Language III-IV (3-4 cr.) (3-4 cr.)

Develops vocabulary, conversational competence, and grammatical knowledge with a total immersion approach. Introduces increasingly complex grammatical aspects including those unique to ASL. Discusses culture and literature. Contact with the Deaf Community is encouraged to enhance linguistic and cultural knowledge. Prerequisite: ASL 102 or permission of instructor.

(AST) Administrative Support Technology

AST 101 Keyboarding I (2 cr.)

Teaches the alpha/numeric keyboard with emphasis on correct techniques, speed, and accuracy. Teaches formatting of basic personal and business correspondence, reports, and tabulation. A laboratory co-requisite (AST 103) is required. Lecture 2 hours per week.

AST 102 Keyboarding II (2 cr.)

Develops keyboarding and document production skills with emphasis on developing proofreading skills in the preparation of specialized business documents. Continues skill-building for speed and accuracy. Prerequisite: AST 101. A laboratory co-requisite (AST 104) is required. Lecture 2 hours per week.

AST 103 Keyboarding I Laboratory (1 cr.)

Provides supplemental instruction in AST 101. Should be taken concurrently with AST 101. Laboratory 2 hours per week.

AST 104 Keyboarding II Laboratory (1 cr.)

Provides supplemental instruction in AST 102. Should be taken concurrently with AST 102. Laboratory 2 hours per week.

AST 113 Keyboarding for Speed and Accuracy (1 cr.)

Focuses on improving keyboarding speed and accuracy through assigned exercises that diagnose problem areas. Emphasizes increased productivity through improved speed and accuracy. Prerequisite: AST 101 or equivalent. Laboratory 2 hours per week.

AST 117 Keyboarding for Computer Usage (1 cr.)

Teaches the alphabetic keyboard and 10-key pad. Develops correct keying techniques. Lecture 1 hour per week.

AST 195 Topics In: (1 - 5 cr.)

Provides an opportunity to explore topical areas of interest or needed by students. May be repeated for credit. Variable credits.

AST 201 Keyboarding III (Internship) (2 cr.)

Develops decision-making skills, speed, and accuracy in production keying. Applies word processing skills in creating specialized business documents. An internship in an office during the latter part of the course provides on-the-job training. Prerequisite: AST 102. A laboratory co-requisite (AST 202) is required. Lecture 3 hours per week.

AST 202 Keyboarding III Laboratory (1 cr.)

Provides supplemental instruction in AST 201. Should be taken concurrently with AST 201. Laboratory 2 hours per week.

AST 205 Business Communications (3 cr.)

Teaches techniques of oral and written communications. Emphasizes writing and presenting business-related materials including instruction in PowerPoint. Prerequisite: AST 102, ENG 135, and BUS 235, or department approval. Lecture 3 hours per week.

AST 234 Records and Database Management (3 cr.)

Teaches filing and records management procedures using microcomputer Access database software. Incorporates both manual and electronic methods for managing information. Lecture 3 hours per week.

AST 238 Microsoft Word For Windows (2 cr.)

Teaches advanced word processing features including working with merge files, macros, and graphics; develops competence in the production of complex documents. Prerequisite: Touch Keyboarding Skills (ability to type 20 wpm). A laboratory co-requisite (AST 239) is required. Lecture 2 hours per week.

AST 239 Microsoft Word for Windows Laboratory (1 cr.)

Provides supplemental instruction in AST 238. Should be taken concurrently with AST 238. Laboratory 2 hours per week.

AST 243 Office Administration I (3 cr.)

Develops an understanding of the administrative support role and the skills necessary to provide organizational and technical support in a contemporary office setting. Emphasizes the development of critical-thinking, problem-solving, and job performance skills in a business office environment. Co-requisite or Prerequisite: AST 101. Lecture 3 hours per week.

AST 244 Office Administration II (3 cr.)

Enhances skills necessary to provide organizational and technical support in a contemporary office setting. Emphasizes administrative and supervisory roles of the office professional. Includes travel and meeting planning, office budgeting, and financial procedures, international issues, and career development. Prerequisite: AST 101 or instructor approval. Lecture 3 hours per week.

AST 245 Medical Machine Transcription (3 cr.)

Develops machine transcription skills, integrating operation of transcribing equipment with understanding of medical terminology. Emphasizes dictation techniques and accurate transcription of medical documents in prescribed formats. Prerequisite: AST 102 or equivalent and HLT 143 and HLT 144 or instructor permission. Lecture 3 hours per week.

AST 253 Desktop Publishing I (PageMaker/Publisher) (2 cr.)

Introduces specific desktop publishing software. Teaches document layout and design, fonts, type styles, style sheets, and graphics. Develops abilities in creating letterheads, business cards, brochures, newsletters, forms and many other publications. Prerequisite: AST 101 or equivalent, experience in using a word processing package, and IST 100 or instructor approval. A laboratory co-requisite AST 255 is required. Lecture 2 hours per week.

AST 255 Desktop Publishing I Lab (1 cr.)

Provides supplemental instruction in AST 253. Should be taken concurrently with AST 253. Laboratory 2 hours per week.

AST 265 Legal Office Procedures (Internship) (3 cr.)

Concentrates on office procedures used in law offices and develops skills necessary to provide organizational and technical support in a legal setting. An internship in a legal envi-

ment provides on-the-job training in the course, providing the student has a curricular Grade Point Average (GPA) 3.0 or higher. Prerequisite: AST 102.

AUB) Auto Body

AUB 111-112 Automobile Body Theory and Shop Practices I-II (8 cr. each)

Teaches and applies the fundamentals and use of body tools and materials. Emphasizes shop safety, metal working, welding, and cooling systems. Teaches the recommended methods of identifying, analyzing and repairing collision damage to the front, top, side and rear of the vehicle. Lecture 5 hours. Laboratory 9 hours. Total 14 hours per week.

AUB 113 Automobile Body Theory and Shop Practices III (6 cr.)

Presents the fundamentals of refinishing and painting automobiles including the techniques of masking, blending and priming. Covers paint shop layout, management, equipment, and damage estimating. Lecture 3 hours. Laboratory 9 hours. Total 12 hours per week.

AUB 115 Damage Repair Estimating (2 cr.)

Teaches inspection and estimation of cost to repair collision damage. Emphasizes writing acceptable estimates for insurance companies. Studies practices used by repair shops and insurance adjusters. Lecture 1 hour. Laboratory 3 hours. Total 4 hours per week.

AUB 116 Automotive Body Repair (4 cr.)

Teaches collision straightening procedures and use of equipment, planning repair procedures, disassembly techniques, body fastening systems, glass removal and replacement and panel repair and alignment. Lecture 3 hours. Laboratory 3 hours. Total 6 hours per week.

AUB 190-290 Coordinated Internship In Auto Body Repair (1-5 cr.)

Supervised on-the-job training in selected business, industrial or service firms coordinated by the College. Credit/practice ratio maximum 1:5 hours. May be repeated for credit. Variable hours.

AUB 198-298 Seminar and Project (2 cr.)

Teaches and applies the fundamentals and use of body and frame equipment. Teaches body and frame design and frame construction. Teaches frame and body measuring equipment use. Teaches the recommended methods of identifying and repairing the different types of frame damage. Variable hours.

AUB 206 Automotive Body Component Service (2 cr.)

Teaches operating principles, adjustments and service of selected automotive body components. Emphasizes bumper overhaul and adjustments, hood alignment, door overhaul and adjustments, deck lid alignment, door glass adjustments. Lecture 1 hour. Laboratory 3 hours. Total 4 hours per week.

(AUT) Automotive

AUT 111-112 Automotive Engines I-II (4 cr. each)

Presents analysis of power, cylinder condition, valves and bearings in the automotive engine to establish the present condition, repairs or adjustments. Lecture 3 hours. Laboratory 3 hours. Total 6 hours per week.

AUT 113 Cylinder Block Service I (3 cr.)

Studies basic cylinder block reconditioning, including boring, resleeving, line-boring and deck resurfacing. Includes repair techniques for damaged block and cylinder head castings to include cold welding, brazing, welding and epoxy. Lecture 2 hours. Laboratory 3 hours. Total 5 hours per week.

AUT 114 Cylinder Head Service II (3 cr.)

Studies cylinder head reconditioning, including valve seat grinding, refacing valves, servicing valve guides, valve seat inserts, cutting for valve seals and spring thread repair and resurfacing mating surfaces. Prerequisite: AUT 113. Lecture 2 hours. Laboratory 3 hours. Total 5 hours per week.

AUT 121-122 Automotive Fuel Systems I-II (4 cr. each)

Analyzes major domestic and foreign automotive fuel systems to include carburetors and fuel injection systems. Includes detailed inspection and discussion of fuel tanks, connecting lines, instruments, filters, fuel pumps, superchargers, and turbo charger. Also includes complete diagnosis, troubleshooting, overhaul and factory adjustment procedures of all major carbureted and fuel injection systems. Lecture 3 hours. Laboratory 3 hours. Total 6 hours per week. AUT 122 Prerequisite: AUT 121.

AUT 127 Automotive Lubrication and Cooling Systems (3 cr.)

Analyzes lubrication systems to include lubricants, pumps, lines, filters, and vents. Also analyzes cooling systems, coolants, pumps, fans, lines and connections. Teaches estimating repairs, adjustments needed and their costs. Lecture 1 hour. Laboratory 3 hours. Total 4 hours per week.

AUT 136 Automotive Vehicle Inspection (3 cr.)

Presents information on methods for performing automotive vehicle safety inspection. Lecture 2 hours. Laboratory 3 hours. Total 5 hours per week.

AUT 178 Automotive Final Drive and Manual Transmission Systems (4 cr.)

Presents the operation, design, construction and repair of manual transmissions and final drive systems, for both front and rear drive vehicles, including clutches, synchronizers, torque multiplication/gear reduction, along with differentials, transmission/transaxles, drive axles, U-joints, CV joints, 4-wheel drive and all-wheel drive systems. Lecture 3 hours. Laboratory 3 hours. Total 6 hours per week.

AUT 211-212 Automotive Systems III-IV (4 cr. each)

Presents advanced theory and detailed study of automobile systems. Provides laboratory periods for actual field practice

in troubleshooting. Prerequisite: AUT 122 or in conjunction with AUT 211. AUT 212 Prerequisite: AUT 211 or with instructor approval. Lecture 3 hours. Laboratory 3 hours. Total 6 hours per week.

AUT 215 Emissions Systems Diagnosis and Repair (2 cr.)

Presents logical diagnostic paths to identify vehicle HC-CO failure areas. Teaches a progression of failure detection from most likely to more complex causes. emphasizes use of infrared analyzer and manufacturer's specified adjustment. Lecture 2 hours per week.

AUT 236 Automotive Climate Control (4 cr.)

Introduces principles of refrigeration, air conditioning controls, and adjustment and general servicing of automotive air conditioning systems. Lecture 3 hours. Laboratory 3 hours. Total 6 hours per week.

AUT 237 Automotive Accessories (3 cr.)

Introduces the principles, design, construction, adjustment, and maintenance of all automotive equipment classed as an accessory which is not studied in other automotive courses. Lecture 3 hours per week.

AUT 241-242 Automotive Electricity I-II (4 cr. each)

Introduces electricity and magnetism, symbols and circuitry as applied to the alternators, regulators, starters, lighting systems, instruments and gauges. Lecture 3 hours. Laboratory 3 hours. Total 6 hours per week.

AUT 245 Automotive Electronics (4 cr.)

Introduces field of electronics as it applies to the modern automobile. Emphasizes basic circuit operation, diagnosis and repair of digital indicator and warning systems. Lecture 3 hours. Prerequisite: AUT 241. Laboratory 3 hours. Total 6 hours per week.

AUT 251-252 Automatic Transmissions I-II (4 cr.)

Studies several types of automatic transmissions, torque converters, and their principles of operation. Includes adjustment, maintenance, and rebuilding. Lecture 2 hours. Laboratory 6 hours. Total 8 hours per week.

AUT 265 Automotive Braking Systems (3 cr.)

Presents operation, design, construction, repair, and servicing of braking systems. Explains uses of tools and test equipment, evaluation of test results, estimation of repair cost for power, standard and disc brakes. Lecture 2 hours. Laboratory 3 hours. Total 5 hours per week.

AUT 266 Auto Alignment, Suspension and Steering (4 cr.)

Introduces use of alignment equipment in diagnosing, adjusting, and repairing front and rear suspensions. Deals with repair and servicing of power and standard steering systems. Lecture 2 hours. Laboratory 6 hours. Total 8 hours per week.

(BIO) Biology

BIO 100 Basic Human Biology (3 cr.)

Presents basic principles of human anatomy and physiology. Discusses cells, tissues, and selected human systems. Lecture 3 hours per week.

BIO 101-102 General Biology I-II (4 cr. each)

Explores fundamental characteristics of living matter from the molecular level to the ecological community with emphasis on general biological principles. Introduces the diversity of living organisms, their structure, function and evolution. Lecture 3 hours. Recitation and Laboratory 3 hours. Total 6 hours per week. Prerequisite: MTH 9 or equivalent.

BIO 141-142 Human Anatomy and Physiology I-II (4 cr. each)

Integrates anatomy and physiology of cells, tissues, organs, and systems of the human body. Integrates concepts of chemistry, physics, and pathology. Lecture 3 hours. Laboratory 2-3 hours. Total 5-6 hours per week.

BIO 205 General Microbiology (4 cr.)

Examines morphology, genetics, physiology, ecology, and control of microorganisms. Emphasizes application of microbiological techniques to selected fields. Prerequisites: BIO 101, one year of college biology and one year of college chemistry or divisional approval. Lecture 3 hours. Recitation and laboratory 3 hours. Total 6 hours per week.

BIO 231-232 Human Anatomy and Physiology I-II (4 cr. each)

Integrates the study of gross and microscopic anatomy with physiology, emphasizing the analysis and interpretation of physiological data. Prerequisites: BIO 101, one year of college biology and one year of college chemistry or divisional approval. Lecture 3 hours. Recitation and laboratory 3 hours. Total 6 hours per week.

BIO 256 General Genetics (4 cr.)

Explores the principles of genetics ranging from classical Mendelian inheritance to the most recent advances in the biochemical nature and function of the gene. Includes experimental design and statistical analysis. Prerequisite: BIO 101-102 or equivalent. Lecture 3 hours. Recitation and laboratory 3 hours. Total 6 hours per week.

BIO 270 General Ecology (2-6cr.)

Studies interrelationships between organisms and their natural and cultural environments with emphasis on populations, communities, and ecosystems. Prerequisite BIO 101-102 or divisional approval. Lecture 1-4 hours. Recitation and laboratory 3-6 hours. Total 4-10 hours per week.

(BLD) Building

BLD 131-132 Carpentry Framing I-II (5 cr. each)

Presents an introduction to carpentry with emphasis on residential construction. Covers safety on the job, appropriate use of power tools, basic construction techniques, and

Introduction to working drawings, and the team approach to residential buildings. Presents an introduction to selection and use of ladders and scaffolds, basic form removal and demolition, and use of basic first aid. Includes the concepts of carpentry framing for floors, walls, ceilings, porches and decks. Includes theoretical and practical application as well as the concepts of carpentry framing for roof, truss installation and door and window installation. Lecture 3 hours. Laboratory 4 hours. Total 7 hours.

BUS 133-134 Carpentry Framing III-IV (5 cr. each)

Continues the study of carpentry with emphasis on residential construction. Covers safety on the job, appropriate use of power tools, basic construction techniques, and introduction to working drawings, and the team approach to residential buildings. Continues the study of selection and use of ladders and scaffolds, basic form removal and demolition, and use of basic first aid. Includes the concepts of carpentry framing for floors, walls, ceilings, porches and decks. Includes theoretical and practical application as well as the concepts of carpentry framing for roof, truss installation and door and window installation. Lecture 3 hours. Laboratory 4 hours. Total 7 hours per week.

(BUS) Business Management and Administration

BUS 100 Introduction To Business (3 cr.)

Presents a broad introduction to the functioning of business enterprises within the U.S. economic framework. Introduces economic systems, essential elements of business organizations, production, human resource management, marketing, finance, and risk management. Develops business vocabulary. Lecture 3 hours per week.

BUS 111 Principles of Supervision (3 cr.)

Teaches the fundamentals of supervision, including the primary responsibilities of the supervisor. Introduces factors relating to the work of supervisor and subordinates. Covers aspects of leadership, job management, work improvement, training, and orientation, performance evaluation, and effective employee/supervisor relationships. Prerequisite: BUS 100 or Department/Instructor approval. Lecture 3 hours per week.

BUS 116 Entrepreneurship (3 cr.)

Presents the various steps considered necessary when going to business. Includes areas such as product-service analysis, market research evaluation, setting up books, ways to finance start-up, operations of the business, development of business plans, buyouts versus starting from scratch, and franchising. Uses problems and cases to demonstrate implementation of these techniques. Lecture 3 hours per week.

BUS 121 Business Mathematics I (3 cr.)

Applies mathematical operations to business processes and problems. Reviews operations, equations, percents, sales and property taxes, insurance, checkbook and cash records, wage and payroll computations, discounts, markup, mark-down and simple interest. Lecture 3 hours per week.

BUS 122 Business Mathematics II (3 cr.)

Applies mathematical operations to business problems. Reviews basic statistics, distribution of profit and loss in partnerships, distribution of corporate dividends, simple interest, present value, bank discount notes, multiple payment plans, compound interest, annuities, sinking funds, and amortization. Lecture 3 hours per week.

BUS 125 Applied Business Mathematics (3 cr.)

Applies mathematics and Excel to business process and problems such as wages and payroll, sales and property taxes, checkbook records and bank reconciliation, commercial discounts, markup, markdown, simple interest, present values, bank discount notes, compound interest, annuities, sinking funds, and amortization. Lecture 3 hours per week.

BUS 147 Introduction To Business Information Systems (3 cr.)

Presents an overview of business information systems. Introduces computer hardware, software, procedures, systems, and human resources, and explores their integration and application in business. Discusses fundamentals and applications of computer problem solving and programming. Lecture 2 hours. Laboratory 2 hours. Total 4 hours per week.

BUS 165 Small Business Management (3 cr.)

Identifies management concerns unique to small businesses. Introduces the requirements necessary to initiate a small business, and identifies the elements comprising a business plan. Presents information establishing financial and administrative controls, developing a marketing strategy, managing business operations, and the legal and government relationships specific to small businesses. Lecture 3 hours per week.

BUS 195 Topics in: (1-5 cr.)

Provides an opportunity to explore topical areas of interest to or needed by students. May also be used for special honors courses. May be repeated for credit. Variable hours.

BUS 205 Human Resource Management (3 cr.)

Introduces employment, selection, and placement of personnel, usage levels and methods, job descriptions, training methods and programs, employee evaluation systems, compensation and labor relations. Includes procedures for management of human resources and uses case studies and problems to demonstrate implementation of these techniques. Lecture 3 hours per week.

BUS 209 Continuous Quality Improvement (3 cr.)

Presents the different philosophies in Continuous Quality Improvement. Introduces students to Process Improvement, Team Development, Consensus Building, and Problem-Solving strategies. Identifies methods for Process Improvement in manufacturing and service organizations, which includes Statistical Process Control when used in the quality assurance function of business and industry. Lecture 3 hours per week.

BUS 220 Introduction To Business Statistics (3 cr.)

Introduces statistics as a tool in decision-making. Emphasizes ability to collect, present, and analyze data. Employs measures of central tendency and dispersion, statistical inference, index number, and time series analysis. Lecture 3 hours per week.

BUS 221 Business Statistics I (3 cr.)

Focuses on statistical methodology in the collection, organization, presentation, and analysis of data; concentrates on measures of central tendency, dispersion, probability concepts and distribution, sampling, statistical estimation, normal and T distribution, and hypothesis testing for means and proportions. Prerequisite: MTH 163, or departmental approval. Lecture 3 hours per week.

BUS 227 Quantitative Methods (3 cr.)

Includes an overview of quantitative methods in business decision-making, simple and multiple regression and correlation analysis, time series analysis and business forecasting, decision analysis, linear programming, transportation and assignment methods, and network models. Includes computer applications. Prerequisite: MTH 163, or departmental approval. Lecture 3 hours per week.

BUS 235 Business Letter Writing (3 cr.)

Applies composition principles to business correspondence, employment documents, and reports (including presentation of data in various chart formats). Focuses on preparing effective communications with customers, suppliers, employees, the public, and other business contacts. Lecture 3 hours per week.

BUS 236 Communication In Management (3 cr.)

Introduces the functions of communication in management with emphasis on gathering, organizing, and transmitting facts and ideas. Teaches the basic techniques of effective oral and written communication. Lecture 3 hours.

BUS 240 Introduction to Business Law (3 cr.)

Presents an introduction to the American legal system, including an overview of the courts, civil and criminal law. Develops an in-depth understanding of contracts, agency law, and business organizations. Also includes an overview of property, UCC Sales, and Commercial Paper. Lecture 3 hours per week.

BUS 295 Topics in: (1-5 cr.)

Provides an opportunity to explore topical areas of interest to or needed by students. May be also used for special honors courses. May be repeated for credit. Variable hours.

BUS 298 Seminar and Project in Business (3 cr.)

Requires completion of a project or research report related to the student's occupational objectives and a study of approaches to the selection and pursuit of career opportunities in the field. May be repeated for credit. Prerequisite: Sophomore standing in business management plus ACC 111 (or departmental approval). Lecture 3 hours per week.

(CHD) Child Development

CHD 118 Language Arts for Young Children (3 cr.)

Presents techniques and methods for encouraging the development of language and perceptual skills in young children. Stresses improvement of vocabulary, speech and methods to stimulate discussion. Surveys children's literature, examines elements of quality story telling and story reading, and stresses the use of audio-visual materials. Lecture 2 hours. Laboratory 2 hours. Total 4 hours per week.

CHD 120 Introduction to Early Childhood Education (3 cr.)

Introduces early childhood development through activities and experiences in nursery, pre-kindergarten, and primary programs. Investigates classroom organization and procedures, and use of classroom time and materials, approaches to education for young children, professionalism, and curricular procedures. Lecture 3 hours per week.

CHD 126 Science & Math Concepts for Children (3 cr.)

Covers the selection of appropriate developmental learning materials for developing activities to stimulate the logical thinking skills in children. Lecture 3 hours.

CHD 145 Methods for Teaching Art, Music, and Movement to Children (3 cr.)

Provides experiences in developing the content, methods, and materials for directing children in art, music, and movement activities. Lecture 3 hours.

CHD 166 Infant and Toddler Programs (3 cr.)

Examines the fundamentals of infant and toddler development, including planning and implementing programs in group care. Emphasizes meeting physical, social, emotional, and cognitive needs: scheduling, preparing age-appropriate activities, health and safety policies, record keeping, and reporting to parents. Lecture 3 hours per week.

CHD 205 Guiding the Behavior of Children (3 cr.)

Explores positive ways to build self-esteem in children and help them develop self-control. Presents practical ideas for encouraging pro-social behavior in children and emphasizes basic skills and techniques in classroom management. Lecture 3 hours per week.

CHD 210 Introduction to Exceptional Children (3 cr.)

Reviews the history of education for exceptional children. Studies the characteristics associated with exceptional children. Explores positive techniques for managing behavior and adapting materials for classroom use. Lecture 3 hours per week.

CHD 215 Models of Early Childhood Education Programs (3 cr.)

Studies and discusses the various models and theories of early childhood education programs, including current trends and issues. Presents state licensing and staff requirements. Lecture 3 hours per week.

CHD 270 Administration of Childcare Programs (3 cr.)

Examines the skills needed for establishing and managing early childhood programs. Emphasizes professionalism and interpersonal skills, program planning, staff selection and development, creating policies, budgeting, and developing forms for recordkeeping. Lecture 3 hours per week.

CHD 290 Coordinated Internship in Child Development (2 cr.)

Laboratory 10 hours per week.

CHD 298 Seminar and Project (1-5 cr.)

Requires completion of a project or research report related to the student's occupational objective and a study of approaches to the selection and pursuit of career opportunities in the field. May be repeated for credit. Variable hours.

(CHM) Chemistry

CHM 101-102 General Chemistry I-II (4 cr. each)

Emphasizes experimental and theoretical aspects of inorganic, organic, and biological chemistry. Discusses general chemistry concepts as they apply to issues within our society and environment. Designed for the non-science major. Lecture 3 hours. Laboratory 3 hours. Total 6 hours per week.

CHM 111-112 College Chemistry I-II (4 cr. each)

Explores the fundamental laws, theories, and mathematical concepts of chemistry. Designed primarily for science and engineering majors. Requires a strong background in mathematics. Prerequisite: MTH 04 or equivalent. Lecture 3 hours. Laboratory 3 hours. Total 6 hours per week.

CHM 241-242 Organic Chemistry I-II (3 cr. each)

Introduces fundamental chemistry of carbon compounds, including structures, physical properties, syntheses, and typical reactions. Emphasizes reaction mechanisms. Prerequisite: CHM 112, corequisite CHM 243-244 or CHM 245-246. Lecture 3 hours per week.

CHM 243-244 Organic Chemistry Lab. I-II (1 cr. each)

Taken concurrently with CHM 241 and CHM 242. Laboratory 3 hours per week.

CHM 245-246 Organic Chemistry Lab. I-II (2 cr. each)

Taken concurrently with CHM 241 and CHM 242 by chemistry and chemical engineering majors. Includes qualitative organic analysis. Laboratory 6 hours per week.

CHM 251-252 Quantitative Analysis I-II (4 cr. each)

Develops the theory and methods of volumetric and gravimetric analysis. Teaches specific analytical procedures involving instrumental methods of analysis. Prerequisites: CHM 112 or equivalent. Lecture 2 hours. Laboratory 6 hours. Total 8 hours per week.

(CIV) Civil Engineering Technology

CIV 170 Principles of Surveying (3 cr.)

Introduces the elements of surveying to include use and care of modern surveying equipment and the application of surveying in construction. Prerequisite: MTH 07. Lecture 2 hours. Laboratory 3 hours. Total 5 hours per week.

(DEC) Decorating

DEC 100 Introduction to Interior Decorating (3 cr.)

Presents the elements and principles of residential design with emphasis on space planning, color, lighting, materials, furnishings and costing. Lecture 3 hours per week.

DEC 198 Seminar and Project (3 cr.)

Completion of a project or research report related to the student's occupational objectives, and a study of approaches to the selection and pursuit of career opportunities in the field.

(DRF) Drafting

DRF 114-115 Drafting I-II (4 cr. each)

Focuses on instruments, geometric construction, orthographic projection, sections and conventions, pictorial drawings, isometric principles, oblique drawing, and dimensioning. Prerequisite: for DRF 115: DRF 114. Lecture 1 hour. Laboratory 9 hours. Total 10 hours per week.

DRF 116 Drafting III (3 cr.)

Focuses on auxiliaries, basic concepts, terms of reference, choice of views, axis, proportioning distances and perspective drawings. Prerequisite: DRF 114. Lecture 1 hour. Laboratory 6 hours. Total 7 hours per week.

DRF 120 Introduction to Graphic Representation (3 cr.)

Teaches use of instruments, lettering, sketching, and drawing conventions. Emphasizes legible drawings and the value of presentation. Lecture 2 hours. Laboratory 3 hours. Total 5 hours per week.

DRF 130 Introduction to Electrical/Electronics Drafting (2 cr.)

Teaches applications of drafting procedures with emphasis on working and functional drawings and direct applications to electrical and electronic components and circuits. Lecture 1 hour. Laboratory 3 hours. Total 4 hours per week.

DRF 160 Machine Blueprint Reading (3 cr.)

Introduces interpreting of various blueprints and working drawings. Applies basic principles and techniques such as visualization of an object, orthographic projection, technical sketching and drafting terminology. Requires outside preparation. Lecture 3 hours per week.

DRF 201 Computer Aided Drafting and Design I (4 cr.)

Teaches computer-aided drafting concepts and equipment designed to develop a general understanding of components of a typical CAD system and its operation. Prerequisite: DRF 114 or department approval. Lecture 3 hours. Laboratory 2 hours. Total 5 hours per week.

DRF 202 Computer Aided Drafting and Design II (4 cr.)

Teaches working drawings and advanced operations in computer aided drafting. Prerequisite: DRF 201. Lecture 3 hours. Laboratory 2 hours. Total 5 hours per week.

DRF 210 Advanced Technical Drafting (4 cr.)

Intersections of plane surfaces, lines and planes, skew lines and surfaces; intersections of prisms, pyramids and other shapes, developments, sheet metal-drafting, screw threads and fasteners, keys and springs. Prerequisite: DRF 114. Lecture 1 hour. Laboratory 9 hours. Total 10 hours per week.

DRF 233 Computer Aided Drafting III (3 cr.)

Exposes student to 3-D and modeling. Focuses on proficiency in Production drawing using a CAD system. Lecture 2 hours. Laboratory 2 hours. Total 4 hours per week.

(ECO) Economics

ECO 100 Elementary Economics (3 cr.)

Introduces students to the most basic elements of economics without detailed study of theory. Presents and interprets current issues and concerns publicized in the media. Allows students to understand and grasp the importance of current local, state, and national issues with economic themes and overtones. Lecture 3 hours per week.

ECO 110 Consumer Economics (3 cr.)

Fosters understanding of the American economic system and the individual's role as a consumer. Emphasizes application of economic principles to practical problems encountered. Alerts students to opportunities, dangers, and alternatives of consumers. Lecture 3 hours per week.

ECO 120 Survey of Economics (3 cr.)

Presents a broad overview of economic theory, history, development, and application. Introduces terms, definitions, policies, and philosophies of market economics. Provides some comparison with other economic systems. Includes some degree of exposure to microeconomic and macroeconomic concepts. Lecture 3 hours per week.

ECO 201 Principles of Economics I (3 cr.)

Introduces macroeconomic principles and their relationship to current economic conditions. Presents the concept of a free enterprise economy and how it compares to other economic systems. Introduces the concepts of supply and demand and discusses how markets allocate resources. Presents measures of economic activity and discusses the problems of economic instability - inflation and unemployment. Discusses the various approaches to achieving economic stability including classical, Keynesian, monetarist and supply side positions. The structure of the banking system and the role of the Federal Reserve are discussed. Lecture 3 hours per week.

ECO 202 Principles of Economics II (3 cr.)

Introduces microeconomic principles and their relationship to current economic conditions. Further analysis of the theories of supply and demand is presented. The costs of production for private business firms are analyzed. The concept of profit maximization by business firms under various market conditions is presented. Describes the four basic market models and their implications for business decision making. Analyzes resource markets and the determination of resource prices. Discusses the U.S. role in the global economy and the importance of competitiveness. Lecture 3 hours per week.

(EDU) Education

EDU 114 Introduction to Education (1 cr.) Introduces the "driver task" as related to the highway transportation system and factors that influences performance ability. Prepares students so they may be eligible to take certification exams for driving school instructors in both public and private schools. Prerequisite: Must be eligible for ENG 03 and 05 or ESL 13. Lecture 2 hours. Laboratory 2 hours. Total 4 hours per week.

EDU 200 Introduction to Teaching as a Profession (3 cr.)

Provides an orientation to the teaching profession in Virginia, including historical perspectives, current issues, and future trends in education on the national and state levels. Emphasizes information about teacher licensure examinations, steps to certification, teacher preparation and induction programs, and attention to critical shortage areas in Virginia. Includes supervised field placement (recommended: 40 clock hours) in a K-12 school. Prerequisite: Successful completion of 24 credits of transfer courses. Lecture 2 hours. Laboratory 2 hours. Total 4 hours per week.

(EIP) Educational Interpreter Program

(These courses may not transfer to any other VCCS institutions in ASL or INT programs.)

EIP 101 Orientation to Deafness I (1 cr.)

Provides an overview of the Deaf community and its inherent Culture. Includes Deaf Culture, Deaf community dynamics, causes of hearing loss/deafness, and education of the Deaf. This course may not transfer to any other VCCS institutions in ASL or INT programs. Lecture one hour per week.

EIP 102 Orientation to Deafness II (1 cr.)

Further investigates the dynamics of the Deaf Community and its inherent Culture, including the differences between the Deaf Community/Culture and the Hearing Community/Culture in areas such as sociolinguistics, political aspects and the development and role of organizations of and by the Deaf. Prerequisite: EIP 101 or consent of instructor. This course may not transfer to any other VCCS institutions in ASL or INT programs. Lecture one hour per week.

EIP 111 Introduction to Expressive and Receptive Fingerspelling and Number Systems (1 cr.)

Provides intensive practice in expressive and receptive fingerspelling and numbers with emphasis on clarity, accuracy and speed. Focuses on increasing skills in vocabulary, spelling, letter production, number incorporation and improving fluency. Prerequisite: EIP 11 or consent of instructor. This course may not transfer to any other VCCS institutions in ASL or INT programs. Lecture one hour per week.

EIP 112 Advanced Expressive and Receptive Fingerspelling and Number Systems (1 cr.)

Provides more intensive practice in expressive and receptive fingerspelling and numbers with an emphasis on clarity, accuracy, speed and fluency. Addresses appropriate incorporation of fingerspelling and numbers into expressive skills and appropriate comprehension of receptive fingerspelling and numbers and within texts. This course may not transfer to any other VCCS institutions in ASL or INT programs. Lecture one hour per week.

EIP 150 Expressive Vocabulary Building and Expressive Text Analysis for Interpreters I (1 cr.)

Expands and improves expressive sign language skills necessary for effective communication and interpreting. Includes vocabulary building within context (spoken and written), refinement of sign production and auditory memory training. This course may not transfer to any other VCCS institutions in ASL or INT programs. Lecture one hour per week.

EIP 151 Expressive Vocabulary Building and Expressive Text Analysis for Interpreters II (1 cr.)

Further develops expressive sign language skills, with a con-

tinuing emphasis on vocabulary building within context (spoken and signed) and appropriate sign production. Prerequisite: EIP 150 or consent of instructor. This course may not transfer to any other VCCS institutions in ASL or INT programs. Lecture one hour per week.

EIP 160 Receptive Vocabulary Building and Receptive Text Analysis for Interpreters I (1 cr.)

Expands and improves receptive sign language skills necessary for effective communication and interpreting. Includes vocabulary building within context (signed), receptive sign analysis and visual memory training. This course may not transfer to any other VCCS institutions in ASL or INT programs. Lecture one hour per week.

EIP 161 Receptive Vocabulary Building and Receptive Text Analysis for Interpreters II (1 cr.)

Further develops receptive sign language skills, with a continuing emphasis on vocabulary building within context (signed) and receptive sign analysis. Prerequisite: EIP 160 or consent of instructor. This course may not transfer to any other VCCS institutions in ASL or INT programs. Lecture one hour per week.

EIP 181 Pre-Interpreting Skills I (1 cr.)

Develops fundamental skills towards the task of interpreting, specifically building memory and processing skills (both auditory and visual). This course may not transfer to any other VCCS institutions in ASL or INT programs. Lecture one hour per week.

EIP 182 Pre-Interpreting Skills II (1 cr.)

Further develops fundamental skills towards the task of interpreting, including review of the Models of Interpreting, English skills and text analysis of spoken English and signed source messages. Prerequisite: EIP 181 or consent of instructor. This course may not transfer to any other VCCS institutions in ASL or INT programs. Lecture one hour per week.

EIP 201 Linguistics of American Sign Language for Interpreters I (1 cr.)

Emphasizes linguistic aspects of ASL, including ASL phonology, time references and time sequencing, pronominalization, directional placement, and an introduction to classifiers and locatives. This course may not transfer to any other VCCS institutions in ASL or INT programs. Lecture one hour per week.

EIP 202 Linguistics of American Sign Language for Interpreters II (1 cr.)

Review and expands linguistic aspects taught in EIP 201, including more intensive practice with classifiers and locatives, and emphasizes additional linguistic features of ASL (e.g., pluralization, numbers in ASL, and unique morphological characteristics, such as loan signs and noun-verb pairs). Prerequisite: EIP 201 or consent of instructor. This course may not transfer to any other VCCS institutions in ASL or INT programs. Lecture one hour per week.

EIP 203 Linguistics of American Sign Language for Interpreters III (1 cr.)

Emphasizes ASL syntax, including ASL sentence types and grammatical features as well as additional morphological characteristics (e.g., temporal aspect and distributional aspect). Prerequisite: EIP 201 or consent of instructor. This course may not transfer to any other VCCS institutions in ASL or INT programs. Lecture one hour per week.

EIP 211 Sign-to-Voice Transliterating I (1 cr.)

Introduces skill development techniques for consecutive sign-to-voice transliterating. Incorporates use of visual memory and visual processing skills in reading sign language (e.g., contact signing/Pidgin Signed English). Develops fluency, accuracy and speed through extensive practice with a variety of consecutive sign-to-voice materials. Emphasizes incorporation of appropriate English grammar and vocal intonation. Prerequisites: EIP 181, EIP 202 or consent of instructor. This course may not transfer to any other VCCS institutions in ASL or INT programs. Lecture one hour per week.

EIP 212 Sign-to-Voice Transliterating II (1 cr.)

Further develops consecutive sign-to-voice transliterating skills through extensive practice. Continues to develop and refine fluency, accuracy and speed. Additional enhancement of appropriate English grammar skills and appropriate vocal intonation. Prerequisite: EIP 211 or consent of instructor. This course may not transfer to any other VCCS institutions in ASL or INT programs. Lecture one hour per week.

EIP 213 Sign-to-Voice Transliterating III (1 cr.)

Introduces skill development techniques for simultaneous sign-to-voice transliterating skills. Develops fluency, accuracy and speed through extensive practice with a variety of simultaneous sign-to-voice materials. Emphasizes use of appropriate English grammar and vocal intonation. Prerequisite: EIP 212 or consent of instructor. This course may not transfer to any other VCCS institutions in ASL or INT programs. Lecture one hour per week.

EIP 214 Sign-to-Voice Transliterating IV (1 cr.)

Further develops simultaneous sign-to-voice transliterating skills through extensive practice. Continues to develop and refine fluency, accuracy and speed with a variety of simultaneous sign-to-voice materials. Accentuates use of appropriate English grammar and vocal intonation. Prerequisite: EIP 213 or consent of instructor. This course may not transfer to any other VCCS institutions in ASL or INT programs. Lecture one hour per week.

EIP 215 Advanced Sign-to-Voice Interpreting I (1 cr.)

Provides instruction on refining and enhancing sign-to-voice skills, specifically sign-to-voice transliterating and interpreting. Students will self-identify strengths (in voicing) and areas of weakness as the springboard for individual improvement through group work and feedback. Group work

will entail student self-analysis and giving and receiving feedback. Prerequisites: EIP 214 and EIP 203, or consent of instructor. This course may not transfer to any other VCCS institutions in ASL or INT programs. Lecture one hour per week.

EIP 216 Advanced Sign-to-Voice Interpreting II (1 cr.)

Further refines and enhances simultaneous sign-to-voice skills. Continued emphasis on student self-analysis and group feedback. Prerequisites: EIP 215 or consent of instructor. This course may not transfer to any other VCCS institutions in ASL or INT programs. Lecture one hour per week.

EIP 231 Expressive Transliterating I (1 cr.)

Introduces the skills required to transmit spoken English into a manual code of English consecutively. While a variety of manual codes and their relationships to ASL will be identified, concentration will be on the use of contact signing/Pidgin Signed English (PSE) and the incorporation of conceptually accurate signs. Incorporates use of auditory memory and auditory processing skills in listening to spoken English. Develops fluency and accuracy through extensive practice with a variety of consecutive voice-to-sign materials. Prerequisites: EIP 181, EIP 202 or consent of instructor. This course may not transfer to any other VCCS institutions in ASL or INT programs. Lecture one hour per week.

EIP 232 Expressive Transliterating II (1 cr.)

Further develops consecutive voice-to-sign transliterating skills through extensive practice. Continued emphasis on contact signing/Pidgin Signed English (PSE) and conceptually accurate sign choices. Prerequisite: EIP 231 or consent of instructor. This course may not transfer to any other VCCS institutions in ASL or INT programs. Lecture one hour per week.

EIP 233 Expressive Transliterating III (1 cr.)

Introduces skill development techniques for simultaneous voice-to-sign transliterating. Emphasis is on use of contact signing/Pidgin Signed English (PSE) and the incorporation of conceptually accurate signs. Develops fluency and accuracy through extensive practice with a variety of simultaneous voice-to-sign materials. Prerequisite: EIP 232 or consent of instructor. This course may not transfer to any other VCCS institutions in ASL or INT programs. Lecture one hour per week.

EIP 234 Expressive Transliterating IV (1 cr.)

Further develops simultaneous voice-to-sign transliterating skills through extensive practice. Continued emphasis on contact signing/Pidgin Signed English (PSE) and conceptually accurate sign choices. Prerequisite: EIP 233 or consent of instructor. This course may not transfer to any other VCCS institutions in ASL or INT programs. Lecture one hour per week.

EIP 235 Advanced Expressive Transliterating I (1 cr.)

Provides instruction on refining and enhancing simultaneous voice-to-sign transliterating skills. Students will self-identify strengths (in signing) and areas of weakness as the springboard for individual improvement through group work and feedback. Group work will entail student self-analysis and giving and receiving feedback. Prerequisite: EIP 234 or consent of instructor. This course may not transfer to any other VCCS institutions in ASL or INT programs. Lecture one hour per week.

EIP 236 Advanced Expressive Transliterating II (1 cr.)

Further refines and enhances simultaneous voice-to-sign transliterating skills. Continued emphasis on student self-analysis and group feedback. Prerequisite: EIP 235 or consent of instructor. This course may not transfer to any other VCCS institutions in ASL or INT programs. Lecture one hour per week.

EIP 240 Interpreting in the Educational Setting (1 cr.)

Examines roles, responsibilities and communication techniques of the Educational Interpreter. Provides information on the needs of the Deaf student and methods used in teaching students who are Deaf and Hard-of-Hearing. Emphasizes skill development using conceptually accurate signs. Prerequisites: EIP 214 and EIP 234 or consent of instructor. This course may not transfer to any other VCCS institutions in ASL or INT programs. Lecture one hour per week.

EIP 242 Interpreting in Special Situations (1 cr.)

Presents techniques and vocabulary involved in interpreting in specific contexts (e.g., medical, legal, platform, artistic, etc). Prerequisites: EIP 214 and EIP 234 or consent of instructor. This course may not transfer to any other VCCS institutions in ASL or INT programs. Lecture one hour per week.

EIP 245 Interpreter Ethics and Responsibilities (1 cr.)

Reviews the basic principles and practices of interpreting, including the logistics of interpreting situations, regulatory and legislative issues, resources, review of the Code of Ethics, professional appearance, and interpreter responsibilities. This course may not transfer to any other VCCS institutions in ASL or INT programs. Lecture one hour per week.

EIP 261 Introduction to English-to-ASL Interpreting I (1 cr.)

Develops consecutive interpreting skills from English to ASL. Review of ASL structure and linguistic features and text analysis of English sources into ASL. Incorporates use of auditory memory and auditory processing skills. Emphasis on appropriate incorporation of "restructuring" between English and ASL. Prerequisites: EIP 181 and EIP 203 or consent of instructor. This course may not transfer to any other VCCS institutions in ASL or INT programs. Lecture one hour per week.

EIP 262 English-to-ASL Interpreting II (1 cr.)

Builds on consecutive voice-to-sign interpreting skills. Continued review of ASL structure and linguistic features, text analysis of English sources into ASL and appropriate "restructuring". Prerequisite: EIP 261 or consent of instructor. This course may not transfer to any other VCCS institutions in ASL or INT programs. Lecture one hour per week.

EIP 263 English-to-ASL Interpreting III (1 cr.)

Introduces skills needed for simultaneous voice-to-sign interpreting. Emphasis on appropriate processing time needed for simultaneous "restructuring" into ASL. Prerequisite: EIP 262 or consent of instructor. This course may not transfer to any other VCCS institutions in ASL or INT programs. Lecture one hour per week.

EIP 264 English-to-ASL Interpreting IV (1 cr.)

Further refines and enhances simultaneous voice-to-sign interpreting skills. Continued emphasis on appropriate processing time needed for simultaneous "restructuring" into ASL. Prerequisite: EIP 263 or consent of instructor. This course may not transfer to any other VCCS institutions in ASL or INT programs. Lecture one hour per week.

EIP 280 Interactive Transliterating (1 cr.)

Provides instruction on transliterating in interactive situations. Prerequisites: EIP 214 and EIP 234 or consent of instructor. This course may not transfer to any other VCCS institutions in ASL or INT programs. Lecture one hour per week.

EIP 281 Interactive Interpreting (1 cr.)

Provides instruction on interpreting in interactive situations. Prerequisites: EIP 216 and EIP 264 or consent of instructor. This course may not transfer to any other VCCS institutions in ASL or INT programs. Lecture one hour per week.

EIP 289 Preparation for Performance Evaluations: Transliterating (1 cr.)

Provides a "mock" performance evaluation with a focus on transliterating. Students will receive feedback as well perform self-analyses in order to better prepare them to take the Transliterating component of the Virginia Quality Assurance Screening (VQAS). Prerequisites: EIP 214, EIP 280 or consent of instructor. This course may not transfer to any other VCCS institutions in ASL or INT programs. Lecture one hour per week.

EIP 291 Preparation for Performance Evaluations: Interpreting (1 cr.)

Provides a "mock" performance evaluation with a focus on interpreting. Students will receive feedback as well perform self-analyses in order to better prepare them to take the Interpreting component of the Virginia Quality Assurance Screening (VQAS). Prerequisites: EIP 216, EIP 264, EIP 281 or consent of instructor. This course may not transfer to any other VCCS institutions in ASL or INT programs. Lecture one hour per week.

(EGR) Engineering

EGR 115 Engineering Graphics (2 cr.)

Applies principles of orthographic projection and multi-view drawings. Teaches descriptive geometry, including relationships of points, lines, planes, and solids. Introduces sectioning, dimensioning, and computer graphic techniques. Lecture 1 hour. Laboratory 3 hours. Total 4 hours per week.

(ELE) Electrical Technology

ELE 90-190-290 Coordinated Internship (1-5 cr.)

Supervised on-the-job training in selected business, industrial or service firms coordinated by the College. Credit/practice ratio maximum 1:5 hours. May be repeated for credit. Variable hours.

ELE 95-195-295 Topics in: (1-5 cr.)

Provides an opportunity to explore topical areas of interest to or needed by students. May be used also for special honors courses. May be repeated for credit. Variable hours.

ELE 98-198-298 Seminar and Project in: (1-5 cr.)

Requires completion of a project or research report related to the student's occupational objective and a study of approaches to the selection and pursuit of career opportunities in the field. May be repeated for credit. Variable hours.

ELE 99-199-299 Supervised Study in: (1-5 cr.)

Assigns problems for independent study incorporating previous instruction and supervised by the instructor. May be repeated for credit. Variable hours.

ELE 100 Electrical-Electronics Skills (4 cr.)

Teaches skills and concepts of safety, hand and power tools, EMF, assembly and disassembly methods, basic electrical devices and instruments, provides opportunities for hands-on skills, reviews theoretical concepts related to basic electricity. Lecture 3 hours. Laboratory 3 hours. Total 6 hours per week.

ELE 110 Home Electric Power (3 cr.)

Covers the fundamentals of residential power distribution, circuits, panels, fuse boxes, breakers, transformers. Includes study of the national electrical code, purpose and interpretation. Lecture 2 hours. Laboratory 2 hours. Total 4 hours per week.

ELE 113-114 Electricity I-II (3 cr. each)

Teaches principles of electricity covering fundamentals, devices and components in both DC and AC circuits. Lecture 3 hours per week.

ELE 123-124 Electrical Applications I-II (2 cr. each)

Provides laboratory and shop assignments/jobs as applied to fundamental principles of electricity with emphasis on measurements and evaluation of electrical components, devices and circuits. May require preparation of a report as an out-of-class activity. Lecture 1 hour. Laboratory 2 hours. Total 3 hours per week.

ELE 131-132 National Electrical Code I-II (3 cr. each)

Provides comprehensive study of the purpose and interpretations of the National Electric Code as well as familiarization and implementation of various charts, code rulings and wiring methods including state and local regulations. Lecture 3-4 hours per week.

ELE 133-134 Practical Electricity I-II (3 cr. each)

Teaches the fundamentals of electricity, terminology, symbols, and diagrams. Includes the principles essential to the understanding of general practices, safety and the practical aspects of residential and non-residential wiring and electrical installation, including fundamentals of motors and controls. Pre/Co requisite MTH 02 or equivalent. Lecture 2 hours. Laboratory 2 hours. Total 4 hours per week.

ELE 152 Electrical-Electronic Calculations I (4 cr.)

Includes general math, scale readings, conversions between units of measure and algebra with exponents and radicals as it applies to DC circuits. (First of a three-course sequence). Lecture 4 hours. Laboratory 0-2 hours. Total 4 hours per week.

ELE 153 Electrical-Electronic Calculations II (4 cr.)

Includes a review of DC applications, angular measurements, right triangle ratios, vector and vector algebra as it applies to AC circuits. (Second of a three-course sequence). Prerequisite: ELE 152. Lecture 4 hours per week.

ELE 154 Electrical-Electronic Calculations III (2 cr.)

Includes a review of DC and AC applications and includes exponential equations and logarithms as it applies to electrical-electronic circuits. (Third of a three-course sequence). Prerequisite: ELE 153. Lecture 2 hours per week.

ELE 156 Electrical Control Systems (3 cr.)

Includes troubleshooting and servicing electrical controls, electric motors, motor controls, motor starters, relays, overload, instruments and control circuits. May include preparation of a report as an out-of-class activity. Lecture 2 hours. Laboratory 2 hours. Total 4 hours per week.

ELE 201 Applications and Instruments I (1 cr.)

Presents assignments and individual projects to supplement the course of study. Requires the selection, operation, and interpretation of laboratory instruments. May require formal reports to demonstrate state-of-the-art techniques. Laboratory 3 hours.

ELE 216 Industrial Electricity (3 cr.)

Studies rotating devices, single phase and polyphase distribution, magnetic devices, circuits and systems for industrial applications. Lecture 2-3 hours. Laboratory 2 hours. Total 5 hours per week.

ELE 235 Industrial Communications (3 cr.)

Teaches applications of basic and special devices and circuits in combination to form modern communications and control systems. Includes progression from low frequency to high frequency applications beginning with carrier circuit systems and basic transceivers to microwave systems. Lecture 2 hours. Laboratory 3 hours. Total 5 hours per week.

(EMT) Emergency Medical Technology

EMT 111 Emergency Medical Technology I (3 cr.)

Provides instruction in basic life support, physical assessment. Introduces role and responsibilities of the emergency medical technician/ambulance. Includes emergency operations, anatomy and physiology, bleeding, shock, MAST trousers, cardio-pulmonary resuscitation, soft tissue injuries, fractures and dislocations, abdominal and chest injuries. Required for certification as a Virginia EMT/A. Lecture 2 hours. Laboratory 2 hours. Total 4 hours per week.

EMT 112 Emergency Medical Technology II (3 cr.)

Continues material begun in EMT 111. Includes major trauma and medical emergencies, emergency childbirth procedures, lifting and moving patients, vehicle extrication, pediatric and environmental emergencies, and mass casualty situations. Required for certification as a Virginia EMT/A. Prerequisite: EMT 111. Lecture 2 hours. Laboratory 2 hours. Total 4 hours per week.

(ENG) English

ENG 01 Preparing for College Writing I (1-6 cr.)

Helps students discover and develop writing processes needed to bring their proficiency to the level necessary for entrance into their respective curricula. Guides students through the process of starting, composing, revising, and editing. Variable hours per week.

ENG 03 Preparing for College Writing II (1-6 cr.)

Emphasizes strategies within the writing process to help students with specific writing situations. Develops techniques to improve clarity of writing and raise proficiency to the level necessary for entrance into particular curricula. Variable hours per week.

ENG 04 Reading Improvement I (1-6 cr.)

Helps students improve their reading processes to increase their understanding of reading materials. Includes word forms and meanings, comprehension techniques, and ways to control reading pace. Variable hours per week.

ENG 05 Reading Improvement II (1-6 cr.)

Helps students read critically and increase appreciation of reading. Guides students in making inferences, drawing conclusions, detecting relationships between generalizations and supporting details. Includes interpreting graphic aids and basic library skills. Variable hours per week.

ENG 111-112 College Composition I-II (3 cr. each)

Develops writing ability for study, work, and other areas of writing based on experience, observation, research, and reading of selected literature. Guides students in learning writing as a process: understanding audience and purpose, exploring ideas and information, composing, revision, and editing. Supports writing by integrating, composing, revising, and editing. Supports writing by integrating experi-

ences in thinking, reading, listening, and speaking. Lecture 3 hours per week.

ENG 115 Technical Writing (3 cr.)

Develops ability in technical writing through extensive practice in composing technical reports and other documents. Guides students in achieving voice, tone, style, and content in formatting, editing, and graphics. Introduces students to technical discourse through selected reading. Prerequisite: ENG 131 or ENG 111. Lecture 3 hours per week.

ENG 121-122 Introduction to Journalism I-II (3 cr. each)

Introduces students to all news media, especially news gathering and preparation for print. Prerequisite: ENG 111 or ENG 112, or divisional approval. Lecture 3 hours per week.

ENG 123 Writing for the World Wide Web (3 cr.)

Teaches students how to outline, compose, organize, and edit written materials for publication on the World Wide Web. Teaches students how to design basic web pages, compose website content, design web site layout and develop website navigation for a variety of possible audiences. Prerequisite: ENG 111 or approval. Lecture 3 hours per week.

ENG 131 Technical Report Writing I (3 cr.)

Offers a review of organizational skills including paragraph writing and basic forms of technical communications, various forms of business correspondence, and basic procedures for research writing. Includes instruction and practice in oral communication skills. Lecture 3 hours per week.

ENG 134 Grammar for Writing and Speaking (3 cr.)

Studies the various parts of speech with application to both writing and speaking. Includes significant assignments to demonstrate skills in a variety of written and verbal communication, and emphasizes the skills necessary for correct everyday usage of the English language. Lecture 3 hours per week.

ENG 135 Applied Grammar (3 cr.)

Develops ability to edit and proofread correspondence and other documents typically produced in business and industry. Instructs the student in applying conventions of grammar, usage, punctuation, spelling, and mechanics. Prerequisite: ENG 134 or divisional approval. Lecture 3 hours per week.

ENG 210 Advanced Composition (3 cr.)

Helps students refine skills in writing non-fiction prose. Guides development of individual voice and style. Introduces procedures for publication. Prerequisite: ENG 112 or divisional approval. Lecture 3 hours per week.

ENG 211-212 Creative Writing I-II (3 cr. each)

Introduces the student to the fundamentals of writing imaginatively. Students write in forms to be selected from poetry, fiction, drama, and essays. Prerequisite: ENG 112 or divisional approval. Lecture 3 hours per week.

ENG 241-242 Survey of American Literature I-II (3 cr. each)

Examines American literary works from colonial times to the present, emphasizing the ideas and characteristics of our national literature. Involves critical reading and writing. Prerequisite: ENG 112 or divisional approval. Lecture 3 hours per week.

ENG 243-244 Survey of English Literature I-II (3 cr. each)
Studies major English works from the Anglo-Saxon period to the present, emphasizing ideas and characteristics of the British literary tradition. Involves critical reading and writing. Prerequisite: ENG 112 or divisional approval. Lecture 3 hours per week.

ENG 255 Major Writers in World Literature (3 cr.)
Examines major writers selected from a variety of literary traditions. Involves critical reading and writing. Prerequisite: ENG 112 or divisional approval. Lecture 3 hours per week.

(ESL) English as a Second Language

ESL 05 English as a Second Language: Reading I (3-6 cr.)
Helps students improve their reading comprehension and vocabulary. Improves students' reading proficiency to a level which would allow the students to function adequately in ESL 06 and other college classes. Variable hours per week.

ESL 06 English as a Second Language: Reading II (3-6 cr.)
Helps students improve their reading comprehension and vocabulary. Improves students' reading proficiency to a level which would allow the students to function adequately in college classes. Variable hours per week.

ESL 07 Oral Communication I (3-6 cr.)
Helps students practice and improve listening and speaking skills as needed for functioning successfully in academic, professional, and personal settings. Assesses students' oral skills and includes, as needed, practice with pronunciation, rhythm, stress, and intonation. Provides exercises, practices, small and large group activities, and oral presentations to help students overcome problems in oral communication. Variable hours per week.

ESL 08 Oral Communication II (3-6 cr.)
Provides further instruction and practice in helping students to improve listening and speaking skills. Assesses students' oral skills and includes, as needed, practice with pronunciation, rhythm, stress, and intonation. Emphasizes the development of fluency through exercises, practices, small and large group activities, and formal and informal presentations. Variable hours per week.

(ETR) Electronics Technology

ETR 90-190-290 Coordinated Internship (1-5 cr.)
Supervised on-the-job training in selected business, industrial or service firms coordinated by the College. Credit/practice ratio maximum 1:5 hours. May be repeated for credit. Variable hours.

ETR 95-195-295 Topics in: (1-5 cr.)
Provides an opportunity to explore topical areas of interest to or needed by students. May be used also for special honors courses. May be repeated for credit. Variable hours.

ETR 98-198-298 Seminar and Project in: (1-5 cr.)
Requires completion of a project or research report related to the student's occupational objective and a study of approaches to the selection and pursuit of career opportunities in the field. May be repeated for credit. Variable hours.

ETR 99-199-299 Supervised Study in: (1-5 cr.)
Assigns problems for independent study incorporating previous instruction and supervised by the instructor. May be repeated for credit. Variable hours.

ETR 112 Math for Electrical/Electronic Analysis (2 cr.)
Presents a specialized mathematics course for the electronics student who selects the option electronic analyst technology. Includes mathematical concepts and problems in algebra and trigonometry, and direct application to the specialty option. Includes a survey of advanced mathematics to develop and reinforce electronic concepts. May require preparation of a report as an out-of-class activity. Lecture 1 hour. Laboratory 2 hours. Total 3 hours per week.

ETR 115 D.C. and A.C. Fundamentals (3 cr.)
Studies current flow in direct and alternating current circuits with emphasis upon practical problems. Reviews the mathematics used in circuit calculations. Introduces concepts of resistance, capacitance, inductance and magnetism. Lecture 3 hours per week.

ETR 123-124 Electronic Applications I-II (2 cr. each)
Provides laboratory and shop experience as applied to basic electronic devices, circuits and systems with emphasis on practical measurements. Lecture 1 hour. Laboratory 2 hours. Total 3 hours.

ETR 136 General Industrial Electronic Systems (3 cr.)
Studies devices, circuits, power modules, analog and digital, open and closed loop control and servo systems. May include laboratory projects and modular troubleshooting. Lecture 2 hours. Laboratory 3 hours. Total 5 hours per week.

ETR 141-142 Electronics I-II (3 cr. each)
Introduces electronic devices as applied to basic electronic circuits and systems. Lecture 3 hours per week.

ETR 148 Amplifiers and Integrated Circuits (4 cr.)
Studies devices and amplifiers with emphasis on analysis and design. May include summing and integrating amplifiers, choppers, modulators and other circuits. Lecture 3 hours. Laboratory 3 hours. Total 6 hours per week.

ETR 149 PC Repair (3 cr.)
Teaches the maintenance, troubleshooting and repair of personal computer systems. Uses IBM or compatible computer systems to provide fault isolation drill and practice. Lecture 3 hours. Total 3 hours per week.

ETR 151-152 Electronic Circuits and Troubleshooting I-II (2 cr. each)
Studies analog and digital circuits and systems with standard circuit test and troubleshooting procedure. Lecture 2 hours per week.

ETR 206 Logic Circuits and Systems I (2 cr.)

Includes the basic numbering systems, Boolean algebra, logic circuits and systems as applied to electrical and electronic technology. Lecture 1 hour. Laboratory 3 hours. Total 4 hours per week.

ETR 207 Logic Circuits and Systems II (2 cr.)

Deals with math logic systems, pulse logic circuits and pulse logic systems as applied to computer and microprocessor technology. May require preparation of a report as an out-of-class activity. Lecture 1 hour. Laboratory 2 hours. Total 3 hours per week.

ETR 211-212 Electronic Diagnostics I-II (4 cr. each)

Teaches analyzing, testing and repair of fundamental assemblies, subassemblies, circuits and systems as applied to electronic maintenance and manufacturing. Lecture 2 hours. Laboratory 6 hours. Total 8 hours per week.

ETR 218 Industrial Electronics Circuits (4 cr.)

Introduces the principles of industrial measurements and control: electrical, electronic, mechanical, thermal, and optical measuring and records, and actuators, electronic instrumentation control devices and circuits. Provides demonstrations and laboratory experiments. Lecture 3 hours. Laboratory 3 hours. Total 6 hours per week.

ETR 241-242 Electronic Communications I-II (4 cr. each)

Studies noise, information and bandwidth, modulation and demodulation, transmitters and receivers, wave propagation, antennas and transmission lines. May include broad band communication systems, microwave, both terrestrial and satellite, fiber optics, multiplexing and associated hardware. Prerequisite: Knowledge of DC/AC Theory and devices. Lecture 2-3 hours. Laboratory 3 hours. Total 5-6 hours per week.

ETR 243 Digital, Analog and Data Communication Systems I (5 cr.)

Teaches theory and implementation of digital and analog circuits in communication systems. Includes PCM, multiplexing, analog modulation, analysis and performance of transmitters and receivers. May include optical satellite and other communications systems. Prerequisite: Knowledge of DC/AC theory and devices. Lecture 4 hours. Laboratory 3 hours. Total 7 hours.

ETR 245 Two-Way Communications (4 cr.)

Teaches mobile and base station communications, transmitters and receivers and their test equipment. Lecture 2 hours. Laboratory 6 hours. Total 8 hours per week.

ETR 246 Broadcast Systems (3 cr.)

Teaches practical operating fundamentals and systems for students interested in the field of commercial broadcast electronics. Includes AM, FM and TV broadcast systems. May require field trips to various types of operations. Lecture 2 hours. Laboratory 3 hours. Total 5 hours per week.

ETR 247 Display Systems (3 cr.)

Teaches principles, circuits and devices for producing, transmitting, receiving, storing, reproducing, processing

and displaying video and other visual information. Lecture 2 hours. Laboratory 3 hours. Total 5 hours per week.

ETR 248 Test Instruments and Measurements (2 cr.)

Studies circuits used in electronics measurement and application of these circuits to test instruments such as oscilloscopes, electronic meters, and bridges. Stresses the accuracy of measurements, how instruments work, proper use of instruments, and calibration techniques. Lecture 1 hour. Laboratory 3 hours. Total 4 hours per week.

ETR 255 Active Devices and Circuits (3 cr.)

Teaches theory of active devices and circuits, devices and circuit parameters, semi-conductor characteristics and the application of circuits to active systems. Includes testing and analysis of active devices and circuits. Prerequisite: Knowledge of DC/AC Theory. Lecture 2 hours. Laboratory 3 hours. Total 5 hours per week.

ETR 282-283 Digital Systems I-II (3 cr. each)

Includes fundamental definition, programming, circuitry, logic, operation/interfaces of computer and microprocessor systems. May include pulse circuits and pulse logic systems as applied to computer and microprocessor technology. Lecture 2 hours. Laboratory 3 hours. Total 5 hours per week.

(FIN) Financial Services

FIN 215 Financial Management (3 cr.)

Introduces basic financial management topics, including statement analysis, working capital, capital budgeting, and long-term financing. Focuses on Net Present Value and Internal Rate of Return Techniques, lease versus buy analysis, and Cost of Capital computations. Uses problems and cases to enhance skills in financial planning and decision making. Prerequisite: ACC 111 or ACC 211. Lecture 3 hours per week.

(FRE) French

FRE 203-204 Intermediate French I-II (3 cr.) (3 cr.)

Continues to develop understanding, speaking, reading, and writing skills. Prerequisite French 102 or equivalent. Lecture 3 hours per week.

(GEO) Geography

GEO 210 People and the Land: An Introduction to Cultural Geography (3 cr.)

Focuses on the relationship between culture and geography. Presents a survey of modern demographics, landscape modification, material and non-material culture, language, race and ethnicity, religion, politics, and economic activities. Introduces the student to types and uses of maps. Lecture 3 hours per week.

GEO 220 World Regional Geography (3 cr.)

Studies physical and cultural characteristics of selected geographical regions of the world. Focuses upon significant problems within each of the regions, and examines the geographical background of those problems. Introduces the student to types and uses of maps. Lecture 3 hours per week.

(GOL) Geology

GOL 105 Physical Geology (4 cr.)

Introduces the composition and structure of the earth and modifying agents and processes. Investigates the formation of minerals and rocks, weathering, erosion, earthquakes, and crustal deformation. Lecture 3 hours. Laboratory 3 hours. Total 6 hours per week.

GOL 106 Historical Geology (4 cr.)

Traces the evolution of the earth and life through time. Presents scientific theories of the origin of the earth and life and interprets rock and fossil record. Lecture 3 hours. Laboratory 3 hours. Total 6 hours per week.

(HIS) History

HIS 101, 102 History of Western Civilization I-II (3 cr. each)

Examines the development of western civilization from ancient times to the present. The first semester ends with the seventeenth century; the second semester continues through modern times. Lecture 3 hours per week.

HIS 121-122 United States History I-II (3 cr. each)

Surveys United States history from its beginning to the present. Lecture 3 hours per week.

HIS 266 Military History of the Civil War (3 cr.)

Analyzes military campaigns of the Civil War, including factors contributing to the defeat of the Confederacy and problems created by the war. May include field trips to Civil War sites in the region. Lecture 3 hours per week.

HIS 268 The American Constitution (3 cr.)

Analyzes the origin and development of the United States Constitution. Includes the evolution of civil liberties, property rights, contracts, due process, judicial review, federal-state relationships, and corporate-government relations. Lecture 3 hours per week.

(HIT) Health Information Technology

HIT 100 Introduction to the Health Care Delivery System (1 cr.)

Introduces the organization of health care delivery system with emphasis on types of providers and the role that accrediting and licensing bodies play in the delivery of health care. Lecture 1 hour per week.

HIT 105 CPT Coding (2 cr.)

Develops skills in coding a diagnosis and/or procedure according to the principles of CPT Coding. Not intended for HIT majors. Prerequisite: HLT 143.

HIT 106 ICD-9-CM Coding I (2 cr.)

Introduces ICD-9-CM coding classification system and provides actual coding exercises. Not intended for HIT majors. Prerequisite: HLT 143.

HIT 143 Managing Electronic Billing In A Medical Practice (3 cr.)

Presents practical knowledge on use of computer technology in medical practice management. Develops basic skills in preparation of universal billing claim including manual preparation. Explores insurance claim processing issues. HLT 143 is a prerequisite for this class. Lecture 2 hours per week.

HIT 195 ICD-9-CM Coding II (3 cr.)

Stresses advanced ICD-9-CM coding skills through practical exercises. Not intended for HIT majors. Prerequisite: HIT 106.

HIT 226 Legal Aspects Of Health Record Documentation (2 cr.)

Presents the legal requirements associated with health record documentation. Emphasizes the policies and procedures concerning the protection of the confidentiality of patient's health record. Lecture 2 hours per week.

(HLT) Health

HLT 100 First Aid and Cardiopulmonary Resuscitation (2 - 3 cr.)

Focuses on the principles and techniques of safety, first aid, and cardiopulmonary resuscitation. Lecture 2-3 hours per week.

HLT 105 Cardiopulmonary Resuscitation (1 cr.)

Provides training in coordinated mouth-to-mouth artificial ventilation and chest compression, choking, life-threatening emergencies, and sudden illness. Lecture 1 hour per week.

HLT 106 First Aid and Safety (2 cr.)

Focuses on the principles and techniques of safety and first aid. Lecture 2 hours per week.

HLT 116 Personal Wellness (2-3 cr.)

Explores the relationship between personal health and physical fitness as they apply to individuals in today's society. Includes nutrition, weight control, stress, conditioning, and drugs. Lecture 3 hours per week.

HLT 130 Nutrition and Diet Therapy (1 cr.)

Studies nutrients, sources, functions, and requirements with an introduction to diet therapy. Lecture 1 hour per week.

HLT 135 Child Health and Nutrition (3 cr.)

Focuses on the physical needs of the preschool child and the methods by which these are met. Emphasizes health routines, hygiene, nutrition, feeding and clothing habits, childhood diseases, and safety as related to health growth and development. Lecture 3 hours per week.

HLT 141 Intro to Medical Terminology (1-2 crs.)

Focuses on medical terminology for students preparing for careers in the health professions. Lecture 1-2 hours per week.

HLT 143-144 Medical Terminology I-II (3 cr. each)

Provides an understanding of medical abbreviations and terms. Includes the study of prefixes, suffixes, word stems, and technical terms with emphasis on proper spelling, pronunciation, and usage. Emphasizes more complex skills and techniques in understanding medical terminology. Lecture 3 hours per week.

HLT160 Personal Health and Fitness (3 cr.)

Studies the relationships between health and fitness. Topics include nutrition, disease prevention, weight control, smoking and health, medical care, aerobic and anaerobic conditioning, and the relationship between physical and mental health. Lecture 2 hours. Laboratory 2 hours. Total 4 hours per week.

HLT 195 Topics in: (1-5 cr.)

Provides an opportunity to explore topical areas of interest to or needed by students. May be repeated for credit. Variable hours.

HLT 200 Human Sexuality (3 cr.)

Provides a basic understanding of human sexuality. Includes anatomy, physiology, pregnancy, family planning, venereal diseases, and sexual variations. Lecture 3 hours per week.

HLT 215 Personal Stress and Stress Management (3 cr.)

Provides a basic understanding of stress and its physical, psychological, and social effects. Includes the relationships between stress and change, self-evaluation, sources of stress, and current coping skills for handling stress. Lecture 3 hours per week.

HLT 230 Principles of Nutrition and Human Development (3 cr.)

Teaches the relationship between nutrition and human development. Emphasizes nutrients, balanced diet, weight control, and the nutritional needs of an individual. Lecture 3 hours per week.

HLT 270 Health and Well-Being of the Older Adult (3 cr.)

Focuses on the health of the older adult; teaches health promotion; preventative health techniques; and accident prevention. Prerequisite: Admission to the Program. Lecture 3 hours per week.

(HMS) Human Services

HMS 141 Group Dynamics I (3 cr.)

Examines the stages of group development, group dynamics, the role of the leader in a group, and recognition of the various types of group processes. Discusses models of group dynamics that occur as a result of group membership dynamics. Lecture 3 hours per week.

HMS 142 Group Dynamics II (3 cr.)

Examines group dynamics, group leadership, group cohesion, transference and group helping through experiential involvement in group facilitating and leadership. Increases group skills through active classroom participation in group experiences. Lecture 3 hours per week.

HMS 231-232 Gerontology I-II (3 cr. each)

Examines characteristics of the aging process and problems for the elderly. Considers both theoretical and applied perspectives on the following issues: biological, psychological, sociological, economic and political. Lecture 3 hours per week.

HMS 231-232 Gerontology I-II (3 CR) (3 CR)

Examines characteristics of the aging process and problems for the elderly. Considers both theoretical and applied perspectives on the following issues: biological, psychological, sociological, economic and political. Lecture 3 hours per week.

(HUM) Humanities

HUM 165 Controversial Issues in Contemporary American Culture (3 cr.)

Introduces students to selected issues in contemporary American culture. Includes topic areas ranging from welfare reform, economic development, privacy, environmental protection and conservation, evolution vs. creation, to family values, and special interest lobbying in our state and national governments. Focuses on the development of the student's critical thinking skills by analyzing, evaluating, and reflecting on opposing sides of the same issue as expressed by public leaders, special interest groups and academicians. Lecture 3 hours per week.

HUM 195 Topics in: (1-5 cr.)

Provides an opportunity to explore topical areas of interest to or needed by students, including honors program seminars. May be repeated for credit. Variable hours.

(IND) Industrial Engineering Technology

IND 125 Installation and Preventive Maintenance (3 cr.)

Studies practices in the installation of machinery, including mounting, grouting, leveling, and alignment. Examines methods of preventive maintenance, including inspection, scheduled maintenance, controls, record keeping, repair parts stocking, and safety considerations. Lecture 2 hours. Laboratory 2 hours. Total 4 hours per week.

IND 137 Teamwork and Problem Solving (3 cr.)

Studies team concepts and problem solving techniques to assist project teams in improving quality and productivity. Provides knowledge of how to work as a team, plan and conduct good meetings, manage logistics and details, gather useful data, communicate the results and implement changes. Lecture 3 hours per week.

IND 145 Introduction to Metrology (3 cr.)

Studies principles of measurement and calibration control, application of statistics to measurement processes, and standards of measurements in calibration. May include the use of gauges and instruments in modern production and dimensional control concepts. Lecture 2 hours. Laboratory 2 hours. Total 4 hours per week.

IND 181 World Class Manufacturing (3 cr.)

Studies the principles and applications of the globalization of industry. Emphasizes the fundamentals of interpersonal/team process, organization skills, total quality tools for continuous improvement, statistical process control, manufacturing resource planning and just-in-time. Lecture 3 hours per week.

IND 230 Applied Quality Control (3 cr.)

Studies principles of inspection and quality assurance with emphasis on statistical process control. May include the setting up, maintaining, and interpreting of control charts, and review of basic metrology. Lecture 2 hours. Laboratory 2 hours. Total 4 hours per week.

IND 235 Statistical Quality Control (3 cr.)

Gives overview of the quality control function within industry. May include the organization, cost, and techniques of quality control. Emphasizes essentials and applications of statistics in the quality control function. Lecture 3 hours per week.

IND 298 Capstone Project (1-3 cr.)

A hands-on application of Lean Manufacturing, Quality and Problem Solving methods in the workplace. Laboratory 2-6 hours per week.

(ITD) Information Technology Database

ITD 110 Web Page Design I (3-4 cr.)

Stresses a working knowledge of web site designs, construction, and management using HTML or XHTML. Course content includes headings, lists, links, images, image maps, tables, forms, and frames. Recommended prerequisite is ITE 115. Lecture 3 hours. Laboratory 0-2 hours. Total 3-5 hours per week.

ITD 112 Designing Web Page Graphics (3-4 cr.)

Explores the creation of digital graphics for web design. Basic design elements such as color and layout will be explored utilizing a computer graphics program(s). Recommended prerequisite is ITD 110. Lecture 3 hours. Laboratory 0-2 hours. Total 3-5 hours per week.

ITD 210 Web Page Design II (3-4 cr.)

Incorporates advanced techniques in web site planning, design, usability, accessibility, advanced site management, and maintenance utilizing web editor software(s). Recommended prerequisite is ITD 110. Lecture 3 hours. Laboratory 0-2 hours. Total 3-5 hours per week.

ITD 212 Interactive Web Design (3-4 cr.)

Provides techniques in interactive design concepts to create cross-platform, low-bandwidth animations utilizing a vector-based application. This course emphasizes the importance of usability, accessibility, optimization and performance. Recommended prerequisite is ITD 110. Lecture 3 hours. Laboratory 0-2 hours. Total 3-5 hours per week.

(ITE) Information Technology Essentials

ITE 101 Introduction to Microcomputers (1-2 cr.)

Examines concepts and terminology related to microcomputers and introduces specific uses of microcomputers.

ITE 102 Computers and Information Systems (1-2 cr.)

Introduces terminology, concepts, and methods of using computers in information systems. This course teaches computer literacy, not intended for Information Technology majors.

ITE 115 Basic Computer Literacy (3-4 cr.)

Covers computer concepts and Internet skills and use a software suite which includes word processing, spreadsheet, database, and presentation software to demonstrate skills required for computer literacy. Recommended prerequisite keyboarding skills. Lecture 3 hours. Laboratory 0-2 hours. Total 3-5 hours per week.

ITE 116 Survey of Computer Software Applications (1-2 cr.)

Reviews current business software applications for microcomputers emphasizing comparison of a variety of software packages. This course provides experience with multiple operating system commands, database, spreadsheet, and word processing programs.

ITE 130 Introduction To Internet Services (3 cr.)

Provides instruction to provide students with a working knowledge of Internet terminology and services including e-mail, WWW browsing, search engines, ftp, file compression, and other services using a variety of software packages. This course provides instruction for basic web page construction. Lecture 3 hours. Total 3 hours per week.

ITE 140 Spreadsheet Software (3 cr.)

Covers the use spreadsheet software to create spreadsheets with formatted cells and cell ranges, control pages, multiple sheets, charts, and macros. Topics will include type and edit text in a cell, enter data on multiple worksheets, work with formulas and functions, create charts, pivot tables, and styles, insert headers and footers, and filter data. This course covers MOS Excel objectives. Lecture 3 hours. Laboratory 0-2 hours. Total 3-5 hours per week.

ITE 150 Desktop Database Software (4 cr.)

Incorporates instruction in planning, defining, and using a database; performing queries; producing reports; working with multiple files; and concepts of database programming. Course topics include database concepts, principles of table design and table relationships, entering data, creating and using forms, using data from different sources, filtering, creating mailing labels. This course covers MOS Access certification objectives. Lecture 3 hours. Laboratory 2 hours. Total 5 hours per week.

ITE 182 User Support/Help Desk Principles (4 cr.)

Introduces a variety of tools and techniques that are used to provide user support in help desk operations. This course includes help desk concepts, customer service skills, troubleshooting problems, writing for end users, help desk operations, and software, needs analysis, facilities management, and other topics related to end user support. Lecture 3 hours. Laboratory 0-2 hours. Total 3-5 hours per week.

ITE 215 Advanced Computer Literacy (4 cr.)

Incorporates advanced computer concepts including the integration of a software suite. Prerequisite: ITE 115 Basic Computer Literacy. Lecture 3 hours. Laboratory 2 hours. Total 5 hours per week.

ITE 221 PC Hardware and OS Architecture (4 cr.)

Covers instruction about processors, internal functions, peripheral devices, computer organization, memory management, architecture, instruction format, and basic OS architecture. Lecture 3 hours. Laboratory 2 hours. Total 5 hours per week.

(ITN) Information Technology Networking

ITN 114 Windows XP Professional (4 cr.)

Provides instruction in installation, configuration, administration, and troubleshooting of Windows XP Professional as a desktop operating system in a networked data communications environment. Prerequisite: ITE 115. Lecture 3 hours. Laboratory 2 hours. Total 5 hours per week.

ITN 115 Windows 2003 Server (SER) (4 cr.)

Consists of instruction that teaches students how to manage and maintain a Microsoft Windows Server 2003 environment. Prerequisite: ITN 114 or instructor approval. Lecture 3 hours. Laboratory 2 hours. Total 5 hours per week.

ITN 116 Windows 2003 Network Infrastructure Implementation, Management, & Maintenance (NI-IMM) (4 cr.)

Provides instruction on how to implement, manage, and maintain a Microsoft Windows Server 2003 network infrastructure. Prerequisite: ITN 115 or instructor approval. Lecture 3 hours. Laboratory 2 hours. Total 5 hours per week.

ITN 154 Networking Fundamentals-Cisco (4 cr.)

Provides introduction to networking using the OSI reference model. Course content includes data encapsulation,

TCP/IP suite, routing, IP addressing, and structured cabling design and implementation. Lecture 3 hours. Laboratory 2 hours. Total 5 hours per week.

ITN 155 Introductory Routing-Cisco (4 cr.)

Features an introduction to basic router configuration using Cisco IOS software. Course content includes system components, interface configuration, ip network design, troubleshooting techniques, configuration and verification of IP addresses, and router protocols. Lecture 3 hours. Laboratory 2 hours. Total 5 hours per week.

ITN 156 Basic Switching and Routing-Cisco (4 cr.)

Centers instruction in LAN segmentation using bridges, routers, and switches. Course content includes fast Ethernet, access lists, routing protocols, spanning tree protocol, virtual LANs, and network management. Prerequisite: ITN 155 or instructor approval. Lecture 3 hours. Laboratory 2 hours. Total 5 hours per week.

ITN 157 WAN Technologies-Cisco (4 cr.)

Concentrates on an introduction to Wide Area Networking (WANs). Course content includes WAN design, LAPB, Frame Relay, ISDN, HDLC, and PPP. Prerequisite: ITN 156 or instructor approval. Lecture 3 hours. Laboratory 2 hours. Total 5 hours per week.

ITN 250 Advanced Routing-Cisco (4 cr.)

Includes instruction focusing on the characteristics of various Routing Protocols used in the TCP/IP networking environment, static routing, OSPF, IGRP, EIGRP, BGP, advanced IP addressing, and security. Course content also examines various strategies for optimizing network routing performance. Lecture 3 hours. Laboratory 2 hours. Total 5 hours per week.

ITN 251 Remote Access Networking-Cisco (4 cr.)

Focuses on in-depth instruction to a variety of wide area networking technologies and their implementation. Course content includes POTS and analog network connectivity, ISDN (both BRI and PRI), PPP, Cisco, AAA Security System, and Frame Relay. Prerequisite: ITN 250. Lecture 3 hours. Laboratory 2 hours. Total 5 hours per week.

ITN 252 Advanced Switching-Cisco (4 cr.)

Provides in-depth instruction in switching as a core technology in today's networking environment. Course content includes VLANs, trunking protocols, spanning-tree protocol, HSRP, and multi-layer switching. Prerequisite: ITN 251. Lecture 3 hours. Laboratory 0-2 hours. Total 3-5 hours per week.

ITN 253 Network Troubleshooting-Cisco (4 cr.)

Centers on instruction in troubleshooting tools and techniques appropriate to the network communications environment. Course content includes workstation troubleshooting software, communication equipment troubleshooting options, and typical problems related to Switching, WAN, and routing technologies. Prerequisite: ITN 252. Lecture 3 hours. Laboratory 2 hours. Total 5 hours per week.

(ITP) Information Technology Programming

ITP 100 Software Design (3 cr.)

Introduces principles and practices of software development. Course content includes instruction in critical thinking, problem solving skills, and essential programming logic in structured and object-oriented design using contemporary tools. Recommended prerequisite or co requisite is high school algebra. Lecture 3 hours. Total 3 hours per week.

ITP 112 Visual Basic.NET I (4 cr.)

Concentrates instruction in fundamentals of object-oriented programming using Visual Basic.NET and the .NET framework. Course content emphasizes program construction, algorithm development, coding, debugging, and documentation of graphical user interface applications. Recommended prerequisite: ITP 100. Lecture 3 hours. Laboratory 2 hours. Total 5 hours per week.

ITP 120 Java Programming I (4 cr.)

Entails instruction in fundamentals of object-oriented programming using Java. This course emphasizes program construction, algorithm development, coding, debugging, and documentation of console and graphical user interface applications. Recommended prerequisite: ITP 100. Lecture 3 hours. Laboratory 2 hours. Total 5 hours per week.

ITP 134 Visual C++ Programming I (4 cr.)

Provides instruction in fundamentals of object-oriented programming and design using C++ for GUI applications. Course content emphasizes software design and construction using the concepts of foundation classes. Recommended prerequisite: ITP 100. Lecture 3 hours., Laboratory 2 hours. Total 5 hours per week.

ITP 136 C# Programming I (4 cr.)

Presents instruction in fundamentals of object-oriented programming and design using C#. Course content emphasizes program construction, algorithm development, coding, debugging, and documentation of applications within the .NET Framework. Recommended prerequisite: ITP 100. Lecture 3 hours. Laboratory 2 hours. Total 5 hours per week.

ITP 140 Client Side Scripting (3 cr.)

Provides instruction in fundamentals of Internet application design, development, and deployment using client side scripting language(s). Recommended prerequisites: ITP 100, ITD 110, and a programming language or equivalent experience. Lecture 3 hours. Total 3 hours per week.

ITP 212 Visual Basic.NET II (4 cr.)

Includes instruction in application of advanced object-oriented techniques to application development. Course content emphasizes database connectivity, advanced controls, web forms, and web services using Visual Basic.NET. Prerequisite: ITP 112. Lecture 3 hours. Laboratory 2 hours. Total 5 hours per week.

ITP 234 Visual C++ Programming II (4 cr.)

Encompasses instruction in advanced concepts of foundation classes for graphical user interfaces. Recommended prerequisite: ITP 134. Lecture 3 hours. Laboratory 2 hours. Total 5 hours per week.

ITP 245 Server-Side Java (4 cr.)

Emphasizes instruction in integration of web-based clients and server-side Java to three-tier business applications. Course content will use tools UML, XML, Java servlets, JSPs and JDBC database access. Recommended prerequisite or co requisite: ITP 220. Lecture 3 hours. Laboratory 2 hours. Total 5 hours per week.

(LGL) Legal Administration

LGL 110 Introduction to Law and the Legal Assistant (3 cr.)

Introduces various areas of law in which a legal assistant may be employed. Includes study of the court system (Virginia and federal) as well as a brief overview of criminal law, torts, domestic relations, evidence, ethics, the role of the legal assistant, and other areas of interest. Corequisite: ENG 134. Lecture 3 hours per week.

LGL 115 Real Estate Law for Legal Assistants (3 cr.)

Studies law of real property. Focuses on practical knowledge and skills necessary for practicing legal assistants to review or draft deeds, contracts, leases, and deeds of trust. Introduces recording documents and searching public records. Corequisite: ENG 134. Lecture 3 hours per week.

LGL 116 Domestic Relations and Consumer Law (3 cr.)

Studies elements of a valid marriage, grounds for divorce and annulment, separation, defenses, custody, support, adoptions, and applicable tax consequences. Focuses on separation and pre-nuptial agreements, pleading and rules of procedure. May include specific federal and Virginia consumer laws. Lecture 3 hours per week.

LGL 125 Legal Research (3 cr.)

Provides an understanding of various components of a law library and emphasizes research skills through the use of digests, encyclopedias, reporter systems, codes, Shepards, citations, ALR and other research tools. Lecture 3 hours per week. (Prerequisite: LGL 110 or instructor approval).

LGL 195 Topics in: (1-5 cr.)

Provides an opportunity to explore topical areas of interest to or needed by students. May also be used for special honors courses. May be repeated for credit. Variable hours.

LGL 215 Torts (3 cr.)

Studies fundamental principles of the law of torts, including preparation and use of pleadings and other documents involved in the trial of a civil action. Emphasizes personal injury and medical malpractice cases. Lecture 3 hours per week.

LGL 216 Trial Preparation and Discovery Practice (3 cr.)

Studies the preparation of a trial notebook, pretrial orders, use of interrogatories, depositions and other discovery tools used in assembling evidence in preparation for trial or an administrative hearing. Lecture 3 hours per week.

LGL 217 Trial Practice and the Law of Evidence (3 cr.)

Introduces civil and criminal evidence; kinds, degrees and admissibility of evidence; and methods and techniques of its acquisition. Emphasizes Virginia and federal rules of evidence. Focuses on elements of a trial and various problems associated with the trial of a civil or criminal case. Lecture 3 hours per week.

LGL 225 Estate Planning and Probate (3 cr.)

Introduces various devices used to plan an estate, including wills, trusts, joint ownership and insurance. Considers various plans in light of family situations and estate objectives. Focuses on practices involving administration of an estate including tax and threading. Lecture 2 hours. Laboratory 6 hours. Total 8 hours per week.

(MAC) Manufacturing**MAC 121-122-123 Numerical Control I-II-III (2 cr. each)**

Focuses on numerical control techniques in metal forming and machine processes. Includes theory and practice in lathe and milling machine computer numerical control program writing, setup and operation. Lecture 1 hours. Laboratory 2 hours. Total 3 hours per week.

MAC 126 Introductory CNC Programming (3 cr.)

Introduces programming of computerized numerical control machines with hands-on programming and operation of CNC machines. Lecture 2 hours. Laboratory 3 hours. Total 5 hours per week.

MAC 127 Advanced CNC Programming (3 cr.)

Provides in-depth study of programming computerized numerical control machines. Lecture 3 hours per week.

MAC 131 Machine Lab I (2 cr.)

Teaches fundamental machine shop operations, bench work, layout, measuring tools, and safety. Lecture 1 hour. Laboratory 3 hours. Total 4 hours per week.

MAC 150 Introduction to Computer-Aided Manufacturing (3 cr.)

Introduces computer aided manufacturing (CAM) with emphasis on programming of numerical control machinery. Teaches program writing procedures using proper language and logic and Smart Cam programming software to produce numerical control code for machines. Teaches basic computer usage, 2-D and 3-D CAD-CAM integration, and code-to-machine transfer. Lecture 2 hours. Laboratory 3 hours. Total 5 hours per week.

MAC 161-162 Machine Shop Practices I-II (3 cr. each)

Introduces safety procedures, bench work, hand tools, precision measuring instruments, drill presses, cut-off saws, engine lathes, manual surface grinders, and milling machines. Lecture 2 hours. Laboratory 3 hours. Total 5 hours per week.

MAC 163-164 Machine Shop Practices III-IV (3 cr. each)

Offers practice in the operation of the drill press, engine lathe, vertical milling machine, horizontal milling machine, and the surface grinder. Introduces practical heat treatment of directly hardenable steels commonly used in machine shops. Lecture 2 hours. Laboratory 3 hours. Total 5 hours per week.

MAC 221-222-223 Advanced Machine Tool Operations I-II-III (7 cr. each)

Focuses on advanced lathe and millwork with concentration on fits, finishes, inspection, quality control, and basic heat-treating. Includes design and construction of specific projects to determine the student's operational knowledge of all equipment. Lecture 4 hours. Laboratory 9 hours. Total 13 hours per week.

(MEC) Mechanical Engineering Technology**MEC 100 Introduction to Engineering Technology (2 cr.)**

Introduces professional fields of engineering technology. Covers the work of the engineering technologist, professional ethics, division of industrial practice, and engineering problem solving with hand calculator and computer applications. Lecture 1 hour. Laboratory 2 hours. Total 3 hours per week.

MEC 111 Materials for Industry (3 cr.)

Studies the nature, structure, properties, and typical applications of metallic, polymeric, ceramic, and composite materials. Promotes job entry understanding of basic material concepts. Focuses on applications of materials as well as the behavior of materials subjected to external stresses. Addresses as required the earth's limited material resources, energy efficient materials, dependence on foreign sources of materials, material systems, thermal processing, and electronic-related materials. Lecture 3 hours per week.

MEC 126 Computer Programming for Technologists (2 cr.)

Introduces computer programming to technology students. Covers programming for the microcomputer using high-level languages such as BASIC, FORTRAN, or PASCAL. Teaches computer solutions of mathematical problems in applications such as circuit analysis and static equilibrium. Prerequisite: MTH 113 or department approval. Lecture 2 hours per week.

MEC 131 Mechanics I-Statics for Engineering Technology (3 cr.)

Teaches Newton's laws, resultants and equilibrium of force systems, trusses and frames, determination of centroids, and distributed loads and moments of inertia. Introduces dry friction and force systems in space. Prerequisite: MTH 114. Lecture 3 hours per week.

MEC 132 Mechanics II-Strengths of Materials for Engineering Technology (3 cr.)

Teaches the concepts of stress and strain. Provides an analysis of stresses and deformations in loaded members, connectors, shafts, beams, columns, and combined stress. Prerequisite: MEC 131. Lecture 3 hours per week.

MEC 133 Mechanics III-Dynamics for Engineering Technology (2 cr.)

Focuses on rigid body mechanics including kinetics, kinematics, and applications to machine elements. Prerequisite: MEC 132. Lecture 2 hours per week.

MEC 161 Basic Fluid Mechanics-Hydraulics/Pneumatics (4 cr.)

Introduces theory, operation and maintenance of hydraulic/pneumatics devices and systems. Emphasizes the properties of fluids, fluid flow, fluid statics, and the application of Bernoulli's equation. Prerequisite: MTH 114 or department approval. Lecture 3 hours. Laboratory 3 hours. Total 6 hours per week.

MEC 211-212 Machine Design I-II (4 cr. each)

Introduces analytical design of bearings, clutches, coupling, brakes, springs, gearing systems, and power shafting. Emphasizes methods of construction, machine parts and specifications of materials, and manufacturing processes. Prerequisite: MEC 133 or department approval. Lecture 3 hours. Laboratory 3 hours. Total 6 hours per week.

MEC 226 Practical Metallurgy (3 cr.)

Studies metals and their structure. Focuses on effects of hardening, tempering, and annealing upon the structure and physical properties of ferrous and non-ferrous metals. Covers the equipment and processes in heat-treating. Lecture 3 hours. Total 3 hours per week.

(MKT) Marketing

MKT 100 Principles of Marketing (3 cr.)

Presents principles, methods and problems involved in the distribution and marketing of goods, services, and ideas to consumers and organizational buyers. Discusses present-day problems and policies connected with distribution and sale of products, pricing, promotion, and buyer motivation. Examines variations of the marketing mix and market research, plus legal, social and ethical considerations in marketing. Lecture 3 hours per week.

MKT 110 Principles of Selling (3 cr.)

Presents fundamental aspects of personal selling, sales, and selling methods. Emphasizes professional sales techniques and ethics. Examines organization necessary for a well-coordinated sales effort, including the training of sales personnel for maximum efficiency in selling and organization of the sales division within the business enterprise. Introduces sales management in planning, organizing, directing, and controlling the total sales effort. Lecture 3 hours per week.

MKT 195 Topics In: (1-5 cr.)

Provides an opportunity to explore topical areas of interest to or needed by students. May also be used for special honors courses. May be repeated for credit. Variable hours.

MKT 216 Retail Organization and Management (3 cr.)

Examines the organization of the retail establishment to accomplish its goals in an effective and efficient manner.

Includes study of site location, internal layout, store operations, and security. Examines the retailing mix, the buying or procurement process, pricing, and selling. Studies retail advertising, promotion and publicity as a coordinated effort to increase store traffic. Lecture 3 hours per week.

MKT 227 Merchandise Buying and Control (3 cr.)

Studies the merchandising cycle. Explores techniques used in the development of buying resources, merchandising plans, model stock, unit control, and inventory systems. Highlights merchandise selection, pricing strategies, and inventory control methods. Prerequisite: BUS 121, and MKT 100 or 216 or departmental approval. Lecture 3 hours per week.

MKT 281 Principles of Internet Marketing (3 cr.)

Introduces students to Internet marketing. Discusses how to implement marketing programs strategically and tactically using online communications tools. Teaches e-marketing strategies. Lecture 3 hours per week.

MKT 295 Topics In: (1-5 cr.)

Provides an opportunity to explore topical areas of interest to or needed by students. May also be used for special honors courses. May be repeated for credit. Variable hours.

MKT 298 Seminar & Project in Marketing (3 cr.)

Requires completion of a project or research report related to the student's occupational objectives and a study of approaches to the selection and pursuit of career opportunities in the field. May be repeated for credit. Prerequisite: Sophomore standing in the marketing curriculum, plus ACC 111 (or departmental approval). Lecture 3 hours per week.

(MTH) Mathematics

MTH 1 Developmental Mathematics (1-5 cr.)

Designed to bridge the gap between a weak mathematical foundation and the knowledge necessary for the study of mathematics courses in technical, professional, and transfer program. Topics may include arithmetic, algebra, geometry, and trigonometry. Credits not applicable toward graduation. Variable hours per week.

MTH 2 Basic Arithmetic (1-5 cr.)

Covers arithmetical principles and computations including whole numbers, fractions, decimals, percents, measurement, graph interpretation, geometric forms, and applications. Develops the mathematical proficiency necessary for selected curriculum entrance. Credits not applicable toward graduation. Variable hours per week.

MTH 3 Basic Algebra I (1-5 cr.)

Covers the topics of Algebra I including real numbers, equations and inequalities, exponents, polynomials, Cartesian coordinate system, rational expressions, and applications. Develops the mathematical proficiency necessary for selected curriculum entrance. Credits not applicable toward graduation. Prerequisites: a placement recommendation for MTH 3 and Arithmetic or equivalent. Variable hours per week.

MTH 4 Basic Algebra II (1-5 cr.)

Expands upon the topics of Algebra I including rational expressions, radicals and exponents, quadratic equations, systems of equations, and applications. Develops the mathematical proficiency necessary for selected curriculum entrance. Credits not applicable toward graduation. Prerequisites: a placement recommendation for MTH 4 and Algebra I or equivalent. Variable hours per week.

MTH 5 Algebra Revisited (1-5 cr.)

Reviews topics in Algebra II for entry into occupational-technical or transfer mathematics courses. Credits not applicable toward graduation. Prerequisites: a placement recommendation for MTH 5 and Algebra I and Algebra II or equivalent. Variable hours per week.

MTH 6 Developmental Geometry (1-5 cr.)

Covers topics in Euclidean geometry including similarity and congruency, plane and solid figures, right triangles, parallel and perpendicular lines, constructions, and applications. Develops the mathematical proficiency necessary for selected curriculum entrance. Credits not applicable toward graduation. Prerequisites: a placement recommendation for MTH 6 and Algebra I or equivalent. Variable hours per week.

MTH 7 Developmental Trigonometry (1-5 cr.)

Covers topics including right triangles, oblique triangles, identities, graphs, and applications. Develops the mathematical proficiency necessary for selected curriculum entrance. Credits not applicable toward graduation. Prerequisites: a placement recommendation for MTH 7 and Algebra I and Algebra II or equivalent. Variable hours per week.

MTH 9 Pre-Algebra (1-5 cr.)

Provides a transition between arithmetic and algebra. Includes arithmetic, order of operations, rational numbers, simple equation applications. Develops the mathematical proficiency necessary of curriculum entrance. Credits not applicable toward graduation. Placement recommendation for MTH 9. Variable hours per week.

MTH 103-104 Applied Technical Mathematics I-II (3 cr. each)

Presents a review of arithmetic, elements of algebra, geometry, and trigonometry. Directs applications to specialty areas. Prerequisites: a placement recommendation for MTH 103 and one unit of high school mathematics or equivalent. Lecture 3 hours per week.

MTH 113-114 Engineering Technical Mathematics I-II (5 cr. each)

Presents algebra, geometry, trigonometry, and an introduction to calculus. Includes solution of linear and quadratic equations, trigonometric curve sketching, logarithms, ratio, proportion, variation, vectors, and the binomial theorem. Prerequisites: a placement recommendation for MTH 113 and Algebra I and Geometry, or Algebra I and Algebra II, or equivalent. Lecture 5 hours per week.

MTH 121-122 Fundamentals of Mathematics I-II (3 cr. each)

Covers concepts of numbers, fundamental operations with numbers, formulas and equations, graphical analysis, binary numbers, Boolean and matrix algebra, linear programming, and elementary concepts of statistics. Prerequisites: placement recommendation for MTH 121 and one unit of high school mathematics or equivalent. (Intended for occupational/ technical programs.) Lecture 3 hours per week.

MTH 126 Mathematics for Allied Health (2-3 cr.)

Presents scientific notation, precision and accuracy, decimals and percents, ratio and proportion, variation, simple equations, techniques of graphing, use of charts and tables, logarithms, and the metric system. Prerequisites: a placement recommendation for MTH 126 and one unit of high school mathematics or equivalent. Lecture 2-3 hours per week.

MTH 151 Mathematics for the Liberal Arts I (3 cr.)

Presents topics in sets, logic, numeration systems, geometric systems, and elementary computer concepts. Prerequisites: a placement recommendation for MTH 151 and Algebra I, Algebra II and Geometry or equivalent. Lecture 3 hours per week.

MTH 157 Elementary Statistics (3 cr.)

Presents elementary statistical methods and concepts including descriptive statistics, estimation, hypothesis testing, linear regression, and categorical data analysis. (Credit will not be awarded for both MTH 157 and MTH 240 or MTH 157). Prerequisites: Algebra I, Algebra II and Geometry and a placement recommendation for MTH 157. Lecture 3 hours per week.

MTH 163 Precalculus I (3 cr.)

Presents college algebra, matrices, and algebraic, exponential, and logarithmic functions. Prerequisites: a placement recommendation for MTH 163 and Algebra I, Algebra II, and Geometry or equivalent. (Credit will not be awarded for both MTH 163 and MTH 166.) Lecture 3 hours per week.

MTH 164 Precalculus II (3 cr.)

Presents trigonometry, analytic geometry, and sequences and series. Prerequisite: MTH 163 or equivalent. (Credit will not be awarded for both MTH 164 and MTH 168.) Lecture 3 hours per week.

MTH 173 Calculus with Analytic Geometry I (5 cr.)

Presents analytic geometry and the calculus of algebraic transcendental functions including the study of limits, derivatives, differentials, and introduction to integration along with their applications. Designed for mathematical, physical, and engineering science programs. Prerequisites: a placement recommendation for MTH 173 and four units of high school mathematics including Algebra I, Algebra II, Geometry and Trigonometry or equivalent. (Credit will not be awarded for more than one of MTH 173, MTH 175, or MTH 273.) Lecture 5 hours per week.

MTH 174 Calculus with Analytic Geometry II (5 cr.)

Continues the study of analytic geometry and the calculus of algebraic and transcendental functions including rectangular, polar, and parametric graphing, indefinite and definite integrals, methods of integration, and power series along with applications. Designed for mathematical, physical, and engineering science programs. Prerequisite: MTH 173 or equivalent. (Credit will not be awarded for more than one of MTH 174, MTH 176, or MTH 274.) Lecture 5 hours per week.

MTH 175 Calculus of One Variable I (3 cr.)

Presents differential calculus of one variable including the theory of limits, derivatives, differentials, anti-derivatives and applications to algebraic and transcended functions. Designed for mathematical, physical, and engineering science programs. Prerequisites: a placement recommendation for MTH 175 and four units of high school mathematics including Algebra I, Algebra II, Geometry and Trigonometry or equivalent. (Credit will not be awarded for more than one of MTH 173, MTH 175 or MTH 273.) Lecture 3 hours per week.

MTH 176 Calculus of One Variable II (3 cr.)

Continues the study of integral calculus of one variable including indefinite integral, definite integral and methods of integration with applications to algebraic and transcended functions. Designed for mathematical, physical, and engineering science programs. Prerequisite: MTH 175 or equivalent. (Credit will not be awarded for more than one of MTH 174, MTH 176 or MTH 274.) Lecture 3 hours per week.

MTH 177 Introductory Linear Algebra (2 cr.)

Covers matrices, vector spaces, determinants, solutions of systems of linear equations, and eigen values. Designed for mathematical, physical, and engineering science programs. Co-requisite: MTH 175. Lecture 2 hours per week.

MTH 240 Statistics (3 cr.)

Presents an overview of statistics, including descriptive statistics, elementary probability, probability distributions, estimation, hypothesis testing, and correlation and regression. Prerequisites: a placement recommendation for MTH 240 and MTH 163 or MTH 166 or equivalent. (Credit will not be awarded for both MTH 240 and MTH 241.) Lecture 3 hours per week.

MTH 241 Statistics I (3 cr.)

Covers descriptive statistics, elementary probability, probability distributions, estimation, and hypothesis testing. Prerequisites: a placement recommendation for MTH 241 and MTH 163 or MTH 166 or equivalent. (Credit will not be awarded for both MTH 240 and MTH 241.) Lecture 3 hours per week.

MTH 242 Statistics II (3 cr.)

Continues the study of estimation and hypothesis testing with emphasis on correlation and regression, analysis of variance, chi-square tests, and non-parametric methods. Prerequisite: MTH 241 or equivalent. Lecture 3 hours per week.

MTH 271 Applied Calculus I (3 cr.)

Presents limits, continuity, differentiation of algebraic and transcendental functions with applications, and an introduction to integration. Prerequisite: MTH 163 or MTH 166 or equivalent. (Credit will not be awarded for both MTH 270 and MTH 271.) Lecture 3 hours per week.

MTH 272 Applied Calculus II (3 cr.)

Covers techniques of integration, multivariable calculus, and an introduction to differential equations. Prerequisite: MTH 271 or equivalent. Lecture 3 hours per week.

MTH 273 Calculus I (4 cr.)

Presents topics in differential calculus of one variable including the theory of limits, derivatives, differentials, definite and indefinite integrals and applications to algebraic and transcendental functions. Designed for mathematical, physical, and engineering science programs. Prerequisites: a placement recommendation for MTH 273 and four units of high school mathematics including Algebra I, Algebra II, Geometry and Trigonometry or equivalent. (Credit will not be awarded for more than one of the MTH 173, MTH 175 or MTH 273.) Lecture 3 hours per week.

MTH 285 Linear Algebra (3 cr.)

Covers matrices, vector spaces, determinants, solutions of systems of linear equations, basis and dimension, eigen values, and eigen vectors. Designed for mathematical, physical and engineering science programs. Prerequisite: MTH 174 or equivalent. Lecture 3 hours per week.

MTH 295 Topics in: (1-5 cr.)

Provides an opportunity to explore topical areas of interest to or needed by students. May be also used for special honors courses. May be repeated for credit. Variable hours.

(MTS) Motorsports Management and Technology

MTS 100 Introduction to Motorsports Management (3 cr.)

Provides a survey of the motorsports industry. Includes history, growth, and economic impact of motorsports. Includes sanctioning organizations, classification and characteristics of vehicles, related businesses and industries, financial issues, career opportunities, and other motorsports-related topics. Lecture: 3 hours per week.

MTS 110 Introduction to Motorsports Marketing (3 cr.)

Provides an overview of the principles of marketing goods and services related to the motorsports industry. Includes motorsports promotion, motorsports products, media impact, use of technology in motorsports marketing, motorsports sponsors, hospitality management, public relations, and other topics related to motorsports marketing. Lecture: 3 hours per week.

MTS 125 Motorsports Technology I (3 cr.)

Introduces the student to the various systems of the racecar. Focuses on the inter-related functions and the theoretical concepts of the high performance race engine. Emphasizes hands-on skills with identification and installation of component parts of a race engine. Prerequisite: MTS 120. Lecture: 2 hours. Laboratory: 2 hours. Total 4 hours per week.

MTS 205 Motorsports Safety, Environmental, and Transport Issues (3 cr.)

Provides an overview of the safety, environmental, and transportation issues related to the motorsports industry. Includes workplace regulations; materials handling; transport of vehicles and other equipment; moving complex operations; housing of personnel; DOT regulations; and other issues related to the safety, environment, and transport in the motorsports industry. Lecture : 3 hours per week.

(MUS) Music

MUS 121-122 Music Appreciation I-II (3 cr. each)

Increases the variety and depth of the student's interest, knowledge, and involvement in music and related cultural activities. Acquaints the student with traditional and twentieth century music literature, emphasizing the relationship music has as an art form with man and society. Increases the student's awareness of the composers and performers of all eras through listening and concert experiences. Lecture 3 hours per week.

MUS 131-132 Class Voice I-II (2 cr. each)

Introduces the many aspects of singing from the physical act through the aesthetic experience. The course is designed for the beginning singer who desires vocal improvement, and for the voice major as an addition to and extension of skills and knowledge necessary for artistic development. Introduces appropriate repertoire. Lecture 1 hour per week. Laboratory 2 hours per week. Total 3 hours per week.

(NAS) Natural Sciences

NAS 105 Natural Science Topics for Modern Society (3 cr.)

Emphasizes method of the scientific disciplines as applied to selected topics pertinent to modern society. Lecture 3 hours per week.

NAS 110 Elementary Physical Science (3 cr.)

Introduces physical concepts such as measurements, mechanics, heat, light, and electricity and magnetism. Lecture 2 hours per week. Recitation and laboratory 2 hours per week. Total 4 hours per week.

(NUR) Nursing

NUR 25 Nursing Assistant (3 cr.)

Teaches fundamentals of patient care with laboratory experience in foods and fluids, elimination, moving patients, morning, afternoon and evening care, care of hospital equipment, means of providing special comforts and safety,

and admission and discharge procedures. Lecture 2 hours. Laboratory 4 hours. Total 6 hours per week.

NUR 27 Nursing Assistant Advanced (3 cr.)

A course providing theory in basic nursing care of the resident in the long-term care facility or home setting. This course will follow the Virginia State Health Department and Virginia Board of Nursing Curriculum. It is offered in conjunction with NUR 25 and NUR 98.

NUR 98 Seminar & Project (3 cr.)

A course providing theory, demonstration and practical clinical experience in measuring vital signs. It is offered concurrently in conjunction with NUR 27 and NUR 25.

NUR 114 Geriatric Nursing (3-4 cr.)

Presents theoretical and clinical nursing aspects of the aging population. Includes the aging process, psychological aspects, common age-related disorders, pharmacologic aspects, care facilities, and relationships between elders and caregivers. Lecture 1-4 hours. Laboratory 0-9 hours. Total 3-13 hours per week.

(PBS) Public Service

PBS 120 Introduction to Community and Social Service (3 cr.)

Examines the basic principles, scope and functions of community and social service work including practices and current trends. Examines institutions to determine why they change, or fail to change. Introduces students to careers in community and social service work at federal, state, and municipal levels. Lecture 3 hours per week.

PBS 265 Interviewing (3 cr.)

Analyzes the principles and techniques of interviewing in various organizational settings. Examines reliability and validity of information gained through information interviewing, employment and selection interviewing, performance appraisal and disciplinary interviewing, as well as counseling interviewing. Lecture 3 hours per week.

(PED) Physical Education and Recreation

PED 103-104 Aerobic Fitness I-II (1-2 cr. each)

Develops cardiovascular fitness through activities designed to elevate and sustain heart rates appropriate to age and physical conditions. Variable hours per week.

PED 109 Yoga (1-2 cr.)

Focuses on the forms of yoga training emphasizing flexibility. Lecture 1-2 hours. Laboratory 0-2 hours. Total 1-3 hours per week.

PED 111-112 Weight Training I-II (1-2 cr. each)

Focuses on muscular strength and endurance training through individualized workout programs. Teaches appropriate use of weight training equipment. Variable hours per week.

PED 123-124 Tennis I-II (1-2 cr. each)

Teaches tennis skills with emphasis on stroke development and strategies for individual and team play. Includes rules, scoring, terminology, and etiquette. Variable hours per week.

PED 135-136 Bowling I-II (1-2 cr. each)

Teaches basic bowling skills and techniques, scoring, rules, etiquette, and terminology. Variable hours per week.

PED 141-142 Swimming I-II (1-2 cr. each)

Introduces skills and methods of swimming strokes. Focuses on safety and physical conditioning. Variable hours per week.

PED 160 Modern Dance (1-2 cr.)

Teaches the basic techniques of creative dance. Skills include self-expression, contemporary routines, dance forms, and basic choreography. Lecture 1-2 hours. Laboratory 0-2 hours. Total 1-3 hours per week.

PED 195 Topics in: (1-5 cr.)

Provides an opportunity to explore topical areas of interest to or needed by students. May be also used for special honors courses. May be repeated for credit. Variable hours.

PED 206 Sports Appreciation (2 cr.)

Focuses on the history, trends, rules, methods, strategy, and terminology of selected sports activities. Provides student awareness as a spectator and/or participant. Lecture 2 hours per week.

(PHI) Philosophy

PHI 100 Introduction to Philosophy (3 cr.)

Presents an introduction to philosophical problems and perspectives with emphasis on the systematic questioning of basic assumptions about meaning, knowledge, reality, and values. Lecture 3 hours per week.

PHI 115 Practical Reasoning (3 cr.)

Studies informal logic and language techniques as they relate to reasoning and argument. Provides practice in analyzing arguments and constructing sound arguments. Lecture 3 hours per week.

PHI 220 Ethics (3 cr.)

Provides a systematic study of representative ethical systems. Lecture 3 hours per week.

PHI 226 Social Ethics (3 cr.)

Provides a critical examination of moral problems and studies the application of ethical concepts and principles to decision-making. Topics may include abortion, capital punishment, euthanasia, man and the state, sexuality, war and peace, and selected issues of personal concern. Lecture 3 hours per week.

(PHT) Photography

PHT 101-102 Photography I-II (3 cr. each)

Teaches principles of photography and fundamental camera techniques. Requires outside shooting and lab work. Lecture 1 hour. Laboratory 4 hours. Total 5 hours per week.

(PHY) Physics

PHY 130 Survey of Applied Physics (3 cr.)

Surveys topics such as heat, electricity, and light with emphasis on practical applications. Lecture 2 hours. Laboratory 2 hours. Total 4 hours per week.

PHY 201-202 General College Physics I-II (4 cr. each)

Teaches fundamental principles of physics. Covers mechanics, thermodynamics, wave phenomena, electricity and magnetism, and selected topics in modern physics. Prerequisites: MTH 163 or equivalent. Lecture 3 hours. Laboratory 3 hours. Total 6 hours per week.

PHY 241-242 University Physics I-II (4 cr. each)

Teaches principles of classical and modern physics. Includes mechanics, wave phenomena, heat, electricity, magnetism, relativity, and nuclear physics. Prerequisite for PHY 241: MTH 173 or MTH 273 or divisional approval. Prerequisite for PHY 242: MTH 174 or MTH 274 or divisional approval. Lecture 3 hours. Laboratory 3 hours. Total 6 hours per week.

(PLS) Political Science

PLS 211-212 U.S. Government I-II (3 cr. each)

Teaches structure, operation, and process of national, state, and local governments. Includes in-depth study of the three branches of the government and of public policy. Lecture 3 hours per week.

PLS 241 International Relations I (3 cr.)

Teaches geographic, demographic, economic, ideological, and other factors conditioning the policies of countries and discusses conflicts and their adjustment. Lecture 3 hours per week.

PLS 242 International Relations II (3 cr.)

Teaches foreign policies of the major powers in the world community with an emphasis on the role of the United States in international politics. Lecture 3 hours per week.

(PNE) Practical Nursing

PNE 135 Maternal and Child Health Nursing (5 cr.)

Examines pregnancy, childbirth, and postpartum and newborn care from a family centered approach. Covers complications related to childbearing. Emphasizes growth and development and exploration of common childhood disorders at various stages. Lecture 4 hours. Laboratory 3 hours. Total 7 hours per week.

PNE 145 Trends in Practical Nursing (1 cr.)

Studies the role of the Licensed Practical Nurse. Covers legal aspects, organizations, and opportunities in practical nursing. Assists students in preparation for employment. Lecture 1 hour per week.

PNE 146 Fundamentals of Practical Nursing (6 cr.)

Introduces students to practical nursing history, legal and ethical aspects, and current trends. Teaches nursing knowledge and skills with emphasis on meeting basic patient needs. Utilizes nursing process. Provides learning experiences through classroom instruction, laboratory practices, and supervised clinical experience. Lecture 2 hours. Laboratory 12 hours. Total 14 hours per week.

PNE 151 Medical-Surgical Nursing II (4 cr.)

Studies etiology, symptoms, prescribed treatment, and experiences in the nursing care of patients with selected disorders. Selects learning experiences to correlate related patient care with classroom instruction whenever possible. Provides observational experiences when available. Lecture 3 hours. Laboratory 3 hours. Total 6 hours per week.

PNE 152 Medical-Surgical Nursing II (4-5 cr.)

Studies etiology, symptoms, prescribed treatment, and experiences in the nursing care of patients with selected disorders. Lecture 3-4 hours. Laboratory 3-6 hours. Total 6-9 hours per week.

PNE 155 Body Structure and Function (3-4 cr.)

Studies the structure and function of the body. Lecture 3-4 hours per week.

PNE 158 Mental Health and Psychiatric Nursing (1-2 cr.)

Recognizes emotional needs of patients. Provides knowledge of the role that emotions play. Enables students to understand their own behavior as well as patient behavior. Lecture 1-2 hours per week.

PNE 161 Nursing in Health Changes I (6-7 cr.)

Focuses on nursing situations and procedures necessary to assist individuals in meeting special needs related to human functions. Lecture 2-4 hours. Laboratory 6-15 hours. Total 10-17 hours per week.

PNE 162 Nursing in Health Changes II (10-11 cr.)

Continues the focus on nursing situations and procedures necessary to assist individuals in meeting special needs related to human functions. Lecture 4-6 hours. Laboratory 12-21 hours. Total 18-25 hours per week.

PNE 163 Nursing in Health Changes III (8-9 cr.)

Continues the focus on nursing situations and procedures necessary to assist individuals in meeting special needs related to human functions. Lecture 4-5 hours. Laboratory 9-15 hours. Total 14-19 hours per week.

PNE 173 Pharmacology for Practical Nurses (1-2 cr.)

Studies history, classification, sources, effects, uses and legalities of drugs. Teaches problem solving skills used in medication administrations. Emphasizes major drug classes and specific agents within each class. Lecture 1-2 hours per week.

PNE 174 Applied Pharmacology for Practical Nurses (1-2 cr.)

Applies problem-solving skills in preparing and administering medications. Lecture 0-1 hour. Laboratory 3-6 hours. Total 3-6 hours per week.

PNE 181-182 Clinical Experience I-II (5 cr. each)

Provides guided nursing experiences in the hospital setting. Practices skills and applies principles of nursing basic areas. Includes supervision in administration of medicines. Encourages students to develop basic skills in analyzing patient needs and making nursing decisions. Laboratory 15-18 hours per week.

PNE 195 Topics in: (1-5 cr.)

Provides an opportunity to explore topical areas of interest to or needed by students. Variable hours.

(PNT) Printing

PNT 110 Survey of Reproduction Processes (3 cr.)

Presents history of printing, job safety, and career opportunities. Evaluates various printing processes including letterpress, offset, gravure, heat transfer, flexographic and screen printing. Lecture 2 hours. Laboratory 3 hours. Total 5 hours per week.

PNT 131 Principles of Lithography I (4 cr.)

Presents principles of lithography printing, its safety practices and equipment operation. Covers job planning, copy preparation, stripping, pre-sensitized plates, small press operation, ink, paper handling, finishing operations. Co-requisite: PNT 155 or department approval. Lecture 3 hours. Laboratory 3 hours. Total 6 hours per week.

PNT 132 Principles of Lithography II (4 cr.)

Studies lithographic process including more complex types of production techniques and operations. Covers close register work, 2-color printing, types of imposition, ruled forms, scribing, stripping multiple page flats. Prerequisite: PNT 131 or department approval. Lecture 3 hours. Laboratory 3 hours. Total 6 hours per week.

PNT 135 Print Imaging (2 cr.)

This course is designed to introduce the student of graphic imaging as it relates to the printing industry. Specific topics will include capturing and reproduction of line art, line copy and continuous tone by conventional and electronic methods. Co-requisite: PNT 131 or departmental approval. Lecture 1 hour. Laboratory 3 hours. Total 4 hours per week.

PNT 141-142 Printing Applications I-II (3 cr. each)

Provides instruction in the production of college-related publications and print shop management. Provides classroom and laboratory experiences in photography, layout and design, copy preparation, presswork, inventory control and production management. Lecture 1 hour. Laboratory 4 hours. Total 5 hours per week.

PNT 211-212-213 Electronic Publishing I-II-III (3 cr. each)

Teaches principles of typography and graphics, word processing and page layout. Survey of electronic publishing, hardware systems, peripherals, laser printers and image setters. Concentrated use of application software utilizing Macintosh microcomputers to achieve a high degree of proficiency in completing a variety of laboratory projects. Prerequisite: PNT 131; Co-requisites: PNT 221-222-223 or department approval. Lecture 2 hours, laboratory 2 hours. Total 4 hours per week.

PNT 221-222-223 Layout and Design I-II-III (3 cr. each)

Analyzes production art necessary to prepare camera-ready copy for photomechanical printing. Teaches basic drawing concepts and techniques with emphasis on design principles, and care and use of instruments. Studies production methods to prepare ruled forms, overlays, bendays, bleeds, two and multicolor forms for advertising and publication work. Prerequisite: PNT 131; Co-requisites: PNT 211, 212, 213 or department approval. Lecture 2 hours. Laboratory 3 hours. Total 5 hours per week.

PNT 231-232 Lithographic Chemistry I-II (2 cr. each)

Introduces chemistry and how it involves the printer. Covers the role of water in lithography, pH of solutions, plate coatings and film emulsions. Studies relationship of paper and ink, emulsification, water logging, effect of humidity, and causes and control of static electricity. Prerequisite: PNT 132 or department approval. Lecture 2 hours per week.

PNT 241 Advanced Printing Applications (3 cr. each)

Continues PNT 141 and 142 to provide additional experience in production and shop management. Lecture 1 hour per week. Laboratory 4 hours per week. Total 5 hours per week.

PNT 245 Production Planning and Estimating (4 cr.)

Teaches theory and gives experience in planning and quality control for printing production. Includes printing plant supervision and management techniques, organization, maintenance and inventory control systems. Discusses estimating for printing, including job layout, purchasing, pricing and trade customs. Prerequisite: PNT 260, 264 and BUS 121, or department approval. Lecture 3 hours. Laboratory 3 hours. Total 6 hours per week.

PNT 251-252 Offset Press Operations I-II (4 cr. each)

Explains procedures for practical operation of offset equipment including adjustments, setup make-ready, and imposition for single-color and multi-color production jobs. Studies feeder registration, printing and delivery systems, roller and blanket problems, ink and dampening problems, and quality control. Prerequisite: PNT 132 or department approval. Lecture 3 hours. Laboratory 3 hours. Total 6 hours per week.

PNT 260 Color Separation (3 cr.)

Introduces study of color theories and principles as they apply to process color printing. Provides classroom and laboratory experiences in dot gain, densitometry, creation and manipulation of color images and electronic color separation. Lecture: 2 hours. Laboratory: 3 hours. Total: 5 hours per week.

PNT 264 Color Image Assembly (4 cr.)

Teaches principles of color image assembly. Includes types of mechanical art; stripping materials, register systems; process color stripping; spot color stripping; complementary flats; use of color charts and butting screen tints. Prerequisite: PNT 260 or department approval. Lecture 3 hours. Laboratory 3 hours. Total 6 hours per week.

(PSY) Psychology

PSY 126 Psychology for Business and Industry (3 cr.)

Focuses on the application of psychology to interpersonal relations and the working environment. Includes topics such as group dynamics, motivation, employee-employer relationship, interpersonal communications, and techniques for selection and supervision of personnel. Lecture 3 hours per week.

PSY 200 Principles of Psychology (3 cr.)

Surveys the basic concepts of psychology. Covers the scientific study of behavior, behavioral research methods and analysis, and theoretical interpretations. Includes topics such as: physiological mechanisms, sensation/perception, motivation, learning, personality, psychopathology, therapy, and social psychology. Lecture 3 hours per week.

PSY 201-202 Introduction to Psychology I-II (3 cr. each)

Examines human and animal behavior, relating experimental studies to practical problems. Includes topics such as sensation/perception, learning, memory, motivation, emotion, stress, development, intelligence, personality, psychopathology, therapy, and social psychology. Lecture 3 hours per week.

PSY 215 Abnormal Psychology (3 cr.)

Explores historical views and current perspectives of abnormal behavior. Emphasizes major diagnostic categories and criteria, individual and social factors of maladaptive behavior, and types of therapy. Includes methods of clinical assessment and research strategies. Prerequisite: PSY 200 or PSY 201. Lecture 3 hours per week.

PSY 230 Developmental Psychology (3 cr.)

Studies the development of the individual from conception to death. Follows a life-span perspective on the development of the person's physical, cognitive, and psychosocial growth. Lecture 3 hours per week.

PSY 235 Child Psychology (3 cr.)

Studies development of the child from conception to adolescence. Investigates physical, intellectual, social, and emotional factors involved in the child's growth. Lecture 3 hours per week.

PSY 236 Adolescent Psychology (3 cr.)

Studies development of the adolescent. Investigates physical, intellectual, social, and emotional factors of the individual from late childhood to early adulthood. Lecture 3 hours per week.

PSY 295 Topics in: (1-5 cr.)

Provides an opportunity to explore topical areas of interest to or needed by students. May be also used for special honors courses. May be repeated for credit. Variable hours.

(REA) Real Estate

REA 100 Principles of Real Estate (4 cr.)

Examines practical applications of real estate principles. Includes a study of titles, estates, land descriptions, contracts, legal instruments and concepts, real estate mathematics, financing, agency, appraisal, fair housing, and management of real estate. Lecture 4 hours per week.

REA 195 Topics in: (1-5 cr.)

Provides an opportunity to explore topical areas of interest to or needed by students. May be also used for special honors courses. May be repeated for credit. Variable hours.

REA 215 Real Estate Brokerage (3 cr.)

Considers administrative principles and practices of real estate brokerage, financial control, and marketing of real property. Prerequisite: REA 100 or departmental approval. Lecture 3 hours per week.

REA 216 Real Estate Appraisal (3 cr.)

Explores fundamentals and applications of real estate valuation. Introduces the Uniform Standards of Professional Appraisal Practice and the Uniform Residential Appraisal Report form. Prerequisite: REA 100 or departmental approval. Lecture 3 hours per week.

REA 217 Real Estate Finance (3 cr.)

Presents principles and practices of financing real estate. Analyzes various types of note contracts and mortgage and deed of trust instruments. Cover underwriting of conventional and government insured and guaranteed loans. Prerequisite: REA 100 or departmental approval. Lecture 3 hours per week.

REA 245 Real Estate Law (3 cr.)

Focuses on real estate law, including rights pertaining to property ownership and management, agency, contracts, transfers of real property ownership, fair housing, and tax implications. Prerequisite: REA 100 or departmental approval. Lecture 3 hours per week.

REA 295 Topics in: (1-5 cr.)

Provides an opportunity to explore topical areas of interest to or needed by students. May be also used for special honors courses. May be repeated for credit. Variable hours.

(REL) Religion

REL 200 Survey of the Old Testament (3 cr.)

Surveys books of the Old Testament, with emphasis on prophetic historical books. Examines the historical and geographical setting and place of the Israelites in the ancient Middle East as background to the writings. Lecture 3 hours per week.

REL 210 Survey of the New Testament (3 cr.)

Surveys books of the New Testament, with special attention upon placing the writings within their historical and geographical setting. Lecture 3 hours per week.

REL 230 Religions of the World (3 cr.)

Introduces the religions of the world with attention to origin, history, and doctrine. Lecture 3 hours per week.

REL 235 Major Religious Thinkers (3 cr.)

Examines the works of one or more important people in religious thought. Lecture: 3 hours per week.

REL 255 Selected Problems and Issues in Religion (3 cr.)

Examines selected problems and issues of current interest in religion. May be repeated for credit. Lecture: 3 hours per week.

(SAF) Safety

SAF 126 Principles of Industrial Safety (3 cr.)

Teaches principles and practices of accident prevention, analysis of accident causes, mechanical safeguards, fire prevention, housekeeping, occupational diseases, first aid, safety organization, protection equipment and general safety principles and promotion. Lecture 3 hours per week.

SAF 195 Shop Safety (1 cr.)

This course will teach general shop safety (correct clothing, eye protection, hair protection, foot protection, etc.) and government guidelines (MSDA sheets, hazardous material, OSHA guidelines and confined spaces). Lecture 1 hour per week.

(SOC) Sociology

SOC 200 Principles of Sociology (3 cr.)

Introduces fundamentals of social life. Presents significant research and theory in areas such as culture, social structure, socialization, deviance, social stratification, and social institutions. A student taking SOC 200 may not enroll in SOC 201 or 202. Lecture: 3 hours per week

SOC 201-202 Intro to Sociology I-II (3 cr. each)

Introduces basic concepts and methods of sociology. Presents significant research and theory in areas such as socialization, group dynamics, gender roles, minority group relations, stratification, deviance, culture, community studies. Includes population, social change, and social institutions (family, education, religion, political system, economic system). SOC 201 is a prerequisite for SOC 202. Lecture 3 hours per week.

SOC 215 Sociology of the Family (3 cr.)

Studies topics such as marriage and family in social and cultural context. Addresses the single scene, dating and marriage styles, child-rearing, husband and wife interaction, single parent families, alternative lifestyles. Prerequisite: SOC 200 or SOC 201, or permission of instructor. Lecture 3 hours per week.

SOC 235 Juvenile Delinquency (3 cr.)

Studies demographic trends, casual theories, and control of juvenile delinquency. Presents juveniles' interaction with family, schools, police, courts, treatment programs, and facilities. Prerequisite: ADJ 100 and SOC 201, or permission of instructor. Lecture 3 hours per week.

SOC 236 Criminology (3 cr.)

Studies research and causal theories of criminal behavior. Examines crime statistics, crime victims, and types of criminal offenses. Introduces role of police, judicial and correctional system in treatment and punishment of offenders. Is also approved for ADJ Criminology. Prerequisites: ADJ 100, SOC 201, SOC 235 or permission of instructor. Lecture 3 hours per week.

SOC 268 Social Problems (3 cr.)

Applies sociological concepts and methods to analysis of current social problems. Includes delinquency and crime, mental illness, drug addiction, alcoholism, sexual behavior, population crisis, race relations, family and community disorganization, poverty, automation, wars, and disarmament. Prerequisite: SOC 200, SOC 201 or permission of instructor. Lecture 3 hours per week.

(SPA) Spanish

SPA 101-102 Beginning Spanish I-II (4 cr. each)

Introduces understanding, speaking, reading, and writing skills and emphasizes basic Spanish sentence structure. May be also used for special honors classes. May include an additional hour of oral drill and practice per week. Lecture 4 hours per week.

SPA 103-104 Basic Spoken Spanish I-II (3 cr. each)

Teaches oral communications and introduces cultural mores and customs to students with no prior instruction in the language. Lecture: 3 hours per week.

SPA 150 Spanish for Law Enforcement (3 cr.)

Introduces Spanish to those in the criminal justice field. Emphasizes oral communication and practical first-hand police and justice vocabulary. May include oral drill and practice. Lecture 3 hours per week.

SPA 203-204 Intermediate Spanish I-II (3 cr. each)

Continues to develop understanding, speaking, reading, and writing skills. Classes conducted in Spanish. Prerequisite: SPA 102 or equivalent. May include oral drill and practice. Lecture 3 hours per week.

(SPD) Speech and Drama

SPD 100 Principles of Public Speaking (3 cr.)

Applies theory and principles of public address with emphasis on preparation and delivery. Lecture 3 hour per week.

SPD 130 Introduction to the Theatre (3 cr.)

Surveys the principles of drama, the development of theatre production, and selected plays to acquaint the student with various types of theatrical presentations. Lecture 3 hours per week.

SPD 131-132 Acting I-II (3 cr. each)

Develops personal resources and explores performance skills through such activities as theatre games, role playing, improvisation, work on basic script units, and performance of scenes. Lecture: 2 hours. Laboratory: 3 hours. Total: 5 hours per week.

SPD 151-152 Film Appreciation I-II (3 cr.) (3 cr.)

Aims to increase the student's knowledge and enjoyment of film and film criticism through discussion and viewing of movies. Lecture 3 hours per week.

(STD) Student Development

STD 100 Orientation (1 cr.)

Assists students in transition to colleges. Provides overviews of college policies, procedures, and curricular offerings. Encourages contacts with other students and staff. Assists students toward college success through information regarding effective study habits, career and academic planning, and other college resources available to students. May include English and math placement testing. Strongly recommended for beginning students. Required for graduation. Lecture 1 hour per week.

STD 104 Study Skills (1-3 cr.)

Assists students in planning strategies to overcome nonproductive study habits and in implementing positive study behaviors. Includes management, memory improvement, note taking, and test taking. Lecture 1-3 hours per week

STD 106 Job Search Strategies (1 cr.)

Provides experience in resume writing, preparation of applications, letters of application, and successfully preparing for and completing the job interview. Assists students in identifying their marketable skills and aptitudes. Develops strategies for successful employment search. Assists students in understanding effective human relations techniques and communication skills in job search. Lecture 1 hour per week.

STD 108 College Survival Skills (1-2 cr.)

Provides an orientation to the college. Introduces study skills, career and life planning. Offers an opportunity to engage in activities aimed at self-discovery. Emphasizes development of "coping skills" such as listening, interpersonal relations, competence, and improved self-concept. Recommended for students enrolled in developmental courses. Lecture 1-2 hours per week.

STD 195-W1 Electronic Portfolios (1 cr.)

Teaches the techniques and skills needed to develop an electronic portfolio that can be used when applying for a job. Students will post resumes, cover letters, pictures of projects and activities, narration, short movies, hobbies, etc., on the internet, as well as placing them on a self-starting CD. Total hour per week. Web based.

(WEL) Welding

WEL 116 Welding I (Oxyacetylene) (2 cr.)

Teaches oxygen/acetylene welding and cutting including safety of equipment, welding, brazing and soldering procedures and cutting procedures. Lecture 1 hour. Laboratory 3 hours. Total 4 hours per week.

WEL 120 Fundamentals of Welding (2 cr.)

Introduces history of welding processes. Covers types of equipment, and assembly of units. Stresses welding procedures such as fusion, non-fusion, and cutting oxyacetylene. Introduces arc welding. Emphasizes procedures in the use of tools and equipment. Lecture 1 hour. Laboratory 3 hours. Total 4 hours per week.

WEL 123-124 Arc Welding I-II (3 cr.)

Teaches operation of AC transformers and DC motor generator arc welding sets, welding polarities, heats and electrodes for use in joining various metal alloys by the arc welding process. Deals with running beads, butt, and fillet welds in all positions. Emphasizes safety procedures. Lecture 2 hours. Laboratory 2 hours. Total 4 hours per week.

WEL 135 Inert Gas Welding (2 cr.)

Introduces practical operations in use of inert gas shielded arc welding. Studies equipment operation, setup, safety and practice of GMAW (MIG) and GTAW (TIG). Lecture 1 hour. Laboratory 3 hours. Total 4 hours per week.

DCC Developmental Prerequisites

Curricular students should not enroll in the following courses until they have demonstrated proficiency on the placement examination or completed the appropriate developmental course. Note: "C" attached to course number indicates it may be taken concurrently as a co-requisite.

Course #	Course Name	Course #	Course Name
ACC 105	Office Accounting (<i>MTH2, ENG 2, ENG 3, ENG 4, ENG 5</i>)	BIO 102	General Biology II (<i>MTH 2, MTH 3, MTH 4C, MTH 9, ENG 1, ENG 3C, ENG 4, ENG 5</i>)
ACC 111	Accounting I (<i>MTH 2C, ENG 1C, ENG 4C</i>)	BIO 141	Human Biology and Physiology I (<i>MTH 2, ENG 1, ENG 3, ENG 4, ENG 5</i>)
ACC 211	Principles of Accounting I (<i>MTH2, MTH 3, ENG 1, ENG 3C, ENG 4, ENG 5C</i>)	BUS 100	Introduction to Business (<i>MTH 2C, ENG 1, ENG 3C, ENG 4, ENG 5C</i>)
ADJ 100	Survey of Criminal Justice (<i>ENG 1, ENG 3C, ENG 4, ENG 5C</i>)	BUS 111	Principles of Supervision (<i>ENG 1, ENG 3C, ENG 4, ENG 5C</i>)
ADJ 116	Special Enforcement Topics (<i>ENG 1, ENG 3C, ENG 4, ENG 5C</i>)	BUS 121	Business Mathematics I (<i>MTH 2, ENG 1, ENG 4, ENG 5C</i>)
ADJ 130	Introduction to Criminal Law (<i>MTH2, ENG 1, ENG 3C, ENG 4, ENG 5C</i>)	BUS 122	Business Mathematics II (<i>MTH 2</i>)
ADJ 131	Legal Evidence (<i>MTH2, ENG 1, ENG 3, ENG 4, ENG 5</i>)	BUS 125	Applied Business Mathematics (<i>MTH 2, ENG 1, ENG 4, ENG 5C</i>)
ADJ 140	Introduction to Corrections (<i>ENG 1, ENG 3C, ENG 4, ENG 5C</i>)	BUS 147	Introduction to Business Information Systems (<i>MTH 2, MTH 3, ENG 1, ENG 3C, ENG 4, ENG 5</i>)
ADJ 145	Corrections and the Community (<i>ENG 1, ENG 3C, ENG 4, ENG 5C</i>)	BUS 165	Small Business Management (<i>MTH 2, ENG 1, ENG 3C, ENG 4, ENG 5C</i>)
ADJ 150	Introduction to Security Administration (<i>ENG 1, ENG 3C, ENG 4, ENG 5C</i>)	BUS 209	Continuous Quality Improvement (<i>MTH 2, ENG 1, ENG 3C, ENG 4, ENG 5C</i>)
ADJ 171	Forensic Science I (<i>MTH2, ENG 1, ENG 3C, ENG 4, ENG 5C</i>)	BUS 220	Introduction to Basic Statistics (<i>MTH 2, ENG 1, ENG 4, ENG 5C</i>)
ADJ 215	Report Writing (<i>ENG 1, ENG 3, ENG 4, ENG 5</i>)	BUS 221	Business Statistics I (<i>ENG 1, ENG 3, ENG 4, ENG 5</i>)
ADJ 227	Constitutional Law for Justice Personnel (<i>MTH 2, ENG 1, ENG 3, ENG 4, ENG 5</i>)	BUS 227	Quantitative Methods (<i>ENG 1, ENG 3, ENG 4, ENG 5</i>)
ADJ 236	Principles of Criminal Investigation (<i>MTH 2, ENG 1, ENG 3, ENG 4, ENG 5</i>)	BUS 241	Business Law I (<i>ENG 1, ENG 5</i>)
ADJ 257	Loss Prevention (<i>ENG 1, ENG 3, ENG 4, ENG 5</i>)	CHD 118	Language Arts for Young Children (<i>ENG 1, ENG 3C, ENG 4, ENG 5C</i>)
AIR 111	Air Conditioning and Refrigeration Controls I (<i>ENG 4</i>)	CHD 120	Introduction to Early Childhood Education (<i>ENG 1, ENG 3C, ENG 4, ENG 5C</i>)
AIR 117	Metal Layout I (<i>ENG 4C</i>)	CHD 125	Creative Activities for Children (<i>ENG 1, ENG 3C, ENG 4, ENG 5C</i>)
AIR 121	Air Conditioning and Refrigeration I (<i>ENG 4C</i>)	CHD 126	Science and Math Concepts for Children (<i>MTH 2, ENG 1, ENG 3, ENG 4, ENG 5</i>)
AIR 154	Heating Systems I (<i>ENG 4C</i>)	CHD 145	Teaching Art, Music, and Movement to Children (<i>ENG 1, ENG 3, ENG 4, ENG 5</i>)
AIR 155	Heating Systems II (<i>ENG 4C</i>)	CHD 166	Infant and Toddler Programs (<i>ENG 1, ENG 3, ENG 4, ENG 5</i>)
AIR 156	Heating Systems III (<i>ENG 4C</i>)	CHD 167	CDA Theories and Applications: Portfolio (<i>ENG 1, ENG 3, ENG 4, ENG 5</i>)
AIR 161	Heating, Air and Refrigeration Calculations I (<i>ENG 4C</i>)	CHD 205	Guiding the Behavior of Children (<i>MTH 2, ENG 1, ENG 3, ENG 4, ENG 5</i>)
AIR 165	Air Conditioning Systems I (<i>ENG 4C</i>)	CHD 210	Introduction to Exceptional Children (<i>MTH 2, ENG 1, ENG 3, ENG 4, ENG 5</i>)
ASL 100	American Sign Language I (<i>ENG 3C, ENG 5C</i>)	CHD 215	Models of Early Childhood Education Programs (<i>MTH 2, ENG 1, ENG 3, ENG 4, ENG 5</i>)
ASL 101	American Sign Language II (<i>ENG 3, ENG 5</i>)	CHM 101	General Chemistry I (<i>MTH 2, MTH 3, ENG 1, ENG 3, ENG 4, ENG 5</i>)
AST 101	Keyboarding I (<i>MTH 2C, ENG 4C</i>)	CHM 102	General Chemistry II (<i>MTH 2, MTH 3, ENG 1, ENG 3, ENG 4, ENG 5</i>)
AST 113	Keyboarding for Speed and Accuracy (<i>ENG 4C</i>)	CHM 111	College Chemistry I (<i>MTH 2, MTH 3, ENG 1, ENG 3, ENG 4, ENG 5</i>)
AST 117	Keyboarding for Computer Usage (<i>ENG 4C</i>)	CHM 112	College Chemistry II (<i>MTH 2, MTH 3, ENG 1, ENG 3, ENG 4, ENG 5</i>)
AST 201	Keyboarding III (<i>ENG 1, ENG 3, ENG 4, ENG 5</i>)	CIV 170	Principles of Surveying (<i>MTH 2, MTH 3, ENG 1, ENG 4</i>)
AST 234	Records and Database Management (<i>MTH 2C, ENG 1, ENG 3C, ENG 4, ENG 5C</i>)	DRF 120	Introduction to Graphic Representation (<i>MTH 2C, MTH 4C, ENG 4</i>)
AST 238	Word Processing Advanced Operations (<i>MTH 2C, ENG 4, ENG 5</i>)	DRF 114	Drafting I (<i>MTH 2C</i>)
AST 243	Office Administration I (<i>ENG 1, ENG 4</i>)		
AST 244	Office Administration II (<i>ENG 1, ENG 4</i>)		
AST 253	Advanced Desktop Publishing I (<i>ENG 4</i>)		
AST 265	Legal Office Procedures I (<i>ENG 1, ENG 3, ENG 4, ENG 5</i>)		
BIO 20	Introduction to Human Services (<i>MTH 2, ENG 1, ENG 4</i>)		
BIO 100	Basic Human Biology (<i>MTH 2, ENG 1, ENG 4</i>)		
BIO 101	General Biology I (<i>MTH 2, ENG 1, ENG 3C, ENG 4, ENG 5</i>)

The People Of DCC

Virginia Community College System State Board For Community Colleges

Constance R. Kincheloe, Chair
Chris A. Lumsden, Vice Chair
Glenn DuBois, Secretary and Chancellor

Shahnaz M. Ahmed	Constance R. Kincheloe	Willis A. Morris
Linwood M. Cobb, III	Chris A. Lumsden	Michael Petters
B. Mark Fried	Nathaniel Xavier Marshall	William E. Porter
Mark R. Graham	Bruce J. Meyer	Robert W. Shinn
Gary Hancock	R. Michael Mohler	Alan G. Toxopeus

Danville Community College Board

Mattie M. Cowan, Chair, Halifax County
Richard G. Barkhouser, Vice Chair, Danville Community College

Ann F. Brown, Pittsylvania County	Gideon Miller, Pittsylvania County
John W. Collins, Pittsylvania County	William S. Royster, Jr., Halifax County
Harry G. Lea, Danville	Mark Thackston, Halifax County

President: Dr. B. Carlyle Ramsey

Danville Community College Educational Foundation Board

Dr. Shirley Day Primiano, Chair
Patrick L. Daly, Vice Chair
Fred Blair, Secretary
Roy G. Gignac, Treasurer
Martha A. Walker, Executive Director

Shahnaz M. Ahmed	Nan Freed	Shirley Day Primiano
Kit W. Barkhouser	Roy G. Gignac	B. Carlyle Ramsey
Winn Bishop	John B. Hall, Jr.	Gene Saunders
Fred A. Blair	Rose R. Hawkins	Eileen M. Stendig
Greg Boozer	H. F. Haymore, Jr.	Mary H. Wertz
John R. Cannon	Worth Hudson	Denise H. Whittle
John W. Collins	Sylvesta L. Jennings	Bobbye Rae Womack
Patrick L. Daly	Harry T. Kolendrianos	Sheila G. Wright
James M. Doss	Samuel A. Kushner	Landon R. Wyatt, Jr.
Gene Faucette	Rebecca L. McGovern	Hazel C. York
Ed Fitzgerald, IV	Clyde B. Midkiff	John H. Zechman, Jr.

College Administration

B. Carlyle Ramsey	President
Max R. Glass	Interim Vice President of Academic and Student Services
Scott J. Barnes	Vice President of Financial and Administrative Services
Jeffrey D. Arnold	Interim Dean of Continuing Education & Workforce Services
Andrea J. Burney	Director of Public Relations & Minority Concerns
Peter A. Castiglione	Director of Student Development & Enrollment Management
A. Wade Davenport	Dean, Arts and Sciences Division
William L. Dey	Director of Learning Resources & Distance Learning
Cynthia W. Griffith	Director of Planning, Effectiveness & Research
Lisa Johnson-Knight	Business Manager
Martha A. Walker	Director of Institutional Advancement
Edward T. White	Dean, Business and Engineering Technologies Division

Faculty and Administrators

- Adams, Charlie W. II**
Professor of Information Systems Technology
A.S. - Danville Community College, 1977
B.S. - Averett College, 1980
M.B.A. - Averett College, 1986
- Adkins, James R., Jr.**
Instructor of General Engineering/Drafting & Design
Diploma - Danville Community College, 1984
A.A.S. - Danville Community College, 1996
- Amos, Carl L., Jr.**
Associate Professor and Coordinator of Community Services for Persons who are Deaf and Hard of Hearing
B.A. - Frostburg State University, 1973
M.A. - New York University, 1980
Ed.D. - Lamar University, 2000
- Arnold, Jeffrey D.**
Associate Professor and Interim Dean of Continuing Education and Workforce Services
B.S. - North Carolina State University, 1978
M.B.A. - Averett College, 1992
- Balfour, David**
Assistant Professor of Biology
B.S. - Virginia Commonwealth University, 1992
M.S. - Virginia Commonwealth University, 1994
Ph.D. - Virginia Tech, 2000
- Barnes, Scott J.**
Vice President of Financial and Administrative Services
BSEE - Virginia Tech, 1978
- Brown, Julie J.**
Project Director, Southern Piedmont Educational Opportunity Center
B.A. - University of Virginia, 1992
M.S. - Longwood College, 2000
- Bryant, Mark W.**
Associate Professor of Air Conditioning and Refrigeration
A.S. - Danville Community College, 1974
Diploma - Danville Community College, 1974
- Burney, Andrea J.**
Assistant Professor and Director of Public Relations and Minority Concerns
B.S. - Boston University, 1975
M.B.A. - Averett College, 1995
- Campbell, Donald L.**
Professor of Business Management
B.S. - Virginia Polytechnic Institute and State University, 1966
M.S. - Virginia Polytechnic Institute and State University, 1968
- Cannon, Thomas B.**
Professor of Information Systems Technology
B.S. - Virginia Polytechnic Institute and State University, 1964
M.Ed. - Virginia Polytechnic Institute and State University, 1968
- Carr, Joseph M.**
Associate Professor of Biology
B.S. - Campbell College, 1966
M.A. - Appalachian State University, 1971
M.Ed. - University of North Carolina, 1986
- Carrigan, Steven L.**
Instructor of Information Systems Technology
A.A.S. - Danville Community College, 1995
B.S. - Old Dominion University, 1999
A.A.S. - Danville Community College, 2000
Microsoft Certified Professional (MCP), 2000
Microsoft Certified Systems Engineer/Windows NT 4.0 (MCSE), 2000
Microsoft Certified Systems Engineer/Windows 2000 (MCSE), 2001
Cisco Certified Network Associate (CCNA), 2001
Cisco Certified Academy Instructor (CCAI), 2001
- Carter, Frances H.**
Assistant Professor of Administrative Support Technology
A.S. - Danville Community College, 1979
B.S. - Averett College, 1981
M.S. - Longwood College, 1992
- Castiglione, Peter A.**
Assistant Professor and Director of Student Development and Enrollment Management
B.A. - Southeastern College, 1970
M.S. - Virginia Polytechnic Institute and State University, 1976
- Clayton, George W.**
Professor of Air Conditioning and Refrigeration
Diploma - Danville Technical Institute, 1966
B.A.S. - Elon College, 1979
M.S. - Virginia Polytechnic Institute and State University, 1983
- Cliff, John B., Jr.**
Associate Professor of Mathematics
B.S. - Clarion University of Pennsylvania, 1962
M.A. - Clarion University of Pennsylvania, 1970
- Davenport, A. Wade**
Associate Professor and Dean, Arts and Sciences Division
B.A. - The University of West Florida, 1974
M.S. - Troy State University, 1975
M.A. - San Francisco State University, 1978
Ph.D. - The American University, 1987
- Davis, Kevin**
Associate Professor of Electronics
Diploma - Danville Community College, 1984
B.S. - Old Dominion University, 1995
- Decker, Vincent A.**
Assistant Professor of Business Management
B.S.B.A. - Longwood College, 1985
M.B.A. - Lynchburg College, 1997
- Dey, William L.**
Assistant Professor and Director of Learning Resources and Distance Learning
A.A. - Santa Fe Community College, 1973
B.A. - University of Florida, 1976
M.Ed. - University of Florida, 1981
M.S.L.S. - Florida State University, 1988
- Drinkard, Dewitt T.**
Assistant Professor of Psychology
B.A. - Emory & Henry College, 1974
M.Ed. - East Tennessee State University, 1993
M.S. - Virginia Commonwealth University, 2000

Dunlap, JoLanc*Instructor and Counselor*

A.S. - Danville Community College, 1975

B.S. - Averett College, 1977

M.Ed. - Lynchburg College, 1988

Fisher, Cynthia G.*American Disabilities Act Counselor*

A.A.S. - Danville Community College, 1996

B.S. - James Madison University, 1998

MS Ed - Longwood University, 2001

Foster, Betty W.*Professor of Administrative Support Technology*

B.S. - Radford College, 1969

M.S. - Virginia Polytechnic Institute and State University, 1979

Ed.D. - Nova University, 1993

Fox, Paul C.*Professor of Chemistry*

B.S. - University of Bath, 1980

Ph.D. - University of Leeds, 1984

Gibson, Mark T.*Coordinator of Upward Bound*

B.A. - Johnson C. Smith University, 1986

M.A. - Indiana University of Pennsylvania, 1989

Giles, Michael O.*Associate Professor of Graphic Imaging Technology*

A.S. - West Virginia Institute of Technology, 1995

B.S. - West Virginia Institute of Technology, 1996

Glass, Max R.*Professor and Interim Vice President of Academic and Student Services*

B.S. - Virginia Polytechnic Institute and State University, 1960

M.S. - Virginia Polytechnic Institute and State University, 1962

Ed.D. - Virginia Polytechnic Institute and State University, 1977

Gore, Mary F.*Instructor and Coordinator of Financial Aid*

Certificate - Danville Community College, 1975

A.A.S. - Danville Community College, 2000

B.B.A. - Averett University, 2002

Gott, Sherry Fraser*Assistant Professor of English*

B.A. - Virginia Polytechnic Institute & State University, 1973

M.A. - Virginia Polytechnic Institute & State University, 1976

Graves, Howard A.*Instructor and Counselor*

B.S. - Norfolk State College, 1976

M.Ed. - Coppin State College, 1977

Grether, Barbara M.*Assistant Professor and Librarian*

B.S. - Valparaiso University, 1974

M.L.S. - Indiana University, 1984

Griffith, Cynthia W.*Assistant Professor and Director of Planning, Effectiveness and Research*

B.A. - Radford University, 1990

M.A. - Virginia Commonwealth University, 1994

M.Ed. - University of Virginia, 1997

Hall, E. Lester, Jr.*Instructor of Accounting*

B.A. - Averett University, 1992

B.A. - Washington and Lee University, 1985

C.P.A. - Virginia, 1995

Harrison, W. Robert*Associate Professor of English*

B.A. - University of the South, 1962

M.A. - University of Florida, 1964

Heinrich, John S.*Assistant Professor of Electrical/Electronics*

A.A.S. - Milwaukee Institute of Technology, 1967

B.B.A. - Averett College, 1993

Heldreth, Larry A.*Associate Professor of Accounting*

B.S. - Averett College, 1973

M.B.A. - University of North Carolina at Greensboro, 1976

C.P.A. - Virginia, 1994

Herndon, Raymond W.*Associate Professor of Biology*

B.S. - Virginia Polytechnic Institute and State University, 1964

M.S. - University of Vermont, 1967

Huffman, Robert*Assistant Professor of Drafting and Design*

B.S. - Morehead State University, 1982

M.S. - Old Dominion University, 2004

Kimpton, Paula*Associate Professor of Practical Nursing*

Diploma - Miami Valley Hospital School of Nursing, 1975

B.S.N. - University of Cincinnati, 1993

MSN - Wright State University, 1998

Kolendrianos, Harry T.*Professor of Business Management*

B.S. - Virginia Polytechnic Institute and State University, 1965

M.S. - Virginia Polytechnic Institute and State University, 1966

Ed.D. - Virginia Polytechnic Institute and State University, 1977

Laughlin, Janet T.*Professor of Administrative Support Technology*

B.S. - Palm Beach Atlantic College, 1979

M.B.A. - Averett College, 1986

Lee, Norma*Counselor/Financial Aid Officer, Southern Virginia Higher Education Center*

B.S. - North Carolina State University, 1983

M.S. - North Carolina State University, 1990

Licensed Professional Counselor, #3015

National Certified Counselor, #38180

Martin, M. Wayne*Assistant Professor of Business Management*

A.S. - Danville Community College, 1970

B.S. - Virginia Polytechnic Institute and State University, 1972

M.B.A. - Virginia Polytechnic Institute and State University, 1973

McDaniel, Earl*Director of Community College Programs, Southern Virginia Higher Education Center*

B.A. - University of Richmond, 1973

M.S. Ed - Longwood University, 1975

- McGhee, Richard Terry**
Coordinator of the Information Technology Institute
 B.S. - The Citadel, 1980
 M.S. - Air Force Institute of Technology, 1990
- McKinney, Tammy**
Instructor of Practical Nursing
 RN - Danville Regional Medical School of Nursing, 1991
 BSN - Virginia Commonwealth University, 2000
- Meadors, Helen**
Assistant Professor of English
 B.S. - Radford College, 1968
 M.A. - Radford College, 1973
- Moore, Claude S.**
Professor of Mathematics
 B.S. - Pembroke State College, 1967
 M.A. - DePauw University, 1969
 Ed.D. - Virginia Polytechnic Institute and State University, 1980
- Motley, Boyd E.**
Professor of Developmental and Technical Math
 Diploma - Danville Technical Institute, 1958
 B.S. - Virginia Polytechnic Institute and State University, 1967
 M.S. - Virginia Polytechnic Institute and State University, 1976
 M.B.A. - Averett College, 1986
- Neal, Gail**
Instructor of Mathematics
 B.S. - Wake Forest University, 1963
 M.Ed. - University of Georgia, 1981
 Developmental Education Specialist - Appalachian State University, 2003
- Nixon, Joseph**
Associate Professor of Electrical/Electronics
 Diploma - Danville Community College, 1968
 B.S. - University of Virginia, 1972
- O'Brien, William H.**
Program Coordinator, Workforce Investment Act One Stop Center
 B.S. - Park College, 1987
 M.P.A. - Golden Gate University, 1989
- Pannell, Ronnie**
Coordinator of Neighborhood Educational Opportunity Centers
 B.S. - Virginia State University, 1976
- Phillips, James G.**
Associate Professor of Electrical/Electronics
 Diploma - Danville Community College, 1983
- Polhamus, Edward C.**
Professor of Mathematics
 B.S. - Michigan State University, 1970
 M.S. - University of North Carolina, 1972
 Ed.D. - Virginia Polytechnic Institute and State University, 1980
- Poole, P. Douglas**
Associate Professor of Precision Machining Technology
 Diploma - Danville Community College, 1973
 A.S. - Pennsylvania Center for Degree Studies, 1984
 B.B.A. - Averett College, 1998
- Powell, Laura M.**
Associate Professor of Reading
 B.A. - Stratford College, 1971
 M.Ed. - Averett College, 1989
 Ed.S. - Appalachian State University, 1997
- Rakes, Danny R.**
Associate Professor of Automotive Analysis and Repair
 Diploma - Danville Community College, 1973
 B.B.A. - Averett College, 1998
- Ramsey, B. Carlyle**
President
 B.A. - University of Florida, 1964
 M.S. - Florida State University, 1966
 Ph.D. - Florida State University, 1973
- Roche, William J., Jr.**
Professor of Automotive Analysis and Repair
 Diploma - Blue Ridge Community College, 1976
 B.S. - University of Maryland, 1981
- Rorrer, C. Kinney**
Assistant Professor of History
 B.S. - Appalachian State University, 1968
 M.A. - Appalachian State University, 1969
- Sanderford, Mark A.**
Professor of Biology
 B.A. - University of Illinois, 1971
 M.S. - Appalachian State University, 1988

Womack, Catherine L.

Administrative Assistant, Southern Piedmont Educational Opportunity Center
A.A.S. - Danville Community College, 2002

VCCS Computer Ethics Guidelines

Thousands of users share VCCNet computing resources. Everyone must use these resources responsibly since misuse by even a few individuals has the potential to disrupt VCCS business or the works of others. Therefore you must exercise ethical behavior when using VCCNet resources.

State Law (Article 7.1 of Title 18.2 of the Code of Virginia) classifies damage to computer hardware or software (18.2-152.4), unauthorized examination (18.2-152.5), or unauthorized use (18.2-152.6) of computer systems as (misdemeanor) crimes. Computer fraud (18.2-152.3) and use of a computer as an instrument of forgery (18.2-152.14) can be felonies. The VCCS's internal procedures for enforcement of its policy are independent of possible prosecution under the law.

Definition

VCCNet resources include mainframe computers, minicomputers, microcomputers, networks, software, data, facilities and related supplies.

Guidelines

The following guidelines shall govern the use of all VCCNet resources:

1. You must use only those computer resources that you have the authority to use. You must not provide false or misleading information to gain access to computing resources. The VCCS may regard these actions as criminal acts and may treat them accordingly. You must not use the VCCNet resources to gain unauthorized access to computing resources of other institutions, organizations or individuals.
2. You must not authorize anyone to use your computer accounts for any reason. You are responsible for all use of your accounts. You must take all reasonable precautions, including password maintenance and file protection measures, to prevent use of your account by unauthorized persons. You must not, for example, share your password with anyone.
3. You must use your computer resources only for authorized purposes. Students or staff, for example, may not use their accounts for private consulting. You must not use your computer resources for unlawful purposes, such as the installation of fraudulently or illegally obtained software. Use of external networks connected to the VCCNet must comply with the policies of acceptable use promulgated by the organizations responsible for those networks.
4. Other than material known to be in the public domain, you must not access, alter, copy, move or remove information, proprietary software or other files (including programs, members of sub-routine libraries, data and electronic mail) without prior authorization. The college or VCCNet data trustee, security officer, appropriate college official or other responsible party may grant authorization to use electronically stored materials in accordance with policies, copyright laws and procedures. You must not copy, distribute, or disclose third party proprietary software without prior authorization from the licensor. You must not install proprietary software on systems not properly licensed for its use.
5. You must not use any computing facility irresponsibly or needlessly affect the work of others. This includes transmitting or making accessible offensive, annoying or harassing material. This includes intentionally, recklessly, or negligently damaging systems, intentionally damaging or violating the privacy of information not belonging to you. This includes the intentional misuse of resources or allowing misuse of resources by others. This includes loading software or data from untrustworthy sources, such as free-ware, onto official systems without prior approval.

6. You should report any violation of these regulations by another individual and any information relating to a flaw or bypass of computing facility security to the Information Security Officer or the Internal Audit department.

Enforcement Procedure

1. Faculty, staff and students at the college or VCCNet facility should immediately report violations of information security policies to the local Chief Information Officer (CIO).

2. If the accused is an employee, the CIO will collect the facts of the case and identify the offender. If, in the opinion of the CIO, the alleged violation is of a serious nature, the CIO will notify the offender's supervisor. The supervisor, in conjunction with the College or System Office Human Resources Office and the CIO, will determine the appropriate disciplinary action. Disciplinary actions may include but are not limited to:

- a. Temporary restriction of the violator's computing resource access for a fixed period of time, generally not more than six months.
- b. Restitution for damages, materials consumed, machine time, etc. on an actual cost basis. Such restitution may include the costs associated with determining the case facts.
- c. Disciplinary action for faculty and classified staff in accordance with the guidelines established in the State Standards of Conduct Policy.

3. In the event that a student is the offender, the accuser should notify the Vice President of Academic and Student Services. The Vice President, in cooperation with the CIO, will determine the appropriate disciplinary actions which may include but are not limited to:

- a. Temporary restriction of the violator's computing resource access for a fixed period of time, generally not more than six months.
- b. Restitution for damages, materials consumed, machine time, etc. on an actual cost basis. Such restitution may include the costs associated with determining the case facts.
- c. Disciplinary action for student offenders shall be in accordance with the college student standards of conduct.

4. The College President will report any violation of state and federal law to the appropriate authorities.

5. All formal disciplinary actions taken under this policy are grievable and the accused may pursue findings through the appropriate grievance procedure.

Approval

This guideline shall remain in effect, until superseded or suspended.
